University Mission

The mission of Patten University is to develop, inspire, and empower leaders to effect global and community transformation by delivering accessible, rigorous, and practical undergraduate and graduate distance education in the areas of Christian ministry, business, leadership, management, and technology.

About the University

Patten University was founded in 1976 and is a private, non-profit university owned by Patten Educational Foundation ("PEF") and accredited by the Distance Education Accrediting Commission. The institution was previously named American Graduate University, and is separate and distinct from the other institution named "Patten University."

Patten University seeks to advance students' deepening of faith, awareness of diverse cultures and traditions, expand their ability to think critically and independently, and acquire leadership skills and technological competencies. The University is committed to preparing students to pursue their academic and career goals while helping them integrate faith, social responsibility, and leadership into all areas of their lives. The University strives to serve students from a broad range of ethnic, geographic, and socioeconomic backgrounds.

The University is dedicated to recruiting and retaining faculty and staff who are committed to mentoring and coaching, who demonstrate integrity through scholarship, institutional improvement, and service to the larger community, and employ innovative technologies and teaching methods that meet the needs of 21st-century learners. In its recruitment and retention of students, faculty, and staff, Patten University maintains openness to all qualified persons and encourages academic freedom and diversity within the context of its core values of learning, faith, and community.

The University continues the legacy of Patten Educational Foundation founder Bebe Patten, who was generations ahead of her time as a courageous voice in the Christian evangelical movement, advocating for both racial and gender equality.

Since 1944, Patten Educational Foundation has founded, operated, and supported several educational institutions, including Patten Bible College, Patten Academy (a K-12 school), Prison University Project, Patten University, and others.

Goals of the University

- ◆ Meet the increasing demand for ethical leadership in business, entrepreneurship, technology, and faith-based organizations through relevant and rigorous education.
- ◆ Provide educational delivery methods that are flexible, student-centric, and cost-effective.
- ◆ Provide exemplary service to students, demonstrating a commitment to diversity and inclusion in a global environment.
- ◆ Foster an environment that encourages faculty and student engagement and uses feedback from its community to continuously improve the quality of its instruction, technology, and services.

University Objectives

The general objectives of the University for each student are to provide:

1. A foundation in ethical leadership principles applicable to the operation of any business, faith-based organization, or non-profit organization.
2. The opportunity for students to actively apply ethical leadership principles to their relevant field of study and chosen career.
3. A deeper comprehension of his or her own worldview in relation to business, management, technology, entrepreneurship, or ministry.
4. An increased awareness of the economic, political, technological and social environment of business, leadership, technology, and ministry within a global context.
5. An increased ability to think critically and ethically, demonstrating appropriate levels of written, oral, quantitative, and technology based communication skills.
6. An enhanced capacity for research through increased breadth of knowledge, critical analysis, and synthesization skills.

Location

The University is headquartered on its campus at 2433 Coolidge Ave, Oakland, California 94601.

Hours of Operation

The University is open Monday through Thursday, 9:00AM to 5:00PM and Friday, 9:00AM to 2:00PM (Pacific Time).

Accreditation and Approvals

Distance Education Accrediting Commission

Patten University is accredited by the Distance Education Accrediting Commission (DEAC).

The Distance Education Accrediting Commission is listed by the U.S. Department of Education as a recognized accrediting agency. The Distance Education Accrediting Commission is recognized by the Council for Higher Education Accreditation (CHEA).

1101 17th Street NW, Suite 808, Washington, DC 20036

Fax: (202) 332-1386

info@deac.org

www.deac.org

California Bureau for Private Postsecondary Education

Patten is a private institution approved to operate by the California Bureau for Private Postsecondary Education (BPPE). That approval to operate means compliance with state standards as set forth in the California Education Code (CEC) and 5, California Code of Regulations (CCR).

Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to:

Bureau for Private Postsecondary Education

1747 North Market Street, Suite 225, Sacramento, CA 95834

Tel: (916) 574-8900 or (888) 370-7589 Fax: (916) 263-1897

www.bppe.ca.gov

Required statement per CEC § 94909 (a)(3)(D)

"The Office of Student Assistance and Relief is available to support prospective students, current students, or past students of private postsecondary educational institutions in making informed decisions, understanding their rights, and navigating available services and relief options. The office may be reached by calling (888-370-7589) or by visiting (www.bppe.ca.gov)."

Required statement per CEC §94909(a)(12):

Patten University does not have a pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, and has not had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C. Sec. 1101 et seq.).

Affiliations

Patten University has a partnership with the Defense Acquisition University (DAU). DAU accepts one Patten course in fulfillment of four of their Level I and II certification courses.

University Leadership

Board of Trustees

Patten is a wholly owned subsidiary of Patten Educational Foundation, a California nonprofit corporation with a rich history of operating accredited educational institutions. The members of the Board of Trustees of Patten Educational Foundation govern the university and have backgrounds in industry and higher education appropriate for the institution.

The responsibility of the Board of Trustees is to oversee the institution, appoint the President, and determine the strategic direction of the university. The current members are:

Pastor Tobey Montgomery, Chairman

Dr. Gary Moncher, President

Dr. Sharon Anderson, Trustee

Larry Walker, Trustee

Administration

Dr. Gary Moncher, Interim President

Dr. Nathan Breitling, Chief Academic Officer

Dr. Darla Cuadra, Director, School of Ministry

Dr. Keith Wade, Director, School of Management

Kwasi Adi-Dako, Director, School of Entrepreneurship & Technology

Laurie Tarlos, Director of Admissions and Student Achievement

Cathy Diaz, Registrar and Director of Operations

University Board of Advisors

Patten University values the input and oversight of independent leaders and practitioners. To ensure consistent input and review of the curriculum and outcomes of its programs, Patten University maintains three separate Boards of Advisors – one for each school.

The Board of Advisors for the School of Ministry is composed of both practicing ministers and denominational leadership, as well as academically qualified experts in relevant subject matter. This Board meets annually to review program outcomes and provide recommendations for curricula and

course materials. The current members are Bishop Jerry W. Macklin, Sean O'Neal, D.Min., and Michael Reynolds, D.Min.

The members of the Board of Advisors for the School of Business and Management represent all industries related to the University's graduate curricula. This Board meets annually to review program outcomes and provide recommendations for curricula and course materials. The current members are Byron Chung, MBA, Carli Kyles, Ph.D., Lige Shao, MBA, and Juan Torres, MBA, J.D.

The Board of Advisors for the School of Entrepreneurship & Technology is composed of thought leaders and practitioners in entrepreneurship, software engineering, data science, and education. The current members are Julien Barbier, M.S., Dr. Jaco Jansen van Rensburg, Ph.D., and Fred Swaniker, MBA.

Faculty

Faculty at Patten University are selected for their subject matter expertise, their innovative teaching techniques, and their ability to integrate theory and practice. The faculty of the University have deep research and extensive practical experience in their respective areas, and have diverse personal, professional, and academic backgrounds.

Student Services

The University offers academic advising, including course requirement reviews, course scheduling, registration assistance, course sequencing advising, and other related requests for student assistance. Placement assistance is not offered.

Housing

The University does not provide housing, dormitory facilities, or assistance in locating housing for its students. However, in compliance with Cal. Code Regs. Tit. 5, § 71810(b)(13)(b), private housing is available on the open market. Median monthly rent in Oakland ranges from approximately \$1,490/month (for a studio apartment) to \$2,500/month (for a 3-bedroom apartment).

Online Library Services

Patten University is a member of the Library and Information Resources Network (LIRN). LIRN provides a core library collection with access to:

- ◆ **Gale Cengage:** Over 40 databases including Academic OneFile, Business Collection, Business Economics and Theory Collection, Business Insights: Global, Computer Database, Gale Ready Reference Shelf, Gale Virtual Reference Library, Global Issues in Context, Information Science and Library Issues Collection, InfoTrac Newsstand, LegalTrac, Military and Intelligence Database, and the Student Resources in Context.
- ◆ **ProQuest Central:** Access to several databases with 13,000+ full-text scholarly journals; 6,500+ full-text magazines and trade journals; 2,300+ full-text newspapers; 385,000+ market and industry reports.
- ◆ **EBook Central:** Provides students with an instant, multidisciplinary library of eBooks from authoritative publishers.
- ◆ **Additional Internet Resources:**
 - **ProQuest Dissertation and Theses:** Contains over 5 million citations and 3 million full-text works from thousands of universities.
 - **ABI/Inform:** Access to thousands of full-text journals, dissertations, working papers, and key business and economics periodicals
 - **IBISWorld:** Provides market research on thousands of industries worldwide to research involving case studies or business sector analysis.
 - **Directory of Open Access Journals:** Access to full text, quality controlled scientific and scholarly journals, covering all subjects and many languages.
 - **ERIC:** A comprehensive, easy-to-use full-text database of education research and information.

Access to LIRN is 24 hours per day, 7 days a week. A qualified librarian is available for any research needs.

Career Services

Patten University does not offer career services. The University does not guarantee job placement, advancement, continued employment, or level of income or wage rate upon program/course completion or graduation. Nonetheless, in compliance with 5 CCR §74112 (d)(3), the University has identified the job classifications that each degree or certificate program may prepare its graduates for using the United States Department of Labor's Standard Occupational Classification codes (SOC).

The corresponding roles and SOC codes can be found in [Appendix I](#).

University Schools and Programs

Patten University offers programs across three schools, each of which uniquely contributes to the mission of the University to empower leaders to effect global and community transformation.

School of Ministry

The School of Ministry is dedicated to equipping individuals with the knowledge, skills, and spiritual formation necessary to effectively lead and serve within various facets of Christian Ministry in a global context. Rooted in a deep commitment to biblical principles and theological understanding, this school provides comprehensive education and practical training for those called to serve in pastoral, missional, lay leadership, and other ministry roles.

Programs Offered for Admission

[Associate of Arts in Christian Ministry Leadership](#)

[Certificate in Christian Ministry Leadership](#)

School of Management

The School of Management prepares students with the knowledge, skills, and ethical principles required for success in today's fast-paced business environment. Innovative online programs offer a comprehensive curriculum that integrates academic rigor with practical, real-world applications. The School's goal is to cultivate leaders who embody integrity, adaptability, and a strong sense of social responsibility, empowering them to make meaningful contributions to society.

Programs Offered for Admission

[Master of Project Management](#)

[Master of Business Administration](#)

[Master of Business Administration - Project Management Concentration](#)

[Certificate in Management](#)

[Certificate in Project/Program Management](#)

School of Entrepreneurship & Technology

The School of Entrepreneurship & Technology is dedicated to equipping students with the technical knowledge and skills to become adept practitioners in technology – and the mindset to address challenges of global importance. The School is grounded in the principles of entrepreneurial thinking and leadership, emphasizing the ability to not only navigate but also create opportunities that leverage technology for positive impact. Students in the School of Entrepreneurship & Technology are prepared to analyze and solve complex problems using advanced quantitative methods, supported by a strong foundation in critical and ethical thinking. This comprehensive approach ensures that our graduates are well-versed across different domains of knowledge and possess exceptional communication skills, whether written, oral, or technology-based.

The School's goal is to prepare graduates to emerge as forward-thinking professionals capable of applying their technical skills and entrepreneurial mindset to create, lead, and innovate in a global context, making significant contributions to technology and society.

School of Entrepreneurship & Technology

Kwasi Adi-Dako, Director

School of Entrepreneurship & Technology

School of Entrepreneurship & Technology Degree Programs

The School of Entrepreneurship & Technology is dedicated to developing the next generation of ethical leaders, entrepreneurs, and technologists. Its graduates emerge as forward-thinking professionals capable of applying their technical skills and entrepreneurial mindset to create, lead, and innovate in a global context, effecting local and global transformation.

Instructional Modality

The School of Entrepreneurship & Technology programs are structured to be delivered online via 15-week terms. The programs are designed to be taken in a full-time, year-round manner, allowing the student to earn a bachelor's degree in three (3) years.

Coursework is delivered online, and includes asynchronous learning activities, synchronous class sessions and office hours, peer activities and reviews, and multiple forms of instructional feedback. Students have access to all learning and community resources via the institution's innovative technology platform.

Bachelor of Science in Data Science

Purpose of the Program

Students in the Bachelor of Science in Data Science program gain hands-on experience in applying data science skills to develop innovative solutions. They become proficient in using tools such as SQL, Power BI, and Python, enabling them to extract insights, apply cutting-edge analyses, and make data-driven decisions. Students have the opportunity to apply their skills in real-world scenarios, combining data analysis with entrepreneurial thinking.

The program is grounded in the principles of ethical data practices and leadership, emphasizing the ability to create opportunities that leverage data for positive impact. This comprehensive approach ensures that graduates are well-versed in data manipulation, analysis, and visualization, possessing the skills to address complex challenges in today's data-driven world.

Program Learning Outcomes

The learning outcomes of the program are for each student to be able to:

- Apply entrepreneurial thinking, leadership, and data science skills to identify, analyze, and address global challenges and opportunities, leading self and others toward innovative solutions.

- Illustrate the process of new venture creation.
- Apply quantitative methods to analyze and solve complex problems.
- Apply critical and ethical thinking across different domains of knowledge, demonstrating strong written, oral, and technology based communication skills.
- Demonstrate proficiency in data manipulation, statistics, and data modeling using tools such as SQL, Power BI, and Python.
- Showcase the ability to clean, analyze, and visualize data effectively, and construct efficient data-driven models.
- Create a portfolio that showcases career-ready work, reflecting current knowledge and practice in data science.

Program Length

The Bachelor of Science in Data Science requires the completion of 120 credits. The degree program is designed to be taken in a full-time, year-round manner, allowing it to be completed in three (3) years. However, this duration may vary depending on individual course progression and any prior credits transferred. The time limit for completing the degree program is eight (8) years.

Degree Requirements

The Bachelor of Science in Data Science is comprised of three content areas: general education courses (36 semester credits); data science and software engineering courses (57 semester credits); and entrepreneurship courses (27 semester credits).

Students must successfully complete all required courses with a passing grade.

Please see the [Tuition and Fees](#) section for course fees or visit Patten's website at www.patten.edu.

Bachelor of Science in Data Science

Data Science/Software Engineering Courses

- ◆ AWS 400 - AWS Cloud Computing
- ◆ DS 100 - Introduction to Data Science
- ◆ DS 110 - Preparing Data
- ◆ DS 120 - SQL for Data Science
- ◆ DS 130 - Data Visualisation
- ◆ DS 200 - Python for Data Scientists I
- ◆ DS 210 - Python for Data Scientists II
- ◆ DS 300 - Techniques for Regression Analysis
- ◆ DS 320 - Natural Language Processing and Classification
- ◆ DS 400 - Unsupervised Learning Methods
- ◆ DS 440 - Portfolio Review
- ◆ SE 101 - Introduction to Computing
- ◆ SE 102 - Foundations of Linux and Version Control

Entrepreneurship Courses

- ◆ BUS 200 - Business Finance
- ◆ ENT 100 - Foundations of Entrepreneurship
- ◆ ENT 110 - Introduction to Venture Creation
- ◆ ENT 300 - Ethics and Technology
- ◆ ENT 310 - Leadership and Management
- ◆ ENT 400 - Special Topics

General Education Courses

- ◆ ART 200 - Principles of Design & Media
- ◆ COM 148 - Communication for Impact
- ◆ PE 101 - Intro to Personal Effectiveness
- ◆ PE 301 - Applied Personal Effectiveness
- ◆ PE 401 - Personal Effectiveness for Career Readiness
- ◆ QNT 101 - College Algebra
- ◆ QNT 102 - Statistics
- ◆ QNT 105 - Foundations of Data Analysis and Decision Making
- ◆ SCI 200 - Introduction to Climatology, Ecology, and Human Impact
- ◆ SS 200 - Introduction to Sociology: Gender Inequality, Women Empowerment, and Education
- ◆ SS 300 - Consumerism in Society
- ◆ SS 360 - Research Methods in Social Sciences
- ◆ WR 100 - Fundamentals of Effective Communication
- ◆ WR 300 - Advanced Business Communication

* General Education requirements may be fulfilled via [Sofia Learning](#) or via transfer from an accredited institution.
 – The number of credits per course varies between 1-12 credits.
 – Program requires completion of 120 semester units.

Final Project

As part of students' fulfillment of their degree requirements, they are required to assemble and defend a portfolio of work in DS 440 Portfolio Review. The learning outcomes for this are to:

1. Present, reflect, and iterate on a portfolio of data science challenges and solutions which demonstrate career readiness.
2. Create a resume that demonstrates career readiness.
3. Exhibit entry-level readiness by completing tasks related to SQL database management, Python data analysis using Pandas, data visualization with Power BI, database manipulation, data analysis, and the creation of insightful visualizations.
4. Exhibit entry-level career readiness by demonstrating machine learning proficiency, emphasizing regression, classification, interpretation of model parameters, evaluation metrics, and the application of algorithms, including linear regression, logistic regression, decision trees, random forests, and support vector machines.

Bachelor of Science in Software Engineering

Purpose of the Program

Students in the Bachelor of Science in Software Engineering program gain hands-on experience in applying software engineering skills to develop innovative solutions. They become proficient in using tools such as Git, C, Python, SQL, and JavaScript, enabling them to engineer solutions for development challenges. Students have the opportunity to specialize in either front-end or back-end development.

The program is grounded in the principles of entrepreneurial thinking and leadership, emphasizing the ability to create opportunities that leverage technology for positive impact. Students analyze and solve complex problems using advanced quantitative methods, supported by a strong foundation in critical and ethical thinking. This comprehensive approach ensures that graduates are well-versed across different domains of knowledge and possess exceptional communication skills, whether written, oral, or technology-based.

Program Learning Outcomes

The learning outcomes of the program are for each student to be able to:

- Apply entrepreneurial thinking, leadership, and software engineering skills to identify, analyze, and address global challenges and opportunities, leading self and others toward innovative solutions.
- Illustrate the process of new venture creation.
- Apply quantitative methods to analyze and solve complex problems.
- Apply critical and ethical thinking across different domains of knowledge, demonstrating strong written, oral, and technology based communication skills.
- Problem solve, model, and analyze system capabilities using tools such as Git, C, Python, SQL, and JavaScript.
- Engineer solutions to common problems in front-end or back-end development.
- Create a portfolio that showcases career-ready work, reflecting current knowledge and practice in software engineering.

Program Length

The Bachelor of Science in Software Engineering requires the completion of 120 credits. The degree program is designed to be taken in a full-time, year-round manner, allowing it to be completed in three (3) years. However, this duration may vary depending on individual course progression and any prior credits transferred. The time limit for completing the degree program is eight (8) years.

Degree Requirements

The Bachelor of Science in Software Engineering is comprised of four content areas: general education courses (36 semester credits); software engineering core courses (55 semester credits); software

engineering frontend specialization (11 semester credits) OR backend specialization (11 semester credits) courses; and entrepreneurship courses (18 semester credits).

Students must successfully complete all required courses with a passing grade and a minimum GPA of 2.0.

Please see the [Tuition and Fees](#) section for course fees or visit Patten's website at www.patten.edu.

Bachelor of Science in Software Engineering	
Software Engineering Courses ◆ SE 101 - Introduction to Computing ◆ SE 102 - Foundations of Linux and Version Control ◆ SE 103 - Essential Tools and Mindsets for Software Engineers ◆ SE 200 - C Programming I ◆ SE 201 - Data Structures and Algorithms I ◆ SE 202 - High Level Programming I ◆ SE 203 - Application of Programming Concepts I ◆ SE 300 - High Level Programming II ◆ SE 301 - Storage & Databases ◆ SE 302 - Application of Programming Concepts II ◆ SE 303 - Integrated Software Engineering Project ◆ SE 304 - C Programming II ◆ SE 305 - Data Structures & Algorithms II ◆ SE 306 - Networking ◆ SE 400 - Technical Interview Preparation ◆ SE 410 - Portfolio Project	General Education Courses ◆ ART 200 - Principles of Design & Media ◆ COM 148 - Communication for Impact ◆ PE 101 - Intro to Personal Effectiveness ◆ PE 301 - Applied Personal Effectiveness ◆ PE 401 - Personal Effectiveness for Career Readiness ◆ QNT 101 - College Algebra ◆ QNT 102 - Statistics ◆ SCI 200 - Introduction to Climatology, Ecology, and Human Impact ◆ SS 200 - Introduction to Sociology: Gender Inequality, Women Empowerment, and Education ◆ SS 300 - Consumerism in Society ◆ SS 360 - Research Methods in Social Sciences ◆ WR 100 - Fundamentals of Effective Communication ◆ WR 300 - Advanced Business Communication

– General Education requirements may be fulfilled via Sofia Learning or via transfer from an accredited institution. – The number of credits per course varies between 1-12 credits. – Program requires completion of 120 semester units.	

Final Project

As part of students' fulfillment of their degree requirements, they are required to complete a final project in SE 410 Portfolio Project. The outcomes of this final project are for students to:

1. Demonstrate career readiness by producing a final web application project, defining project scope, objectives, and timelines using project management tools (e.g., Trello, Kanban boards) to organize and track progress effectively.
2. Apply technical knowledge in front-end or back-end development to build a fully functional web application. Utilize problem-solving skills to address challenges encountered during the development process.
3. Exhibit proficiency in using Git and GitHub for version control, showcasing best practices in committing changes, branching, merging, and resolving conflicts. Collaborate on code with team members through pull requests and code reviews.
4. Develop and deliver a comprehensive presentation that effectively communicates the project's purpose, architecture, technologies used, and key functionalities. Articulate challenges faced, solutions implemented, and lessons learned throughout the project development cycle.
5. Reflect on the portfolio project experience to identify strengths, areas for improvement, and strategies for ongoing learning and development in software engineering. Plan for future enhancements to the project or new projects that build upon the skills and knowledge gained.

Academic Calendar

Patten University's School of Entrepreneurship & Technology academic year is based on three terms: Fall, Spring, and Summer. Each term is 15 weeks in length with a 2-3 week break in between terms.

Term	Term Start Date	Add/Drop Deadline	Last Date to withdraw with a W	Term End Date
Fall 2024	09/09/2024	09/15/2024	11/10/2024	12/22/2024
Spring 2025	01/06/2025	01/12/2025	03/09/2025	04/20/2025
Summer 2025	05/05/2025	05/11/2025	07/06/2025	08/17/2025
Fall 2025	09/01/2025	09/07/2025	11/02/2025	12/14/2025
Spring 2026	01/05/2026	01/11/2026	03/08/2026	04/19/2026
Summer 2026	05/04/2026	05/10/2026	07/05/2026	08/16/2026
Fall 2026	08/31/2026	09/06/2026	11/01/2026	12/13/2026
Spring 2027	01/04/2027	01/10/2027	03/07/2027	04/18/2027
Summer 2027	05/03/2027	05/09/2027	07/04/2027	08/15/2027

Official Holidays

All University offices are closed on:

- Martin Luther King Jr. Day
- President's Day
- Memorial Day
- Juneteenth
- Independence Day
- Labor Day
- Thanksgiving Day and the Friday following Thanksgiving
- Christmas Eve through the first business day after New Year's Day.

Students still have access to the University LMS and their coursework during holidays.

Admissions

Statement of Non-Discrimination

Patten University admits students of any race, color, religion, sex, age, national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to the students of the University. It does not discriminate on the basis of race, color, religion, sex, age, handicap, disability, marital status, national and ethnic origin, nor any other characteristic protected under applicable federal, state, or local law in administration of its educational policies, admission policies, and other school administered programs.

Admission Requirements

Applicants must complete an application at www.patten.edu.

High School Graduation Requirements

To be admitted into an undergraduate degree program, students must hold a high school diploma or its equivalent (such as a GED or international equivalent). The institution understands that obtaining proof of having earned a high school diploma can be difficult, particularly in the international context. Accordingly, undergraduate program applicants may self-certify, confirming they have earned a high school diploma or its recognized equivalent.

Technology Requirements

To fulfill the requirements of the Patten course curriculum, all students are required to have access to an internet-enabled laptop. Windows 7 is recommended (Windows 7 minimum), although macOS running Parallels for Windows will suffice. A minimum processor speed of 2 GHz, 4 GB of RAM, and 125 GB of SSD is required.

Official Transcripts

Official transcripts being evaluated for purposes of transfer or credit for prior learning must be sent directly from colleges or universities. Electronically-issued transcripts and other documentation can be sent to admissions@patten.edu.

Paper-based transcripts and records should be sent to:

Patten University - Transcript Office
548 Market St PMB 98598
San Francisco, CA 94104-5401

Foreign Educational Credentials

An applicant who has completed university-level courses in a foreign country must have their educational credentials evaluated and sent to Patten University. The evaluation must also include the

original transcript. If the transcript is not in English, a translation must be provided. Three reputable foreign credential evaluation service providers are suggested below.

World Education Services (WES – <http://www.wes.org/>)

Educational Credentials Evaluators, Inc. (ECE – <http://www.ece.org/>)

International Education Research Foundation (IERF – <http://www.ierf.org/>)

Note that while Patten University accepts students from foreign countries, it does not currently provide visa services. It provides enrollment verification services upon request at no charge.

Proof of English Proficiency

Patten University courses are offered in English. Proof of English proficiency is required from students for whom English is not their native language, or who did not complete their high school diploma (or its equivalent) where the medium of instruction was English.

Students who have earned at least 30 credits from an internationally recognized college or university in which English was the language of instruction may have this requirement waived. In this instance, an average grade of C or higher is required for undergraduate admissions, while an average grade of B or higher is required for graduate admissions.

English Language Proficiency Test	Minimum Scores	
TOEFL iBT - https://www.ets.org/toefl.html	Undergraduate:	61
	Master's:	71
<u>How to Submit:</u> Select Patten University or Designated Institution Code 4620		
IELTS - https://www.ielts.org	Undergraduate:	6.0
	Master's:	6.5
<u>How to Submit:</u> Account Name: Patten University Address: Admissions and Registrar 548 Market St PMB 98598 San Francisco, CA 94104 Score Delivery: E-Delivery		
Duolingo - https://englishtest.duolingo.com/applicants	Undergraduate:	95
	Master's:	100
<u>How to Submit:</u> See: https://englishtest.duolingo.com/applicants		
Pearson Test of English (PTE) - https://www.pearsonpte.com/	Undergraduate:	44
	Master's:	50
<u>How to Submit:</u>		

English Language Proficiency Test	Minimum Scores
1. Select Patten University as an official test score recipient from PTE's database of institutions. OR 2. Send your Score Report Code to admissions@patten.edu	

Admissions Policies

Application Instructions for Admission

The application may be found on the Patten University website at www.patten.edu.

Accommodations for Students with Disabilities

Applicants and prospective or current students with disabilities who require adjustments and/or auxiliary aids throughout the admissions process, and/or throughout their studies, should contact the Admissions Department (admissions@patten.edu) for assistance. It is the student's responsibility to request accommodations and to provide current and supporting documentation from a medical doctor or clinician explaining the nature and limitations of their disability. The institution will work with the person to make reasonable accommodations and adjustments to enable him/her to fully participate in the admissions process and educational programs.

Transfer Credit

Students may receive transfer credits for courses completed at other accredited educational institutions. Approval for specific courses will be determined individually, based on the breadth, scope, organization, and quality of the coursework in relation to the courses required by Patten University. Applicants seeking such evaluations must provide official transcripts from the transferring institution. The transfer credit is solely at the discretion of Patten, as course content and instructional quality can vary between institutions.

Patten will consider transfer credit earned at institutions of higher education outside of the United States that are recognized by the Ministry of Education or equivalent authorizing agency, provided that such credits have been earned through university-level coursework and are presented with equivalent grades of "A," "B," or "C." Such credit must be evaluated by an international transcript evaluation service unless they are earned at an institution that is accredited by a US Department of Education or CHEA-recognized accreditor. The Office of Admissions and/or the Office of the Registrar will make the final determination of the award and applicability of any international credit. A certified course-by-course evaluation from an organization recognized by Patten is required for all post-secondary level studies completed outside of the United States at institutions that are not accredited, or if the transcript is not in English. GPA and degree equivalencies must be included with your course-by-course evaluation. All fees charged by translators or external evaluators must be paid by the student. Recognized transcript evaluation organizations include:

- [Educational Credential Evaluators](#) (ECE)
- [World Education Services](#) (WES)
- [SpanTran: The Evaluation Company](#)
- [International Education Evaluations, LLC](#) (IEE)
- Or any company recognized by the [National Association of Credential Evaluation Services](#) (NACES)

Only grades of C or higher will be considered for undergraduate transfer credit. Transfer credits that are recognized and accepted by Patten University are not factored into the calculation of the student's grade point average.

No more than 75% of the credits required for an undergraduate degree program may be fulfilled via transfer credit.

If an applicant's request for undergraduate-level transfer credit is denied, they may appeal the decision to the Director of Entrepreneurship and Technology (kdako@patten.edu). The appeal should include the name of the Patten course, the name of the institution, the previous course taken, and a detailed explanation, with supporting material, of why the applicant believes the course taken at another institution is similar in content to the Patten course.

Experiential Credit/Credit for Prior Learning

Patten does not accept credit for prior learning or experiential credit. Credit must come from a recognized, accredited institution or from a provider with whom Patten University has an articulation agreement.

First Term Registration

A newly accepted student at Patten must enroll in their first term within 90 days of acceptance. A student is subject to unenrollment from the University if they do not meet this requirement.

Student Verification

Students are required to verify their identity during the admission process. Typically, this is accomplished by the submission of a government-issued photo ID as part of their application. The photo ID or similar means will be used to verify identity throughout the program. All students are issued a student ID number.

Notice Regarding Transferability of Credits Earned at Patten University

The transferability of credits you earn at Patten University is at the complete discretion of an institution to which you may seek to transfer. Acceptance or recognition of the certificate or degree you earn is also at the complete discretion of the institution to which you may seek to transfer. If the credits, certificate, or degree that you earn at Patten are not accepted at the institution to which you seek to

transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at Patten will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Patten University to determine if your credits, certificate, or degree will transfer or be recognized.

Academic Policies

Academic Load

Undergraduate students in the School of Entrepreneurship & Technology must maintain a full-time course load per term. A full-time undergraduate course load is 12 or more semester credits per term. Any exceptions to the full-time status of a student must be approved in advance of the term start date by the Director of Entrepreneurship & Technology.

Each term is 15 weeks in length.

Credit Hour Definition

Patten University utilizes the commonly accepted definition of semester credits (also referred to as "units") to measure its academic courses and programs. One semester credit is the equivalent of 15 hours of academic engagement and 30 hours of preparation. Accordingly, a 3-unit course offered by Patten University is normally achieved via 45 hours of academic engagement and 90 hours of preparation; whereas a 6-unit course is normally achieved via 90 hours of academic engagement and 180 hours of preparation. Credits may vary by course.

Grading Policy

The course grade is the weighted average of the individual course module assignments, quizzes, midterm examinations, projects, final papers, and/or final examinations as determined by the course syllabus. Patten calculates grades numerically, which are then converted to final letter grades. The minimum passing grade for each undergraduate course is 65% (D).

Grades	Quality Points
A (90-100%)	A = 4.0
B (80-89%)	B = 3.0
C (70-79%)	C = 2.0
D (65-69%)	D = 1.0
F (Below 64%)	F = 0.0

Students may view their grades at any time by logging into the Learning Management System.

Grade of "W" (Withdraw) - Undergraduate

Undergraduate students may be issued a grade of W (Withdraw) if they withdraw before midnight of the last day of Week 9 of the term (see [Academic Calendar](#)). The grade of W does not factor into the calculation of a student's GPA.

Grade of "F/I" (Fail/Incomplete) - Undergraduate

Undergraduate students who withdraw after the Week 9 deadline will receive the grade of F/I (Fail/Incomplete). The grade of F/I is worth zero quality points and does factor into a student's GPA.

Grade of "I" (Incomplete) - Undergraduate

A grade of I (Incomplete) may be granted, under rare circumstances, only if a student has attempted at least 60% the coursework, can provide a serious and compelling reason for an extension of the regular term length, can mathematically pass the course with a satisfactory grade on any outstanding assignment(s), and is not on academic probation.

Students must request the "Incomplete" from the course instructor and the Director of Entrepreneurship & Technology prior to attempting the final summative assignment of the course, who will jointly determine if an incomplete grade is warranted. Students may then be allowed up to 14 days from the end of the term to resolve an incomplete, after which time the grade will be calculated based on the total points earned.

Repeating Courses

A student may choose to repeat a course if they have received a non-passing grade or if it is necessary to raise their GPA to meet the University's Satisfactory Academic Progress policy. When a student repeats a course and receives a higher grade, the higher of the grades will be used for calculating the GPA. Repeated courses are subject to tuition charges as detailed in the Enrollment Agreement.

Registration and Adding/Dropping of Courses

Undergraduate students in the School of Entrepreneurship & Technology will be automatically registered each term in Patten's Learning Management System. Undergraduate students may withdraw from all classes prior to the seventh day of the term (see [Academic Calendar](#)) without incurring charges or a grade of W.

To drop courses after the Add/Drop deadline, or to withdraw from the University, undergraduate students must contact the Registrar at registrar@patten.edu.

Administrative Withdrawal and Attendance Policies

The institution may administratively withdraw an undergraduate student from a course from the beginning of week two through the end of week eleven if the student shows no academic activity in the course for 30 consecutive calendar days. Academic activity at the undergraduate level includes submitting any assignment. Attendance at a synchronous session or office hours does not, on its own, constitute academic activity for purposes of undergraduate administrative withdrawals. Undergraduate students who are administratively withdrawn may appeal within 7 days of their withdrawal. Appeals should be directed to appeals@patten.edu. Upon approval, students will be reinstated in the course and must demonstrate continued progress.

Undergraduate students who are administratively withdrawn shall be subject to the School of Entrepreneurship & Technology [Tuition Refund Policy](#).

Program Transfer

Currently enrolled students who wish to transfer into another program may contact the Registrar for assistance. Transferring into another program may require the submission of additional information or completion of additional requirements. It may result in the inability to apply credits that have already been earned to the new program. Transfer credit that has already been awarded may be affected by a program transfer.

Requirements for Graduation

To receive the degree, the student must complete the following:

- ◆ Successfully complete the courses required for the degree program within a maximum time frame of eight (8) years with a GPA of 2.0 or higher.
- ◆ Clear any past-due balances.

Satisfactory Academic Progress Policy

For students to meet satisfactory academic progress (SAP), they must maintain a minimum cumulative grade point average of 2.0. Students who fail to meet satisfactory academic progress will be placed on academic probation.

Academic Probation

Undergraduate students whose cumulative grade point average falls below 2.0 will be placed on academic probation. While on Academic Probation, students must satisfactorily complete each course with a grade of D or higher, or else they will be subject to dismissal from Patten.

Students must raise their cumulative GPA to a 2.0 or higher to be removed from Academic Probation. Students must resolve their academic probation by retaking any failed courses and raising their cumulative GPA to 2.0 or higher within two academic terms. Courses that are retaken are subject to the Course Repeat policy (see [Repeating Courses](#)).

For purposes of clarity, a 2.0 cumulative GPA is required for graduation (see [Requirements for Graduation](#)).

Maximum Time Frame

Students enrolled in a bachelor's degree program must complete their program within eight (8) years.

Dismissal

Students are subject to dismissal from the University if they do not resolve their academic probation status within two terms or do not complete their bachelor's program within eight (8) years. An academically dismissed student will not be allowed to re-enroll for a period of two terms before a consideration of reinstatement may be made.

Leave of Absence

Students may receive a leave of absence by contacting the Director of Entrepreneurship & Technology and stating the reason for their request and the expected date of return. All leaves of absence must be approved by the University in advance. Students are exempt from the institution's Unsatisfactory Progress policy while on Leave of Absence.

Appeals of Dismissal

Patten understands that its students have competing priorities and responsibilities. Patten wants its students to succeed and to graduate, and will work to make reasonable accommodations for each student's situation.

If an undergraduate student has been dismissed from Patten University based on a violation of its Satisfactory Academic Progress policies, the student may petition the University for readmission. Any decision to dismiss a student may be appealed to the Director of Entrepreneurship & Technology, Patten University, 2433 Coolidge Ave, Oakland, CA 94601, or by email to kdako@patten.edu.

Proctoring

Patten University requires proctored quizzes and examinations at regular intervals throughout its programs. Proctors may not be a past or present family member, a work subordinate, a current/previous student of Patten University, or related to a current/previous student of Patten University.

Before taking a proctored quiz or examination, both students and proctors electronically attest that they do not have a relationship that would call into question the proctor's impartiality. The proctor must additionally electronically submit a Proctor Attestation Form, including a copy of both their and the student's government-issued photo identification. Courses and exams that require proctoring are subject to change without notice to students.

Statement on Academic Integrity

Patten expects its students to act with honesty and integrity in completing their course and program work. Distance learning requires a high level of self-discipline with regard to academic integrity. All work submitted by a student, including code, software, or digital creations, must represent the original work of that student. Students found to have cheated or committed plagiarism may be suspended or dismissed from the University.

Student Code of Conduct and Academic Integrity Policy

Students at Patten are expected to adhere to high standards of ethics in the pursuit of their education. As a condition of enrollment, students agree to:

- ◆ Conduct themselves with professionalism, courtesy, and respect for others in all dealings with the Patten staff, faculty, and other students.
- ◆ Observe the institutional policies and rules on submitting work, taking examinations, and conducting research.
- ◆ Never turn in work that is not their own, or present another person's ideas as their own.
- ◆ Never ask for, receive, or give unauthorized help on graded assignments and examinations.
- ◆ Never use short excerpts or quotations from books, articles, or other publications without citing the publication and author.
- ◆ Never divulge the content of or answers to examinations to fellow students.
- ◆ Adhere to all required proctoring requirements.
- ◆ Never improperly use, destroy, forge, or alter Patten's documents, transcripts, or other records.
- ◆ Never divulge their online username or password.
- ◆ Always report any violations of this Code of Conduct to the Chief Academic Officer (nbreitling@patten.edu), and report any evidence of cheating, plagiarism, or improper conduct on the part of any student of Patten when they have direct knowledge of these activities.

Student Records and Privacy

In compliance with California Education Code Sec. 94900 and 5, California Code of Regulations Sec. 71920, Patten maintains permanent records, including transcripts, for each student. Students who wish for an official transcript may contact the Registrar at registrar@patten.edu. Official transcripts require a processing fee.

Patten University protects the privacy rights of its students. Student education records are held confidential in accordance with the Family Educational Rights and Privacy Act (FERPA) and university best practices. Written student consent is required for access and release of student records information. Students may inspect and review their educational records upon written request to the Registrar at registrar@patten.edu. Should a student find, upon review, records that are inaccurate or misleading, the student may request that errors be corrected. If a difference of opinion exists regarding the existence of errors, a student may ask that a meeting be held to resolve the matter. Each student's file will contain the student's records, including a transcript of grades earned. Transcripts will only be released to the student upon receipt of a written request bearing the student's signature or digital equivalent. Per CA Civil Code §1788.93, the University will not refuse to provide a transcript because the student owes a debt.

Student Complaints and Grievances

If any student has a complaint, grievance, or dispute with the University's procedures, policies, or decisions, the student has the right to seek a satisfactory resolution.

First, the student should discuss the matter directly with the instructor or a Patten staff member. The instructor or staff member will attempt to resolve the matter professionally and in good faith. If the matter cannot be settled at this level, the second step is for the student to file a written complaint to Patten Student Services, 2433 Coolidge Ave, Oakland, CA 94601, or at studentservices@patten.edu. The complaint should include a description of the specific allegations and the desired remedy, accompanied by any necessary documentation. Student Services can, if necessary, submit the complaint to the University President for final resolution. Student Services or the President will issue a formal reply to the student within ten working days.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form, which can be obtained on the Bureau's website (www.bppe.ca.gov).

Additionally, a complaint can be filed with Patten's accrediting agency, the Distance Education Accrediting Commission (DEAC), through the DEAC website (<http://www.deac.org/Student-Center/Complaint-Process.aspx>) or 1101 17th Street NW, Suite 808, Washington, DC 20036.

Students who are residents of Georgia may file a complaint with the GNPEC Office, 2082 East Exchange Place, Suite 220, Tucker, GA 30084-5305. Ph: (707) 414-3300
<https://gnpec.georgia.gov/student-resources/complaints-against-institution>

For students residing outside of California and Georgia, there may be additional resources for filing grievances/complaints. Please see the State Higher Education Executive Officers Association website: http://www.shceo.org/shceo_surveys/.

Tuition and Fees

Students who enroll at Patten University's School of Entrepreneurship & Technology assume responsibility for the payment of all tuition and fees in accordance with the policies set forth below.

Degree Tuition

Students are charged a flat, full-time tuition rate per academic term. All students within the School of Entrepreneurship & Technology are required to enroll in a full-time course load. Part-time course loads (less than 12 credits per term) are only allowed with prior approval. In the event of an approved part-time course load, tuition is prorated and charged at a per-credit rate. Normally, this allowance is granted solely during a student's final academic term. Any deviation from full-time student status must receive prior approval from the Director of the School of Entrepreneurship & Technology before the commencement of the term. Each term is 15 weeks in length.

Total estimated charges below are based on on-time completion of the program. Actual costs may vary due to transfer credit or repeated courses.

Tuition must be paid by the end of Week 1, or students may be withdrawn from their coursework.

Bachelor of Science in Data Science (120 credits)

Tuition: \$1,333 per term (full-time course load required)
or \$100 per credit with prior approval only

Total estimated charges¹ (120 credits, 9 terms): \$12,000

Bachelor's Degree Program in Software Engineering (120 credits)

Tuition: \$1,333 per term (full-time course load required)
or \$100 per credit with prior approval only

Total estimated charges¹ (120 credits, 9 terms): \$12,000

Withdrawals and Refunds

After the add/drop period of 7 days from the first day of the term, the student may withdraw from the University and receive a pro rata refund depending on the week of their withdrawal.

¹ Total charges may vary based on repeated courses, transfer of credit or advanced standing, and/or time to completion.

For purposes of determining a refund, a student shall be considered to have withdrawn from an educational program when he or she withdraws or is deemed withdrawn in accordance with the withdrawal policy stated in this institution's catalog. Undergraduate students who withdraw or are administratively withdrawn will receive a refund of tuition according to the following table:

Week of Withdrawal	Tuition Refund
Week 1	100%
Week 2	87%
Week 3	80%
Week 4	73%
Week 5	67%
Week 6	60%
Week 7	53%
Week 8	47%

Week of Withdrawal	Tuition Refund
Week 9	40%
Week 10	0%
Week 11	0%
Week 12	0%
Week 13	0%
Week 14	0%
Week 15	0%

For example, if an undergraduate student in the School of Entrepreneurship & Technology is registered for a full-time course load and paid the flat rate tuition fee of \$1,333, withdraws from the university during the fourth week of the term, the student would receive a refund of \$973.09:

$ \begin{array}{rcl} \$1,333.00 & \times & \begin{array}{c} 73\% \\ \text{(Student withdraws during Week 4} \\ \text{of the term)} \end{array} & = & \$973.09 \end{array} $

If the school cancels or discontinues a course or education program, the school will make a full refund of all charges.

All refunds will be paid within 30 days of cancellation or withdrawal.

If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid program funds. However, Patten does not participate in federal and state financial aid programs.

Student's Right to Cancel

Students have the right to cancel and obtain a refund of charges paid through attendance at the first class session, or the seventh day after enrollment, whichever is later.

If a student cancels their enrollment agreement, they may obtain a refund of 100% of tuition charges paid, if notice of cancellation is made prior to midnight of the seventh day of the term. Cancellation is effective on the date the written notice is sent to the institution.

A cancellation may be effectuated by the student's written notice or by the student's conduct, including, but not necessarily limited to, a student's lack of attendance. Students wishing to cancel their enrollment agreement must be made in writing through email, mail, or fax to: Patten University, Attn: Registrar, 548 Market St PMB 98598, San Francisco, CA 94104-5401; Phone: (626) 966-4576, ext. 1003; Fax: (626) 915-1709; E-mail: registrar@patten.edu.

After the seventh day of enrollment of the term, a student may withdraw for a partial refund. See [Withdrawals and Refunds](#). All refunds will be paid within 30 days of cancellation.

Student Loans

Patten University does not offer student loans and does not participate in federal or state student financial aid programs. If a student obtains a loan to pay for an education program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund.

If the student is eligible for a loan guaranteed by the federal or state government and the student defaults on the loan, both of the following may occur:

- ◆ The federal or state government or a loan guarantee agency may take action against the student, including apply any income tax refund to which the person is entitled to reduce the balance owed on the loan.
- ◆ The student may not be eligible for any other federal student aid at another institution or other government assistance until the loan is paid.

If the student has received federal student financial aid funds, the student is entitled to a refund of the monies not paid from federal student financial aid program funds. Patten University does not participate in federal or state student aid programs.

Student Tuition Recovery Fund

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school.

Questions regarding the STRF may be directed to:

The Bureau for Private Postsecondary Education
1747 North Market Blvd., Suite 225 Sacramento, CA 95834
(916) 574-8900 or (888) 370-7589

To be eligible for STRF, you must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

- ◆ The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
- ◆ You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
- ◆ You were enrolled at an institution or a location of an institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before the closure.
- ◆ The institution has been ordered to pay a refund by the Bureau but has failed to do so.
- ◆ The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
- ◆ You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
- ◆ You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made

the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number of a taxpayer identification number.

Course Descriptions

ART 200 - Principles of Design & Media

Semester Units: 3

Prerequisite: WR-I

This course delves into the fundamental principles of design and their application within media contexts. Underlying the fusion of form and function where aesthetics converge with ethics and creativity intertwines with critical inquiry, this course ensures that students develop a nuanced understanding of the intricate interplay between design principles and contemporary media landscapes. Through practical exercises and real-world applications, students will develop the core competencies necessary upon which to build a solid foundation in design and media principles and applications.

AWS 400 - AWS Cloud Computing

Semester Units: 6

Prerequisite: None

This cloud computing course aims to equip students with the essential skills and knowledge to understand the fundamental concepts of the Amazon Web Service Cloud and apply them in real-world scenarios. Additionally, the course also covers fundamental Amazon Web Services (AWS) security concepts, including AWS access control, data encryption methods, and how to secure network access to AWS infrastructure. It will enable students to build skills and confidence while contributing to their organization's cloud initiatives.

BUS 200 - Business Finance

Semester Units: 3

Prerequisite: ENT 100

Through the integration of technical proficiency, critical thinking, and global awareness, this course equips students with a versatile set of skills to navigate intricate financial management challenges and contribute to organizational success. Going beyond mere technical finance matters, the curriculum fosters problem-solving abilities essential for addressing real-world financial dilemmas.

COM 148 - Communication for Impact

Semester Units: 3

Prerequisite: None

This course is designed to prepare students to not only use public speaking as an approach to deliver a message, but also to make a long-lasting impact and leave a powerful impression through their speech. Through study and speech assignments, students learn about concepts and models of communication, how to adapt a speech for different occasions and audiences, how to effectively support their ideas, how to apply their critical thinking skills in selecting and organizing materials in preparation for a speech, and how to utilize multimedia tools in presentations. Foundational to the process is learning how to maintain strong ethics in the preparation and delivery of impactful speeches and presentations.

DS 100 - Introduction to Data Science

Semester Units: 1

Prerequisite: None

This course challenges conventional thinking and equips students with essential skills for success in today's dynamic world. It fosters creativity, innovation, and problem-solving through critical evaluation of paradigms. Students learn data analysis,

business strategies, and tools, and develop proficiency in methodologies like the EGAD Framework and Agile principles. Cultivating programmatic thinking and problem-solving skills prepares students for success in their professional endeavors.

DS 110 - Preparing Data

Semester Units: 3

Prerequisite: DS 100

Preparing Data is a course crafted to empower students with vital skills in data manipulation, analysis, and visualization using Google Sheets. Across multiple modules and immersive projects, participants will immerse themselves in data governance principles, delve into sophisticated spreadsheet functions, and acquire proficiency in recognizing data patterns and relationships. From grasping the pivotal significance of data integrity to navigating through advanced data visualization tools, this course adopts a thorough approach to honing the craft of data handling and analysis. By the course's conclusion, students will be well-equipped to make informed decisions and adeptly tackle real-world challenges.

DS 120 - SQL for Data Science

Semester Units: 5

Prerequisite: DS 110

In this course, students will enhance their SQL skills and delve deep into database management. This course covers a wide range of topics essential for database professionals and data analysts. From utilizing control flow functions and database keys to grasping set theory and database normalization, students will gain a solid overview of SQL fundamentals. Through hands-on exercises and practical examples, students will learn how to effectively use conditional logic for dynamic data retrieval and manipulation, establish relationships between tables using database keys, and optimize query performance and readability with advanced SQL techniques like subqueries and Common Table Expressions (CTEs). Additionally, students will explore set theory in SQL databases, create SQL views for streamlining data access, and gain insights into various database systems, including NoSQL databases. By the end of the course, students will have the skills and expertise to handle complex database management tasks with confidence, making them a valuable asset in any data-driven organization.

DS 130 - Data Visualisation

Semester Units: 6

Prerequisite: DS 120

This course teaches participants storytelling, communication, design, visualization, dashboards and reports for data. Participants will use Microsoft Power BI to build data models, create new features, and craft interactive dashboards and reports that will enable them to convey insights, provide actionable recommendations, foster collaboration, influence stakeholders, engage others in the data process, and build trust. It covers data modeling, DAX calculations, report and dashboard design, and data transformation techniques. The course covers the basics of importing, connecting, and managing data from various sources, executing complex calculations, and creating interactive reports and dashboards. It also covers Exploratory Data Analysis (EDA), analyzing data patterns and identifying trends. The course emphasizes practical application and real-world scenarios, ensuring participants develop the skills and confidence to tackle data analysis challenges in their professional roles.

DS 200 - Python for Data Scientists I

Semester Units: 4

Prerequisite: DS 130

In this course, students will explore the versatile realm of Python programming, an essential language for various applications, from web development to data science. Python's readability and extensive libraries make it a powerful tool for both beginners and experienced developers. Throughout this course, students will delve into the core principles of Python,

covering topics such as syntax, data structures, and control flow. By the end, students will be equipped with the skills to write efficient and scalable Python code for a wide range of purposes.

DS 210 - Python for Data Scientists II

Semester Units: 5

Prerequisite: DS 200

Building on top of existing Python skills, this course covers essential topics in data science and software development, providing participants with a deep mastery of modularization, data manipulation, visualization, statistical analysis, and software testing. Through hands-on exercises, participants will master Python modules, NumPy for data manipulation, Pandas for data handling, Matplotlib for data visualization, and statistical methods for hypothesis testing. Additionally, they will learn about software testing concepts and techniques, including debugging, and develop proficiency in creating, distributing, and version controlling Python packages using Git and GitHub. By the course's end, participants will possess the skills and knowledge needed to excel in Python programming for data science and software development.

DS 300 - Techniques for Regression Analysis

Semester Units: 6

Prerequisite: DS 210, QNT 102

This course offers a thorough exploration of regression analysis, starting from the fundamental principles of least squares to advanced techniques in model optimization and ensemble methods. Students will acquire expertise in modeling relationships between variables using least squares, describing the significance of the line of best fit in regression modeling. Extensive coverage of data preparation techniques such as test/train split and cross-validation ensures accurate model evaluation and generalization. The course delves into both simple and multiple linear regression, including multidimensional modeling and model evaluation through residual analysis. Additionally, participants will learn various methods for variable selection and model optimization, including regularization techniques like LASSO and Ridge regression. Decision tree algorithms, ensemble methods, and random forests will be thoroughly explored for predictive modeling. By the course's end, students will possess the skills to construct robust regression models, make informed predictions, and responsibly utilize cloud resources for scalable computing.

DS 320 - Natural Language Processing and Classification

Semester Units: 6

Prerequisite: DS 300

In this course, students will discover the essential tools and techniques for effective machine learning model development. Students will learn the importance of version control in managing code iterations and delve into ML platform tools for efficient experiment tracking, and gain advanced skills in the art of text preprocessing, including noise removal and feature extraction using N-grams and Bag of Words. Students will explain binary classification theory and implement logistic regression using sklearn and explore performance metrics like accuracy, precision, and recall, with a focus on handling class imbalance. Students will delve into feature selection and hyperparameter tuning for optimal model performance, explore a range of advanced classification models, and learn to fine-tune them using techniques like grid search. This course intends for students to be equipped to build, evaluate, and select the best classification models for their projects.

DS 400 - Unsupervised Learning Methods

Semester Units: 6

Prerequisite: DS 320

Unsupervised Learning Methods is an all-encompassing course aimed at providing students with a comprehensive outline of unsupervised learning methods and their practical applications. Through a combination of theoretical lectures, hands-on exercises, and real-world projects, students will explore key concepts such as dimensionality reduction, clustering, and

recommender systems. The course covers a wide range of topics, including principal component analysis (PCA), multidimensional scaling (MDS), t-distributed stochastic neighbor embedding (t-SNE), K-means clustering, hierarchical clustering, Gaussian mixture models (GMMs), and recommender systems, all of which are implemented using Python and popular machine learning libraries. By the course's end, students will have the skills to uncover hidden patterns and structures in unlabelled data, enabling them to extract valuable insights and make informed decisions in various domains.

DS 440 - Portfolio Review

Semester Units: 3

Prerequisite: None

This intensive course prepares students for careers in data science by covering SQL database management, Python data analysis using Pandas, and data visualization with Power BI. Students master techniques for manipulating databases, conducting advanced data analysis, and creating insightful visualizations. Emphasis is placed on evaluating machine learning proficiency, including regression, classification, model interpretation, and algorithm application such as linear regression, logistic regression, decision trees, random forests, and support vector machines. Through real-world data science challenges, students hone their problem-solving skills, culminating in the creation of a polished resume showcasing their readiness for the field. By the course's end, students emerge as skilled data practitioners with the expertise and portfolio necessary for success in the data science industry.

ENT 100 - Foundations of Entrepreneurship

Semester Units: 12

Prerequisite: None

This course is designed to give emerging leaders a holistic foundation to the knowledge, skills, behaviors, and values that underpin acts of innovation and entrepreneurship. Blending the development of emotional intelligence, entrepreneurial thinking, critical analysis, project management, effective communication, and technology literacy, the course serves as a survey to the sectors and practices of the 21st-century innovation economy.

ENT 110 - Introduction to Venture Creation

Semester Units: 3

Prerequisite: ENT 100

This course equips university students with a fundamental knowledge of the entrepreneurial journey and the necessary skills for launching and managing a successful business venture. Through engaging lectures, practice exercises, and real-world applications, students will identify and explore the skills needed to go through the venture creation process, from ideation to implementation.

ENT 300 - Ethics and Technology

Semester Units: 3

Prerequisite: None

This course teaches the philosophy, principles, conceptual tools, and moral vocabulary of ethics in technology in the 21st century. It covers the promise and impact of technology on individuals and organizations, the role of ethics in technology, including the responsibilities of individuals and organizations in the development of data, analytics, and AI, and the categorization and risk of ethical issues associated with technology. The course equips students to investigate and analyze the ethical dilemmas associated with data, analytics, and AI through an understanding of technological and algorithmic bias, privacy, discrimination and fairness, and the reliable measurement of accuracy. Emphasis is placed on fostering critical thinking and ethical decision-making skills to navigate the evolving landscape of technology in a responsible and socially conscious way.

ENT 310 - Leadership and Management

Semester Units: 3

Prerequisite: None

This course equips future technical professionals with the essential leadership and management skills needed to thrive in today's dynamic technology landscape. Through engaging learning materials, interactive exercises, and real-world case studies, students will explore crucial topics such as team dynamics, communication strategies, project management, and strategic thinking, specifically applied to technical areas like Software Engineering, Data Analytics, Salesforce, and AWS Cloud Computing. By the end of the course, students will be able to effectively lead, motivate, and collaborate with diverse teams to achieve successful outcomes in technical projects and endeavors.

ENT 400 - Special Topics

Semester Units: 3

Prerequisite: None

ENT 400 delves into special topics critical to the field of technology and entrepreneurship. Special Topics: Artificial Intelligence and Machine Learning will broaden and deepen knowledge and encourage critical thinking, research and understanding of upcoming and more advanced technologies while also providing necessary scope of the AI/ML Lifecycle. The course will explore cutting-edge research, methodologies, and technologies, and challenges students to critically analyze and implement solutions through hands-on coding exercises, case studies and a final capstone project.

PE 101 - Intro to Personal Effectiveness

Semester Units: 1

Prerequisite: None

This course guides students through the essential strategies for success in both academic and personal arenas. This course emphasizes the formulation of SMART goals, the application of ethical principles in academic contexts, and the development of effective stress management techniques. Through a series of interactive assessments including reflective essays, personalized plans, and group discussions, students will gain the skills necessary to navigate and thrive within an academic environment, laying a solid foundation for future professional growth.

PE 301 - Applied Personal Effectiveness

Semester Units: 1

Prerequisite: PE-I

This course is tailored for students beginning their transition from academia to the workforce, focusing on what it means to be an effective team member and contributor. This course delves into the interpersonal dynamics of the workplace, group and team behavior, digital literacy, and the significance of networking in career development. Through engaging assessments such as online discussions, case study analyses, and strategic planning exercises, students will learn to navigate workplace relationships, contribute positively to team dynamics, critically assess digital information, and utilize networking for professional growth. PE 301 equips students with the practical skills and insights needed to thrive in the professional world, fostering a smooth and successful transition from student to professional.

PE 401 - Personal Effectiveness for Career Readiness

Semester Units: 3

Prerequisite: PE-II

This course is designed to polish final-year students' readiness for the professional world, focusing on exhibiting the behaviors of a true professional. This course covers building a professional online identity, creating essential communication

tools such as resumes and professional email addresses, mastering interview techniques, and understanding the significance of ongoing professional development. Through targeted assessments, including the creation of professional online profiles, resume and cover letter writing workshops, recorded mock interviews, and the development of a personal branding strategy, students will not only showcase their strengths and goals but also refine their ability to communicate professionally. The course culminates in the creation of a comprehensive professional development plan, ensuring students are prepared to embark on their career paths with confidence and a clear direction for their continued growth in their chosen fields.

QNT 101 - College Algebra

Semester Units: 3

Prerequisite: None

This course is a foundational university course designed to equip undergraduates with essential algebraic skills necessary for success in higher-level mathematics, software engineering and data science disciplines. Delving into the core principles of algebra, this course provides a structured learning experience that progresses through key concepts, from fundamental arithmetic to advanced functions and beyond.

QNT 102 - Statistics

Semester Units: 3

Prerequisite: None. QNT 101 Recommended.

This course provides students with a foundational understanding of statistical concepts and techniques essential for data analysis across various disciplines. This course is designed to introduce students to the principles of descriptive and inferential statistics, enabling them to analyze and interpret data effectively. Through interactive learning experiences and practical applications, students develop the skills necessary to make informed decisions based on statistical evidence.

QNT 105 - Foundations of Data Analysis and Decision Making

Semester Units: 3

Prerequisite: QNT 102

This foundational university course in data analysis and decision making equips undergraduate students with the essential skills and mindset required to harness data for informed, logical, and data-driven decision-making. Through a blend of theory, hands-on exercises, and practical application, students will develop the core competencies needed to extract insights from data, test hypotheses, and solve complex problems. The course spans 135 hours, incorporating classroom instruction, individual and group assignments, and guided analytical projects.

SCI 200 - Introduction to Climatology, Ecology, and Human Impact

Semester Units: 3

Prerequisite: QNT 102

This course is designed to provide a comprehensive understanding of sustainability concepts and methodologies, essential for tackling the dual crises of climate change and biodiversity loss. The aim is to equip participants with the knowledge and skills necessary for effective sustainability efforts and to cultivate an appreciation for the complex interactions between climate change and ecosystem dynamics. By participating in this course, you will be prepared to contribute significantly to overcoming environmental challenges. You will also understand the crucial interplay between climate change and ecosystem dynamics, positioning you to play a vital role in our collective pursuit of a sustainable future.

SE 101 - Introduction to Computing

Semester Units: 3

Prerequisite: None

This course is an introductory course that provides students with a comprehensive foundation in software engineering, encompassing its core principles, significance, and practical applications. Through a combination of theoretical learning and hands-on exercises, students will delve into various aspects of software development, including basic computer architecture, version control systems, programming logic, and problem-solving techniques. By the end of the course, students will be equipped with the essential knowledge and skills to embark on further study and application in the field of software engineering.

SE 102 - Foundations of Linux and Version Control

Semester Units: 3

Prerequisite: None

This course provides comprehensive training in Linux command-line interfaces, shell scripting, and Git version control systems, emphasizing efficient system navigation, task automation, and project management while ensuring data integrity and security. Students apply Linux command-line operations, file permissions, and security mechanisms before advancing to Git version control, where they learn repository management and collaboration techniques. Practical exercises reinforce skills in project tracking, team collaboration, and code quality maintenance through advanced Git features and workflows.

SE 103 - Essential Tools and Mindsets for Software Engineers

Semester Units: 2

Prerequisite: None

This course equips students with essential software engineering tools for efficient code navigation and manipulation. Emphasis is placed on the significance of cultivating and sustaining a professional network, recognizing its pivotal role in career advancement within software engineering. Students also grasp the concepts of grit and growth mindsets, applying these principles to drive personal and professional growth in the field. Additionally, proficiency is attained in utilizing key communication and collaboration tools such as Discord, fostering effective team interaction and project management in software engineering contexts.

SE 200 - C Programming I

Semester Units: 5

Prerequisite: SE 102

This course is essential for undergraduate learners seeking a solid foundation in low-level programming with the C language. By deep exposure and practice of fundamental concepts and advanced techniques such as memory management and dynamic allocation, students gain the skills necessary for developing efficient and robust software solutions. Through hands-on exercises and real-world applications, this course equips students with problem-solving abilities crucial for success in diverse computing environments, from software development to system programming and embedded systems. By enrolling in Low Level Programming I, students will acquire the expertise needed to excel in their academic and professional pursuits within the field of computer science.

SE 201 - Data Structures and Algorithms I

Semester Units: 3

Prerequisite: SE 200, QNT 101

Data Structures and Algorithms I is a foundational undergraduate course aimed at developing students' problem-solving skills and algorithmic thinking in computer science. Through a blend of theory and practical exercises, students will explore how to effectively utilize data structures to solve complex problems and understand the rationale behind choosing specific structures for efficiency and suitability. By applying algorithmic thinking to manipulate data within these structures, students will enhance their abilities in data organization and retrieval. This course is essential for learners aspiring to excel in fields like

software development, data science, and artificial intelligence, providing a solid foundation for problem-solving and algorithmic principles crucial in these domains.

SE 202 - High Level Programming I

Semester Units: 5
Prerequisite: SE 200

This course covers essential programming concepts and software development practices. Students learn fundamental syntax, modular programming, object-oriented concepts, and test-driven development. Through hands-on exercises, they gain practical skills for building robust and maintainable code.

SE 203 - Application of Programming Concepts I

Semester Units: 3
Prerequisite: SE 202

This course offers a comprehensive journey in web application development, covering front-end and back-end practices, database integration, object-oriented programming principles, software testing fundamentals, and critical thinking. Students will learn to analyze problems, engineer solutions, and tackle real-world challenges, preparing them to navigate the complex landscape of web application development confidently.

SE 300 - High Level Programming II

Semester Units: 4
Prerequisite: SE 202

In this course, students will embark on an immersive journey into the realm of advanced web development, focusing on harnessing the power of JavaScript to create dynamic and interactive web applications. Through a combination of theoretical understanding and hands-on practice, students will delve into various aspects of client-side web technologies, programming libraries, and best practices.

SE 301 - Storage and Databases

Semester Units: 3
Prerequisite: SE 202

Students will delve into the heart of data management in this course. Students will grasp the foundational principles of data storage, learning how relational databases organize, index, and retrieve data. Through practical exercises, they'll apply best practices in database design and management, ensuring data integrity, security, and efficient handling. With a focus on SQL, students will develop proficiency in crafting complex queries to extract, update, and organize data effectively. Armed with these skills, they'll analyze database data to generate insightful reports, empowering data-driven decision-making.

SE 302 - Application of Programming Concepts II

Semester Units: 4
Prerequisite: SE 203

Students begin to unlock the world of web application development in this intensive course. Students will design and implement applications with web frameworks, creating RESTful APIs, and crafting dynamic interfaces. They'll apply advanced programming principles to build complex, industry-standard applications. By course end, students will be equipped to develop scalable, maintainable, and high-performing web solutions.

SE 303 - Integrated Software Engineering Project

Semester Units: 4

Prerequisite: SE 200 or SE 201 or SE 203 or SE 300

This course guides students in executing a comprehensive project, integrating diverse software engineering skills. Students conduct research, develop a minimum viable product (MVP), and effectively communicate project details.

SE 304 - C Programming II

Semester Units: 4

Prerequisite: SE 200

This course is designed to advance students' proficiency in C programming and software development through a comprehensive exploration of advanced topics and practical applications. By the end of the course, students will have mastered a range of advanced C programming constructs and techniques, equipping them with the skills necessary to develop complex and efficient software solutions.

SE 305 - Data Structures & Algorithms II

Semester Units: 2

Prerequisite: SE 201

In this course, students will embark on a comprehensive exploration of algorithmic analysis and design, focusing on synthesizing theoretical knowledge with practical problem-solving skills. Through a combination of theoretical lectures, hands-on exercises, and real-world applications, students will delve into the intricacies of algorithm performance evaluation, optimization, and application.

SE 306 - Networking

Semester Units: 1

Prerequisite: None

This course provides an introduction to essential networking concepts and tools. Through a combination of theoretical knowledge and hands-on exercises, students will gain a solid understanding of networking fundamentals, enabling them to troubleshoot network issues and design basic network configurations.

SE 400 - Technical Interview Preparation

Semester Units: 3

Prerequisite: SE 201 or SE 202 or SE 305

This course focuses on applying advanced data structures and algorithms to solve intricate problems commonly encountered in technical interviews. Students will learn to break down coding problems, evaluate solution strategies based on factors like time and space complexity, and design innovative solutions. Emphasis is placed on clear communication of coding choices and thought processes, mirroring real interview scenarios. By the end of the course, students will be adept at translating theoretical knowledge into practical solutions, ready to excel in technical interviews.

SE 401 - Modern JavaScript for Frontend

Semester Units: 3

Prerequisite: SE 300

This course is designed to equip students with the essential skills and knowledge required to leverage modern JavaScript features effectively in web development projects. Through a combination of theoretical learning and practical application,

students will explore advanced concepts and techniques to enhance their proficiency in JavaScript and TypeScript programming.

SE 402 - Advanced HTML & CSS

Semester Units: 2

Prerequisite: SE 302

In this course, students will acquire and apply advanced HTML concepts, browser developer tools for debugging and optimizing HTML and CSS, and advanced CSS techniques including Grid, Flexbox, animations, and preprocessors. Students will also learn responsive web design principles for seamless adaptation across devices.

SE 403 - Frontend Framework

Semester Units: 4

Prerequisite: SE 401

This course covers React fundamentals and advanced techniques for building interactive web applications. Students will learn JSX, components, and lifecycle methods, design reusable component architectures, and master state management with props, hooks, and Redux. Additionally, they will configure Webpack, implement styling approaches, and apply immutable data patterns for enhanced performance. By the course end, students will be proficient in building scalable React applications tailored to modern web development demands.

SE 404 - Advanced Frontend Concepts

Semester Units: 2

Prerequisite: SE 402

This course covers essential web development skills, including Markdown to HTML conversion, Flexbox layout design, web form development with client-side validation, web accessibility best practices, advanced CSS styling techniques, and Sass/SCSS proficiency. By course end, students will adeptly create modern, accessible, and visually engaging web applications.

SE 405 - Modern JavaScript for Backend

Semester Units: 3

Prerequisite: SE 300

This course covers modern JavaScript, including ES6 features like arrow functions and promises, essential for backend development. Students learn Node.js fundamentals, unit testing, and integrate concepts into real-world projects. By course end, students are proficient in backend development using JavaScript and Node.js.

SE 406 - Advanced Backend Concepts

Semester Units: 4

Prerequisite: SE 202

SE 406 Advanced Backend Concepts covers advanced Python backend development techniques. Students master variable annotations for code readability and type checking. They learn async programming, testing, pagination, caching, i18n, queuing systems, and file management for efficient backend operations. Through hands-on exercises, students gain practical skills for optimizing performance and scalability in backend applications

SE 407 - Advanced Storage Concepts

Semester Units: 2

Prerequisite: SE 301

In this course, students will apply MySQL for complex queries and optimization, and explore NoSQL concepts and Redis basics. Students will learn to select the right storage solutions for various applications based on data structure, scalability, and performance needs.

SE 408 - Authentication & Authorization

Semester Units: 2

Prerequisite: SE 405

In today's digital age, the security of personal data is of paramount importance. In this course, students will delve into the principles and best practices of handling personal data securely, encompassing data privacy laws, encryption techniques, and secure storage methods. Through theoretical lectures and practical exercises, students will develop a thorough understanding of safeguarding personal data against unauthorized access and breaches.

SE 410 - Portfolio Project

Semester Units: 5

Prerequisite: Specialization Courses

SE 410 Portfolio Project builds upon the knowledge and skill students have developed through the program, and culminates in a final project that demonstrates career readiness and technical proficiency. Blending web application development with project management principles, students will plan, execute, and present web projects effectively. They will master tools like Trello for project organization and apply technical skills in front-end or back-end development. Proficiency in Git/GitHub for version control and collaboration will be emphasized. Through project presentations and reflection, students will learn to communicate project details and identify areas for improvement, fostering ongoing learning and skill development in software engineering.

SS 200 - Introduction to Sociology: Gender Equality, Women Empowerment, and Education

Semester Units: 3

Prerequisite: WR-I

This course provides students with an overview of the field of sociology, with a special focus on the issues of gender inequality, women's empowerment, and education through a sociological lens. Using theoretical frameworks, case studies, and analysis of historical and contemporary events, students will explore the intersection of gender and society, and the pivotal role of education in reducing gender disparities.

SS 300 - Consumerism in Society

Semester Units: 3

Prerequisite: WR-I

This course explores the sociological aspects of consumerism and its profound impact on society. Students will examine the historical development of consumer culture, the social and economic forces that drive consumption, and the ways in which consumerism influences identity, social relationships, and inequality. Through critical analysis and interdisciplinary perspectives, the course will delve into the role of media and advertising, the ethical implications of consumption, and the social and environmental consequences of consumer habits. By engaging with diverse theoretical frameworks and empirical studies, students will gain a comprehensive understanding of consumerism's role in shaping contemporary social life.

SS 360 - Research Methods in Social Sciences

Semester Units: 3

Prerequisite: SS-I or SS-II and QNT 102

This course provides an overview of research practices in the social sciences, including critical analysis of research paradigms, ethical considerations, research design, both quantitative and qualitative methodologies, and dissemination of results. Learners will acquire and exhibit skills for both evaluating and generating original research.

WR 100 - Fundamentals of Effective Communication

Semester Units: 3

Prerequisite: None

This course is designed to prepare students to not only use public speaking as an approach to deliver a message, but also to make a long-lasting impact and leave a powerful impression through their speech. Through study and speech assignments, students learn about concepts and models of communication, how to adapt a speech for different occasions and audiences, how to effectively support their ideas, how to apply their critical thinking skills in selecting and organizing materials in preparation for a speech, and how to utilize multimedia tools in presentations. Foundational to the process is learning how to maintain strong ethics in the preparation and delivery of impactful speeches and presentations.

WR 300 - Advanced Business Communication

Semester Units: 3

Prerequisite: WR-I

This general education course is designed to provide students with a deep understanding of the complex and dynamic nature of communication within the corporate world. Through a combination of theoretical insights, practical skills, and a focus on developing a strategic mindset, students will acquire the advanced competencies necessary to excel in professional settings.

School of Management

Dr. Keith Wade, Director

School of Management

School of Management Degree Programs

Today's management environment is exceptionally turbulent. Resources are scarce, technology advances rapidly, requirements and perceived needs change quickly, the global marketplace is very competitive, and the laws and regulations are becoming more numerous and more complex.

Today's managers, both in industry and government, must have two essential elements to respond effectively to the changing environment. The first is a personal value system appropriate to the problems and human expectations of the times. The second is the ability to understand and interpret basic leadership and management disciplines and technological, environmental, and political trends to achieve organizational and societal goals.

Patten University serves as an institution of higher learning for persons engaged in the areas of leadership, management, business, and project management. The function of the University is to define and provide the education for successful participation in the field. Students may take individual courses as their needs dictate, or they may participate in the University's degree programs.

The University offers rigorous and intellectually demanding programs leading to a Master of Project Management (MPM) degree, or a Master of Business Administration (MBA) with a General Management or Project Management concentration. The University's programs are completely structured, extensively researched and documented educational programs, organized and conducted by a professional faculty with an extensive practical and theoretical background. These rigorous programs produce a management education of substance, quality, and considerable market value.

The programs of the University provide a choice of plans for the educational development of managers based on the needs and obvious career channels of the individual firm or agency and the industry. This approach is designed to reduce the waste of scarce educational time and dollars in attendance at random courses and seminars. The program is organized so that individual managers can be the principal determinants as to what happens to them educationally, within the parameters of the needs of their organization and industry, so that their education will have meaning to all three.

Instructional Modality

The University's graduate programs feature an online, self-paced modality, providing a high-quality and convenient method of pursuing a graduate degree or certificate program. These distance education programs are designed for the adult who has family, job, and community responsibilities.

Courses can start each month, and are offered in 16-week terms. Students engage with the material and interact with faculty via the University's learning management system. Student work is typically graded within 72 hours of submission, and results are available immediately within the Learning Management System.

Course material is structured progressively, such that learning moves from the simple to the more complex, with review exercises and low-stakes assessments offered frequently to ensure that students can easily absorb the material. Additionally, several case studies and exercises are assigned in each course, illustrating actual, real-world problems. The major objectives of the cases and exercises are to encourage the student to engage in independent thinking, apply their learning to real-world situations, and assist in developing skills in using the knowledge imparted in the course.

Master of Acquisition Management

(not accepting new enrollment)

Purpose of the Program

The practice of business management in the acquisition field is a unique, highly sophisticated profession. Management practices and procedures in this field not only encompass mastery of the normal functions of an organization, e.g., product and service development, financial management, law, technical and operations management, program management, contracting, and general management, but also the regulatory requirements and the management techniques unique to the Government acquisition, contracting and program management processes. These requirements and techniques interrelate with normal business management procedures, resulting in an evolutionary business management process, far different from, and in many areas more sophisticated than, normal commercial management.

The broad area of Government acquisition, contracting, and program management has achieved recognition as an educational and management discipline for which there is an established rationale and need. However, there are generally few professional degree or certificate programs provided by traditional post-secondary schools.

The purpose of the MAM program is to encourage the students to improve their present work capabilities, and to prepare themselves for increasing acquisition management responsibilities, by the development of an intensive knowledge of their chosen discipline on a broad base of information on the management theories, procedures, practices, techniques and skills associated with business operations. However, rather than learning these in unrelated units of information, the general knowledge, techniques, and skills associated with specific areas of acquisition management in the Government environment are integrated into a complete body of knowledge. This provides the student with a more meaningful educational experience by taking advantage of the co-curricular effects of his or her daily work experience, and at the same time, provides that student with multiple career choices in the field of acquisition and contracting with the Federal Government.

Program Learning Outcomes

The overall Program Learning Outcomes are for each student to be able to:

- Demonstrate a knowledge of the core principles of acquisition management.
- Demonstrate knowledge of the various management functions directly related to leading and managing contracts and programs in the Federal Government.
- Explain the various aspects of the modern government acquisition environment.
- Apply analytical skill in the research and solution of problems.
- Demonstrate readiness for career advancement.

Program Length

The Master of Acquisition Management requires the completion of 36 credits. The degree program is typically completed in three (3) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the degree program is seven (7) years.

Degree Requirements

The Master of Acquisition Management program is organized into a block of five general management courses and a block of seven acquisition courses totaling 36 semester units. The management courses are designed to provide the student with an overall framework of business knowledge. They stress the basic principles, concepts, and practices associated with the overall management of any business.

The acquisition courses provide the student with a detailed working knowledge in the areas of law and regulations, source selection and contract award, finance and pricing, negotiation, program, technical and production management, contract management, and subcontract and purchasing management.

The student must successfully complete each course and then pass a program Comprehensive Examination or complete an approved Final Project within seven years of enrollment in the program.

The courses may all be taken through distance education. Please see the [Tuition and Fees](#) section for course fees or visit Patten's website at www.patten.edu.

– Comprehensive Examination or a University-approved Final Project is required. – Each course is 3 semester units. – Program requires completion of 36 semester units.	

Master of Project Management

Purpose of the Program

Project Management is the process where a single leader/manager is responsible for building a project or program team to accomplish the project's objectives on schedule, within budget, and to the customer's satisfaction. This includes planning, organizing, staffing, coordinating, monitoring, motivating, and controlling the combined efforts of all of the product teams, functional and staff groups within an organization, and outside contractors and vendors. It is the integrated management of a specific project carried out in a systematic way. Management of projects and large programs consisting of several projects is one of the most complex and demanding management concepts in existence. Project management skills are quite different from the technical skills that are so often associated with most projects. There are aspects of all projects which are outside the scope of the technical areas, yet which must be managed with every bit as much care, ability, and concern. That is, these non-technical areas must be well managed if the project's objectives are to be met with optimum economy of resources and with the maximum satisfaction of the participants.

The purpose of the MPM degree program is to provide the ability to integrate organizational, business, and technical management systems with human and leadership skills to successfully manage dynamic projects and programs. The program is based on the body of knowledge developed by the University in presenting courses in project/program management to thousands of industry and government personnel since 1970. The program is also based on the work done in developing a body of knowledge by the Project Management Institute, an independent non-profit organization of project management professionals.

Program Learning Outcomes

The overall Program Learning Outcomes are for each student to be able to:

- Demonstrate a structured yet varied knowledge of the theory and practice of program and project management.
- Explain the role of project managers and the strategies, tactics, and functions associated with the leadership and management of an entire project/program or portfolio.
- Demonstrate a facility in critical analysis, communication, and quantitative and integrative skills.
- Identify the relationship of the project interests to the overall industry and government operations.
- Recognize the proper relationship of basic principles to the changing techniques used to implement them.
- Demonstrate readiness for career advancement.

Program Length

The Master of Project Management requires the completion of 36 credits. The degree program is typically completed in three (3) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the degree program is seven (7) years.

Degree Requirements

The Master of Project Management program is organized into a block of general management courses and a block of project management courses. The management courses are designed to provide the student with an overall framework of business knowledge. They stress the basic principles, concepts, and practices associated with the overall management of any business. The project management courses provide the student with both the theory and a working knowledge of the project management field to include the areas of leadership, business and financial management, human relations, technical management, communications, and negotiation.

The student must successfully complete courses totaling a minimum of 36 semester units in the program and then pass a program Comprehensive Examination or complete an approved Final Project within seven years of enrollment in the program.

The courses may all be taken through distance education. Please see the [Tuition and Fees](#) section for course fees or visit Patten's website at www.patten.edu.

Master of Contract Management

(not accepting new enrollment)

Purpose of the Program

The practice of business management in the field of contracting is a unique profession. Management practices and procedures in this field not only encompass mastery of the normal functions of an organization, e.g., business development, financial management, law, operations and production, project management, procurement, and general management, but also the regulatory requirements and management techniques unique to the Government contracting processes. These requirements and techniques interrelate with normal business management procedures, resulting in a business management process, different from, and in many areas more complex than, normal commercial management.

The broad area of Government contracting has achieved recognition as an educational and management discipline for which there is an established rationale and need. However, there are generally few professional degree or certificate programs provided by traditional post-secondary schools.

The purpose of the MCM program is to encourage individuals to improve their present work capabilities, and to prepare themselves for increasing contract management responsibilities, by the development of an intensive knowledge of this discipline on a broad base of information on the management theories, procedures, practices, techniques and skills associated with business operations. However, rather than learning these in unrelated units of information, the general knowledge, techniques, and skills associated with specific areas of specialization in the Government environment are integrated into the general area of contracting with the Federal Government. This provides the student with a more meaningful educational experience by taking advantage of the co-curricular effects of his or her daily work experience, and at the same time, provides that student with multiple career choices in the area of contracting with the Federal Government.

The MCM program is similar to the [MAM program](#). However, this program is oriented to personnel who work with industry companies that do business with the federal government as prime or subcontractors.

Program Learning Outcomes

The overall Program Learning Outcomes are for each student to be able to:

- Demonstrate a knowledge of the core principles of contract management.
- Demonstrate knowledge of the various management functions directly related to leading and managing contracts in the Federal Government.
- Explain the various aspects of the modern government contracting environment.
- Apply analytical skill in the research and solution of problems.
- Demonstrate readiness for career advancement.

Program Length

The Master of Contract Management requires the completion of 36 credits. The degree program is typically completed in three (3) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the degree program is seven (7) years.

Degree Requirements

The Master of Contract Management program is organized into a block of five general management courses and a block of seven contracting courses totaling 36 semester units.

The management courses are designed to provide the student with an overall framework of business knowledge. They stress the basic principles, concepts, and practices associated with the overall management of any business. The contracting courses provide the student with a detailed working knowledge of contracting with the Federal Government to include the areas of law and regulations, marketing and proposals, finance and pricing, negotiation, program, technical and production management, contract management, and subcontract and purchasing management.

The student must successfully complete each course and then pass a program Comprehensive Examination or complete an approved Final Project within seven years of enrollment in the program.

The courses may all be taken through distance education. Please see the [Tuition and Fees](#) section for course fees or visit Patten's website at www.patten.edu.

–Comprehensive Examination or a University-approved Final Project is required. – Each course is 3 semester units. – Program requires completion of 36 semester units.	

Master of Supply Chain Management

(not accepting new enrollment)

Purpose of the Program

Effective supply chain management is essential to an organization's success. Supply chain performance contributes directly to the financial and operational efficiency of both corporate and government entities. Supply chain management is not only concerned with the steps in the procurement process, but also the requirements generation process and post-award activities, including other logistics activities such as receiving, inspection, materials handling, transportation storage, and distribution.

The purpose of the MSCM program is to help improve students' work capabilities and to prepare them for increasing supply chain management responsibilities by the development of an intensive knowledge of their chosen discipline on a broad base of information on the management theories, procedures, practices, techniques, and skills associated with business operations.

This program provides a practical framework for how organizations manage the enterprise-wide functions of supply in today's business environment, with a focus on supply chain management issues. The program covers the conduct and management of the supply chain management function – how that function interacts with the other principal business functions, including product development, marketing, operations, finance and logistics – the conduct of the supply chain process, including the integration of requirements determination, supplier development, qualification and selection – and supplier relations and performance.

In this program, rather than studying these topics in unrelated units of information, the general knowledge, techniques, and skills associated with specific areas of supply chain management are integrated into a complete body of knowledge.

This provides the student with a more meaningful educational experience by taking advantage of the co-curricular effects of his or her daily work experience, and at the same time, provides that student with multiple career choices in the field of supply chain management.

Program Learning Outcomes

The overall Program Learning Outcomes are for each student to be able to:

- Demonstrate a knowledge of the core principles of supply chain management.
- Demonstrate knowledge of the various management functions directly related to managing supply chain activities.
- Explain the various aspects of the modern supply chain management environment.
- Apply analytical skill in the research and solution of problems.
- Demonstrate readiness for career advancement.

Program Length

The Master of Supply Chain Management requires the completion of 36 credits. The degree program is typically completed in three (3) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the degree program is seven (7) years.

Degree Requirements

The Master of Supply Chain Management program is organized into a block of five general management courses and a block of seven supply chain management courses totaling 36 semester units. The management courses are designed to provide the student with an overall framework of business knowledge. They stress the basic principles, concepts, and practices associated with the overall management of any business. The supply chain management courses provide the student both the theory and working knowledge of the supply chain management field, including the areas of purchasing and supply management, law and contracts, supply chain management, cost and price analysis, negotiation, logistics management, and project management.

The student must successfully complete each course and then pass a program Comprehensive Examination or complete an approved Final Project within seven years of enrollment in the program.

The courses may all be taken through distance education. Please see the [Tuition and Fees](#) section for course fees or visit Patten's website at www.patten.edu.

Master of Business Administration Programs

Purpose of the Programs

These programs offer a broad-based education in business operations designed for working professionals who wish to advance or enhance their working careers. The MBA emphasizes core business principles and the latest concepts, practices, and skills needed in today's marketplace.

The program presents an overall management perspective. Certain courses provide a detailed knowledge of management principles as they are related to the individual functional areas, such as marketing, operations, finance, and accounting. Other courses provide knowledge of the quantitative and qualitative tools of management and strengthen the students' understanding of the human, social, organizational, governmental, and environmental problems associated with business.

Students may choose either a traditional General Management MBA or an MBA with a concentration in Project Management.

In addition to their core MBA degree, students can earn a Master's Certificate in Management as they work toward the completion of their MBA program. Attaining this resume-building Certificate can help students continue to excel in their careers while earning a degree and without adding courses or tuition costs.

Program Length

MBA

The Master of Business Administration requires the completion of 36 credits. The degree program is typically completed in two (2) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the degree program is seven (7) years.

MBA - Project/Program Management

The Master of Business Administration - Project/Program Management requires the completion of 48 credits. The degree program is typically completed in three (3) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the degree program is eight (8) years.

Degree Requirements

The MBA Program is organized into a block of core management courses and a block of concentration courses. The management courses are designed to provide the student with an overall framework of business knowledge. They stress the basic principles, concepts, and practices associated with the overall management of any business. The courses in a concentration provide the student with both the theory and a working knowledge of that particular field.

The student must successfully complete courses totaling a minimum of 36 semester units (for the MBA) or 48 semester units (for the MBA - Project Management Concentration) in the program and complete an approved project within seven years of enrollment in the program.

The courses may all be taken through distance education. Please see the [Tuition and Fees](#) section for course fees or visit Patten's website at www.patten.edu.

Master of Business Administration

The objective of this traditional MBA program is to provide a well-structured, yet varied knowledge of the principles and practices of management. It offers the opportunity to study the role of the senior manager and to learn the strategies, tactics, and functions associated with the leadership and management of an entire enterprise, in addition to the individual functions that make up business organizations.

This program is designed to produce superior managers, provide a generalist perspective, and increase the marketability of the participants' skills and experience in today's competitive marketplace.

Program Learning Outcomes

The overall Program Learning Outcomes are for each student to be able to:

- Evaluate and apply principles from core business disciplines, including finance, marketing, operations, and strategy, to formulate innovative solutions for complex business challenges in diverse and global settings.
- Evaluate real-world business scenarios for ethical and legal considerations, and construct decision-making strategies that accomplish business objectives while prioritizing social responsibility and the common good.
- Compare and contrast business practices across different economic and cultural landscapes. Design strategies for effective leadership in diverse and cross-cultural settings.
- Apply advanced analytical and quantitative methods to real-world business data. Interpret the results to make evidence-based strategic decisions.
- Apply business research methods to create clear and persuasive business propositions and analyses.

Master of Business Administration – Project Management Concentration

Project and program managers must be able to integrate business and project goals. They must possess an overall management perspective that allows them to achieve their organization's strategic and tactical objectives. Project managers must be able to mesh their organization's business needs with human, business, and technical management systems to meet or exceed project or program objectives while maximizing customer satisfaction.

The purpose of this MBA program concentration is to provide a solid grounding in management principles and techniques, followed by a focus on project management principles and skills. This degree program imparts a rigorous education needed to develop competence in managing and leading any size project or program, as well as the overall management and operation of a business.

Program Learning Outcomes

The overall Program Learning Outcomes are for each student to be able to:

- Evaluate and apply principles from core business disciplines, including finance, marketing, operations, and strategy, to formulate innovative solutions for complex business challenges in diverse and global settings.

Master of Business Administration – Acquisition and Contract Management Concentration

(not accepting new enrollment)

The field of Acquisition and Contract Management requires: (1) a knowledge of business management principles; (2) mastery of the underlying function of an organization, such as financial management, marketing, accounting, operations management, and information systems management; and (3) the legal, regulatory and management requirements unique to the acquisition, contracting and program management fields. These requirements, interrelated with standard business practices, and the need for public visibility into the overall process, have resulted in a process different from and more complex than commercial business operations.

This MBA program concentration is designed to provide participants with an advanced education in the concepts, methodologies, and techniques necessary for the successful management of acquisition and contracting in complex organizations, and a solid grounding in management principles and techniques for the overall operation of a business organization.

Master's Degree Comprehensive Exams and Final Projects

In partial fulfillment of their degree requirements, Patten University MBA degree candidates must complete a Final Project. Patten non-MBA master's degree candidates have the option to complete a Final Project in lieu of the Comprehensive Examination.

The Comprehensive Examination requires students to rigorously review their entire course of study, while the final project requires students to combine their academic experience with their life and business experience and successfully develop and implement a new effort in a real business situation. Both the Comprehensive Examination and the project provide students with outstanding learning experiences from which to expand and apply their professional skills. The project, however, can be a more rigorous and demanding undertaking.

The Comprehensive Examination takes an average of 60 hours to complete. Patten requires that the exam be completed within 50 days of the student's receipt of the examination package. In comparison, acceptable final projects tend to take comparatively more time and commitment to complete due to the necessary planning, research, development, writing, and review process. Students have 120 days to complete the project, not including final review.

Comprehensive Exams

Students who approach their date of graduation will be contacted in advance to prepare for and schedule their Comprehensive Exam. Comprehensive Exams may consist of multiple-choice questions, essays, and multiple case studies unique to the student's program of study.

Comprehensive Exam Learning Outcomes

By completing a Comprehensive Exam in fulfillment of a Patten Master's Degree, students will be able to:

1. Demonstrate their structured knowledge of leadership, management, and/or program management principles and practices.
2. Analyze real-world scenarios, applying knowledge in skill to solve real problems commonly encountered in leadership, management, or project management.
3. Evaluate the organizational impact of multiple techniques used in leadership, management, or project management.

Final Projects

The final project, as defined by Patten, is the development, implementation, documentation, and analysis of a new business undertaking. Examples might be the development of a business plan for a new business unit, the development and implementation of a contract analysis and negotiating position, the development of a program or project plan, or the development and implementation of a new business process. Projects are limited only by the innovation and resources of individual students.

All project proposals must pass the University's review process.

Final Project Learning Outcomes

By completing a Final Project in fulfillment of a Patten Master's Degree, students will be able to:

1. Apply their structured knowledge of leadership, management, and/or program management principles and practices to a real-world business problem;
2. Demonstrate the role that research, critical analysis, and quantitative business skills play in the evolving business environment; and
3. Create a cogent, well-supported business proposal that reflects a deep understanding and awareness of today's competitive marketplace.

Project Proposal

The first step in the project approval process is the project proposal. Degree candidates must petition Laurie Tarlos, Director of Admissions/Student Achievement (laurie@patten.edu) for project approval in writing. This communication should contain a short description of the project.

The Director of Admissions/Student Achievement will forward the student's request to the Director of the School of Management, who will appoint a Faculty Advisor for the project.

Within 21 days of being notified, candidates must submit a detailed project proposal outlining the project to the Faculty Advisor. Project proposals must include a detailed explanation of the project to include:

Purpose of the Project

This element is the basis for the project and outlines what the project intends to accomplish and its business purpose.

Background of the Project

This element covers why the project is important in the short-term or long-term success of the business or government organization. What goals can be expected to be reached?

Research

What needs to be known? How will the information be obtained? What methods will be used?

Schedule

What milestones must be reached? At what milestone will the project be implemented or completed?

Results and Benefits

What specific results and benefits are anticipated? How will they be measured?

If the project is assigned as part of the student's regular business activities or will become part of a business at which the student is employed, a letter from the candidate's immediate supervisor approving the effort is required.

Projects that do not directly affect a current business activity may require a defense by the student as to the importance of the project as related to the education of the student or the body of knowledge of the project's subject area.

Project Guidelines

Although all projects are unique, they will include some required elements. Each project will be designed in conjunction with the faculty advisor and must meet the approval of the evaluation committee.

A sample outline for the project report is furnished below. Also, the student is referred to the "Presenting Insights and Findings: Written and Oral Reports" in the BUS 653 Business Research Methods. An additional source is the "Research Project Guide" on the Oxford University website at:

https://fdslive.oup.com/www.oup.com/orc/resources/xedition/brymanbrm4exe/student/project_guide/index.htm

Project Report (Sample Outline)

The body of the project report should be between 30 and 50 pages in length. A sample outline is presented below:

- Title Page
- Executive Summary
- Table of Contents
- List of Figures
- List of Tables
- Introduction
 - Purpose of the project
 - Describe the problem
 - Why is this analysis appropriate?
 - Importance of the problem
 - The scope of the review
 - How will the results of the review be applied
 - Identify the research questions you hope to answer
- Methodology
 - Identify the method used to identify and locate sources
 - Explain the rationale used for selecting the sources to analyze
 - Explain the procedures to be used for analyzing the sources
 - Identify the criteria for evaluating the information found
- Analysis and Discussion (general points to consider)
 - Present evidence and ideas from sources
 - Concepts are organized by subtopics
 - Sources are grouped by concepts instead of individual entities
 - Grouping may be related to research questions
 - Validity of sources is stated to support your ultimate answers to your questions
 - Cite each of your statements by placing the number(s) identifying the reference(s) that support your statement
- Conclusions and Recommendations
 - Identify and synthesize findings

- Systematically answer your research questions
- Provide recommendations for:
 - Future research
 - Applications
 - Policies and procedures
 - Program revisions
 - Other warranted situations
- References
 - List each of your references using APA format (<https://apastyle.apa.org/>)
 - Number each of your references so you can cite your evidence in the Analysis and Discussion section.

Project Schedule

Like all business endeavors, the project must have a realistic schedule that also dovetails with the 120-day project schedule. Projects needing greater time periods may be too extensive for the educational goals of the student and the University.

The schedule, with major milestones, must be submitted to the faculty advisor within 21 days of the project's approval. Each part of the project – each milestone, each project chapter, or each section – must be submitted to the faculty advisor for approval as they are completed. Students may, of course, continue project work while the advisor is reviewing the project submissions. Each project section will not be considered finished until the section has been approved by the faculty advisor.

It may be that there will be faculty changes or suggestions that will be returned to students for evaluation and revision. Where appropriate, these changes must be instituted before the section is considered complete. All project sections must be completed before the project can be considered completed and credit earned. Following successful completion of the project, the student may petition for the awarding of the degree.

The difficulty of a project often leads to students underestimating the amount of time needed to complete it. In certain instances, students may petition for additional time to complete the project. Such requests are not granted automatically, and students must prove that the additional time is needed due to business situations, rather than a lack of planning or underestimation of resources by the student.

The goal of the University is not to force students to conform to a specific schedule for completion, but rather to avoid projects stretching out to unmanageable lengths. That is why the University forces a realistic evaluation of projects before approval.

Submission Of Copies

Following completion of the project, the student is required to submit the project in a professional format. The final document will be archived in the University's records. The University reserves the right to cite and quote from the final document.

Faculty Advisor

Since all projects are unique, much project design and structure will be developed with the faculty advisor. Students will be able to communicate with their advisor by email, telephone, or video call.

Questions

Any questions concerning the final project should be addressed to the Director of the School of Management (kwade@patten.edu).

School of Management Master's Certificate Programs

For students who do not wish to enroll in a Patten School of Management degree program, the option of a Master's Certificate Program is available.

Certificate programs are available in the areas of Project/Program Management and Management. To receive a certificate, a student must be admitted to the program, successfully complete the required courses, and all course examinations. An outline of the Certificate Programs may be found below.

Instructional Modality

The University's graduate programs feature an online, self-paced modality, providing a high-quality and convenient method of pursuing a graduate degree or certificate program. These distance education programs are designed for the adult who has family, job, and community responsibilities.

Courses can start each month, and are offered in 16-week terms. Students engage with the material and interact with faculty via the University's learning management system. Student work is typically graded within 72 hours of submission, and results are available immediately within the Learning Management System.

Course material is structured progressively, such that learning moves from the simple to the more complex, with review exercises and low-stakes assessments offered frequently to ensure that students can easily absorb the material. Additionally, several case studies and exercises are assigned in each course, illustrating actual, real-world problems. The major objectives of the cases and exercises are to encourage the student to engage in independent thinking, apply their learning to real-world situations, and assist in developing skills in using the knowledge imparted in the course.

The Certificate Programs

Certificate in Project/Program Management

This program provides knowledge of the organizational, human, business, and technical processes for successfully managing projects and programs.

Certificate in Management

This program provides a structured, yet varied knowledge of the practice and principles of business management.

Program Learning Outcomes

The Program Learning Outcomes of the certificate programs are to:

- Demonstrate a structured knowledge of business management, project management, or financial management principles and practices.
- Show the ability to use the basic functional elements necessary for select business operations.
- Demonstrate a facility in critical analysis, communication, and quantitative and synthesizing skills.
- Demonstrate an increase in skills and experience for today's competitive marketplace.

Program Length

The certificate programs require the completion of 18 credits. Certificate programs are typically completed in two (2) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing a Master's certificate program is four (4) years.

Certificate Requirements

Master's Certificate in Project/Program Management
◆ PMP 625 - Program Management ◆ PMP 627 - Managing Projects ◆ PMP 628 - Mastering IT Project Management ◆ PMP 629 - Technical Program Management** ◆ PMP 632 - Contracting and Procurement for Project Managers ◆ PMP 636 - Negotiation and Conflict Resolution ◆ PMP 647 - Earned Value Management Systems ◆ PMP 671 - Building and Managing Project Teams ◆ PMP 679 - Risk Analysis and Management ◆ PMP 687 - Project Quality Management – Successful completion of six courses (including PMP 625, 627, or 628, and PMP 671) is required for the issuance of the Master's Certificate. **PMP 629 cannot be taken if a student takes PMP 625

Master's Certificate in Management

- ◆ BUS 602 - Essentials of Management
- ◆ SCM 605 - Supply Management
- ◆ BUS 606 - Marketing
- ◆ BUS 607 - Communications and Ethics
- ◆ BUS 610 - Operations Management
- ◆ PMP 627 - Managing Projects
- ◆ BUS 653 - Business Research Methods
- ◆ BUS 657 - Management Accounting and Control
- ◆ BUS 659 - Organizational Behavior and Human Resources
- ◆ BUS 661 - Financial Management
- ◆ BUS 663 - Management Economics
- ◆ BUS 695 - Management Information Systems

– Successful completion of six courses (including Courses 602 and 657) is required for the issuance of the Master's Certificate.

Academic Calendar

Patten University utilizes a flexible, overlapping term-based structure in its School of Management programs. Students may enroll in a term at the beginning of each month. Each term is 16 weeks in length, although students have access to course materials and faculty during the week after the course ends. Students may enroll in one to four courses per term (3 to 12 semester credits). Students have access to all course materials and faculty during the week after the term ends.

Term	Term Start Date	Add/Drop Deadline	Last Date to withdraw with a W	Term End Date
January 2025	1/1/2025	1/8/2025	3/24/2025	4/22/2025
February 2025	2/1/2025	2/8/2025	4/25/2025	5/23/2025
March 2025	3/1/2025	3/8/2025	5/23/2025	6/20/2025
April 2025	4/1/2025	4/8/2025	6/23/2025	7/21/2025
May 2025	5/1/2025	5/8/2025	7/23/2025	8/20/2025
June 2025	6/1/2025	6/8/2025	8/23/2025	9/20/2025
July 2025	7/1/2025	7/8/2025	9/22/2025	10/20/2025
August 2025	8/1/2025	8/8/2025	10/23/2025	11/20/2025
September 2025	9/1/2025	9/8/2025	11/23/2025	12/21/2025
October 2025	10/1/2025	10/8/2025	12/23/2025	1/20/2026
November 2025	11/1/2025	11/8/2025	1/23/2026	2/20/2026
December 2025	12/1/2025	12/8/2025	2/22/2026	3/22/2026

Official Holidays

All University offices are closed on:

- Martin Luther King Jr. Day
- President's Day
- Memorial Day
- Juneteenth
- Independence Day
- Labor Day
- Thanksgiving Day and the Friday following Thanksgiving
- Christmas Eve through the first business day after New Year's Day.

Students still have access to the University Learning Management System (LMS) and their coursework during holidays.

Admissions

Statement of Non-Discrimination

Patten University admits students of any race, color, religion, sex, age, national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to the students of the University. It does not discriminate on the basis of race, color, religion, sex, age, handicap, disability, marital status, national and ethnic origin, nor any other characteristic protected under applicable federal, state, or local law in administration of its educational policies, admission policies, and other school administered programs.

Admission Requirements

All certificate or degree applicants to the School of Management must complete an application at www.patten.edu. Patten University admits students to the School of Management on a rolling basis, and eligible students may start classes at the beginning of any of the terms offered throughout the year.

Certificate Requirements

Master's Certificates provide concentrated training in focused areas based on Patten's graduate coursework. To be admitted, students must hold a Bachelor's degree from an institution accredited by an institutional accrediting agency recognized by the United States Department of Education, or its international equivalent. Three years of work experience is recommended, but not required.

Degree Requirements

To be admitted into a Master's degree program, students must hold a Bachelor's degree from an institution accredited by an institutional accrediting agency recognized by the United States Department of Education, or its international equivalent. Three years of work experience is recommended, but not required.

Technology Requirements

To fulfill the requirements of the Patten course curriculum, all students are required to have access to an internet-enabled device with a web browser, an email account, a word-processing program, and a spreadsheet program. Microsoft Office or Google Suite is sufficient.

Official Transcripts

Official transcripts must be sent directly from colleges or universities. Electronically-issued transcripts and other documentation can be sent to admissions@patten.edu.

Paper-based transcripts and records should be sent to:

Patten University - Transcript Office
548 Market St PMB 98598
San Francisco, CA 94104-5401

Foreign Educational Credentials

An applicant who has completed university-level courses in a foreign country must have their educational credentials evaluated and sent to Patten University. The evaluation must also include the original transcript. If the transcript is not in English, a translation must be provided. Three reputable foreign credential evaluation service providers are suggested below.

World Education Services (WES – <http://www.wes.org/>)
Educational Credentials Evaluators, Inc. (ECE – <http://www.ece.org/>)
International Education Research Foundation (IERF – <http://www.ierf.org/>)

Note that while Patten University accepts students from foreign countries, it does not currently provide visa services. It provides enrollment verification services upon request at no charge.

Proof of English Proficiency

Patten University courses are offered in English. Proof of English proficiency from students for whom English is not their native language is required. Students who have earned at least 30 credits from an internationally recognized college or university in which English was the language of instruction may have this requirement waived. In this instance, an average grade of C or higher is required for undergraduate admissions, while an average grade of B or higher is required for graduate admissions.

English Language Proficiency Test	Minimum Scores	
TOEFL iBT - https://www.ets.org/toefl.html	Undergraduate:	61
	Master's:	71
<u>How to Submit:</u> Select Patten University or Designated Institution Code 4620		
IELTS - https://www.ielts.org	Undergraduate:	6.0
	Master's:	6.5
<u>How to Submit:</u> Account Name: Patten University Address: Admissions and Registrar 548 Market St PMB 98598 San Francisco, CA 94104 Score Delivery: E-Delivery		

English Language Proficiency Test	Minimum Scores	
Duolingo - https://englishtest.duolingo.com/applicants	Undergraduate:	95
	Master's:	100
<u>How to Submit:</u> See: https://englishtest.duolingo.com/applicants		
Pearson Test of English (PTE) - https://www.pearsonpte.com/	Undergraduate:	44
	Master's:	50
<u>How to Submit:</u> 1. Select Patten University as an official test score recipient from PTE's database of institutions. OR 2. Send your Score Report Code to admissions@patten.edu		

Admissions Policies

Application Instructions for Admission

The application may be found on the Patten University website at www.patten.edu.

Accommodations for Students with Disabilities

Applicants and prospective or current students with disabilities who require adjustments and/or auxiliary aids throughout the admissions process, and/or throughout their studies, should contact the Admissions Department (admissions@patten.edu) for assistance. It is the student's responsibility to request accommodations and to provide current and supporting documentation from a medical doctor or clinician explaining the nature and limitations of their disability. The institution will work with the person to make reasonable accommodations and adjustments to enable him/her to fully participate in the admissions process and educational programs.

Transfer Credit

Students may receive transfer credits for courses completed at other accredited educational institutions. Approval for specific courses will be determined individually, based on the breadth, scope, organization, and quality of the coursework in relation to the courses required by Patten University. Applicants seeking such evaluations must provide official transcripts from the transferring institution. The transfer credit is solely at the discretion of Patten, as course content and instructional quality can vary between institutions.

Patten will consider transfer credit earned at institutions of higher education outside of the United States that are recognized by the Ministry of Education or equivalent authorizing agency, provided that such credits have been earned through university-level coursework and are presented with equivalent grades of "A," "B," or "C." Such credit must be evaluated by an international transcript evaluation service unless they are earned at an institution that is accredited by a U.S. Department of

Education or CHEA-recognized accreditor. The Office of Admissions and/or the Office of the Registrar will make the final determination of the award and applicability of any international credit. A certified course-by-course evaluation from an organization recognized by Patten is required for all post-secondary level studies completed outside of the United States at institutions that are not accredited, or if the transcript is not in English. GPA and degree equivalencies must be included with your course-by-course evaluation. All fees charged by translators or external evaluators must be paid by the student. The recognized transcript evaluation organizations are:

- [Educational Credential Evaluators](#) (ECE)
- [World Education Services](#) (WES)
- [SpanTran: The Evaluation Company](#)
- [International Education Evaluations, LLC](#) (IEE)
- Or any company recognized by the [National Association of Credential Evaluation Services](#) (NACES)

Only grades of B or higher will be considered for graduate credit. Transfer credits that are recognized and accepted by Patten University are not factored into the calculation of the student's grade point average.

No more than 50% of the credits required for a Master's degree or a Graduate certificate program may be fulfilled via transfer credit.

If an applicant's request for graduate-level transfer credit is denied, they may appeal the decision to the Patten Chief Academic Officer (nbreitling@patten.edu). The appeal should include the name of the Patten course, the name of the institution, the previous course taken, and a detailed explanation, with supporting material, of why the applicant believes the course taken at another institution is similar in content to the Patten course.

Experiential Credit/Credit for Prior Learning

Patten does not accept credit for prior learning or experiential credit. Credit must come from a recognized, accredited institution or from a provider with whom Patten University has an articulation agreement.

First Term Registration

A newly accepted student at Patten must enroll in their first term within 90 days of acceptance. A student is subject to unenrollment from the University if they do not meet this requirement.

Provisional Admission and Term Registration Policy

Applicants who are unable to provide final official documents during the application process may be granted provisional admission. Under this status, applicants are permitted to register for one term of coursework while completing their application requirements. Enrollment in subsequent terms will not be allowed until all missing documentation has been submitted and verified.

Student Verification

Students are required to submit a government-issued photo ID as part of their application. The photo ID will only be used to verify identity throughout the program. All students are issued a student ID number.

Notice Regarding Transferability of Credits Earned at Patten University

The transferability of credits you earn at Patten University is at the complete discretion of an institution to which you may seek to transfer. Acceptance or recognition of the certificate or degree you earn is also at the complete discretion of the institution to which you may seek to transfer. If the credits, certificate or degree that you earn at Patten are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at Patten will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Patten University to determine if your credits, certificate or degree will transfer or be recognized.

Academic Policies

Academic Load

School of Management students may take between one and four courses per term (3 to 12 semester credits). A full-time course load is considered three or more courses (9+ semester credits) per term; a part-time course load is considered two or fewer courses (6 or fewer semester credits) per term. Because of the significant workload associated with graduate-level courses, students should consult with the Director of Admissions and Student Achievement *before* registering for more than three courses in a term.

Each term is 16 weeks in length. Students have access to all course materials and faculty during the week after the term ends.

Credit Hour Definition

Patten University utilizes the commonly accepted definition of semester credits (also referred to as “units”) to measure its academic courses and programs. One semester credit is the equivalent of 15 hours of academic engagement and 30 hours of preparation. Accordingly, each 3-unit course offered by Patten University is normally achieved via 45 hours of academic engagement and 90 hours of preparation.

Grading Policy

The course grade is the weighted average of the individual course module assignments, quizzes, midterm examinations, projects, final papers, and/or final examinations as determined by the course syllabus. In most courses, the lesson examinations (which may include a project) are worth approximately 80%, while the final examination is worth approximately 20%. Patten calculates grades numerically, which are then converted to final letter grades. Students must receive a minimum grade of 80% for each course.

Grades	Quality Points
A (90-100%)	A = 4.0
B (80-89%)	B = 3.0
F (Below 80%)	F = 0.0

Students may view their grades at any time by logging into the Learning Management System.

Grade of “W” (Withdraw)

Graduate students may be issued a grade of W (Withdraw) if they withdraw by midnight of the last day of Week 12 of the term (see [Academic Calendar](#)). The grade of W does not factor into the calculation of a student’s GPA.

Grade of "F/I" (Fail/Incomplete)

Graduate students who withdraw after the Week 12 deadline will receive the grade of F/I (Fail/Incomplete). The grade of F/I is worth zero quality points and does factor into a student's GPA.

Grade of "I" (Incomplete)

A grade of I (Incomplete) may be granted, under rare circumstances, only if a student has attempted at least 60% of points for graded coursework, can provide a serious and compelling reason for an extension of the regular term length, can mathematically pass the course with a satisfactory grade on any outstanding assignment(s), and is not on academic probation.

Students must request the "Incomplete" from the course instructor and Director of Admissions and Student Achievement prior to attempting the final summative assignment of the course, who will jointly determine if an incomplete grade is warranted. Students may be allowed up to 21 days from the end of the term to resolve an incomplete, after which time the grade will be calculated based on the total points earned. A student is allowed only one attempt on a final project or final exam within the incomplete period.

Repeating Courses

A student may choose to repeat a course if they have received a non-passing grade or if it is necessary to raise their GPA to meet the University's Satisfactory Academic Progress policy. When a student repeats a course and receives a higher grade, the higher of the grades will be used for calculating the GPA. Repeated courses are subject to tuition as calculated at the per-credit rate for the student's program, as detailed in the Enrollment Agreement.

Registration and Adding/Dropping of Courses

School of Management students may self-register in Patten's Learning Management System, or may be registered by the institution's Registrar. Students are free to add and drop classes prior to the seventh day of the term (see [Academic Calendar](#)).

To drop a class after this deadline, or to withdraw from the University, students must contact the Registrar at registrar@patten.edu.

Administrative Withdrawal and Attendance Policies

The institution may administratively withdraw a School of Management student from a course from the beginning of week two through the end of week twelve if the student shows no submitted assignments in the course for 30 consecutive calendar days. Students who are administratively withdrawn may appeal within 14 days of their withdrawal. Appeals should be directed to appeals@patten.edu. Upon approval, students will be reinstated in the course and must demonstrate continued progress. Students who are administratively withdrawn shall be subject to the School of Management [Tuition Refund Policy](#).

Program Transfer

Currently enrolled students who wish to transfer into another program may contact the Registrar for assistance. Transferring into another program may require the submission of additional information or completion of additional requirements. It may result in the inability to apply credits that have already been earned to the new program. Transfer credit that has already been awarded may be affected by a program transfer.

Requirements for Graduation

Degree Programs

To receive the degree, the student must meet the following requirements:

- ◆ Successfully complete the courses required for the degree program within seven (7) years with a GPA of 3.0 or higher for 36 credit programs and within eight (8) years with a GPA of 3.0 or higher for 48 credit programs.
- ◆ Successfully complete a written [Comprehensive Examination or Final Project](#).
 - Graduate students pursuing a [Master of Project Management](#) must complete either a [Comprehensive Examination or a university-approved Final Project](#).
 - Graduate students pursuing any [Master of Business Administration](#) degree must complete a [Final Project](#).
- ◆ Clear any past-due balances.

Certificate Programs

To receive the certificate, the student must successfully complete the courses required for the certificate program within a maximum time frame of four (4) years with a GPA of 3.0 or higher.

Satisfactory Academic Progress Policy

For students in the School of Management to meet satisfactory academic progress (SAP), they must maintain a minimum cumulative grade point average of 3.0. Students who fail to meet satisfactory academic progress will be placed on academic probation.

School of Management students must complete all registered courses within the standard 16-week term. Students who do not complete registered courses within this term will be subject to a grade of W, F/I, or I, depending on their date of withdrawal from the course and the institution's policy on [Incomplete grades](#).

Academic Probation

If a student receives a failing grade (less than 80%) in two courses within the same term, or if they fail to maintain a minimum cumulative grade point average of 3.0, they will be placed on academic probation. The student may then take only one additional course while retaking the failed courses in

their subsequent term. If a student does not clear the academic probation within one calendar year, they will be subject to dismissal from Patten.

Academic Progress and Maximum Timeframe

Students must show regular progress toward completion of their degree or certificate program. Regular progress is achieved by successfully completing at least two courses per 12 months of enrollment. Students enrolled in a 36-credit degree program must complete their program within seven (7) years. Students enrolled in a 48-credit graduate degree program must complete their program within eight (8) years. Students enrolled in certificate programs must complete their program within four (4) years. Students not showing any academic progress for a period of 12 months are subject to dismissal from the University.

Dismissal & Appeal

Students are subject to dismissal from the University if they do not resolve their academic probation status within one calendar year, do not complete at least two courses per 12 months of enrollment, or do not complete their program within the maximum timeframe designated for their program.

Students are eligible to appeal their dismissal with documentation of mitigating circumstances. Appeals are considered on a case-by-case basis by the President.

Leave of Absence

Students may receive a leave of absence by contacting the Director of Admissions and Student Achievement and stating the reason for their request and the expected date of return. All leaves of absence must be approved by the University in advance. Students are exempt from the institution's Unsatisfactory Progress policy while on Leave of Absence.

Appeals of Dismissal

Patten understands that its students are working adults with competing priorities and responsibilities. Patten wants its students to succeed and to graduate, and will work to make reasonable accommodations for each student's situation. Students are eligible to appeal their dismissal with documentation of mitigating circumstances. Appeals are considered on a case-by-case basis by the Chief Academic Officer.

If a student has been dismissed from Patten University based on a violation of its Satisfactory Academic Progress policies, the student may petition the University for readmission. Any decision to dismiss a student may be appealed to the Chief Academic Officer, Patten University, 2433 Coolidge Ave, Oakland, CA 94601, or by email to nbreitling@patten.edu.

Proctoring

Patten University requires proctored quizzes and examinations at regular intervals throughout its programs. Proctors may not be a past or present family member, a work subordinate, a

current/previous student of Patten University, or related to a current/previous student of Patten University.

Before taking a proctored quiz or examination, both students and proctors electronically attest that they do not have a relationship that would call into question the proctor's impartiality. The proctor must additionally electronically submit a Proctor Attestation Form, including a copy of both their and the student's government-issued photo identification.

Statement on Academic Integrity

Patten expects its students to act with honesty and integrity in completing their course and program work. Distance learning requires a high level of self-discipline with regard to academic integrity. All work submitted by a student must represent the original work of that student. Students found to have cheated or committed plagiarism may be suspended or dismissed from the University.

Student Code of Conduct and Academic Integrity Policy

Students at Patten are expected to adhere to high standards of ethics in the pursuit of their education. As a condition of enrollment, students agree to:

- ◆ Conduct themselves with professionalism, courtesy, and respect for others in all dealings with the Patten staff, faculty, and other students.
- ◆ Observe the institutional policies and rules on submitting work, taking examinations, and conducting research.
- ◆ Never turn in work that is not their own, or present another person's ideas as their own.
- ◆ Never ask for, receive, or give unauthorized help on graded assignments and examinations.
- ◆ Never use short excerpts or quotations from books, articles, or other publications without citing the publication and author.
- ◆ Never divulge the content of or answers to examinations to fellow students.
- ◆ Adhere to all required proctoring requirements.
- ◆ Never improperly use, destroy, forge, or alter Patten's documents, transcripts, or other records.
- ◆ Never divulge their online username or password.
- ◆ Always report any violations of this Code of Conduct to the Chief Academic Officer (nbreitling@patten.edu), and report any evidence of cheating, plagiarism, or improper conduct on the part of any student of Patten when they have direct knowledge of these activities.

Student Records and Privacy

In compliance with California Education Code Sec. 94900 and 5, California Code of Regulations Sec. 71920, Patten maintains permanent records, including transcripts, for each student. Students who wish for an official transcript may contact the Registrar at registrar@patten.edu. Official transcripts require a processing fee.

Patten University protects the privacy rights of its students. Student education records are held confidential in accordance with the Family Educational Rights and Privacy Act (FERPA) and university best practices. Written student consent is required for access and release of student records information. Students may inspect and review their educational records upon written request to the Registrar at registrar@patten.edu. Should a student find, upon review, records that are inaccurate or misleading, the student may request that errors be corrected. If a difference of opinion exists regarding the existence of errors, a student may ask that a meeting be held to resolve the matter. Each student's file will contain the student's records, including a transcript of grades earned. Transcripts will only be released to the student upon receipt of a written request bearing the student's signature or digital equivalent. Per CA Civil Code §1788.93, the University will not refuse to provide a transcript because the student owes a debt.

Student Complaints and Grievances

If any student has a complaint, grievance, or dispute with the University's procedures, policies, or decisions, the student has the right to seek a satisfactory resolution.

First, the student should discuss the matter directly with the instructor or a Patten staff member. The instructor or staff member will attempt to resolve the matter professionally and in good faith. If the matter cannot be settled at this level, the second step is for the student to file a written complaint to Patten Student Services, 2433 Coolidge Ave, Oakland, CA 94601, or at studentservices@patten.edu. The complaint should include a description of the specific allegations and the desired remedy, accompanied by any necessary documentation. Student Services can, if necessary, submit the complaint to the University President for final resolution. Student Services or the President will issue a formal reply to the student within ten working days.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form, which can be obtained on the Bureau's website (www.bppe.ca.gov).

Additionally, a complaint can be filed with Patten's accrediting agency, the Distance Education Accrediting Commission (DEAC), through the DEAC website (<http://www.deac.org/Student-Center/Complaint-Process.aspx>) or 1101 17th Street NW, Suite 808, Washington, DC 20036.

Students who are residents of Georgia may file a complaint with the GNPEC Office, 2082 East Exchange Place, Suite 220, Tucker, GA 30084-5305. Ph: (707) 414-3300
<https://gnpec.georgia.gov/student-resources/complaints-against-institution>

For students residing outside of California and Georgia, there may be additional resources for filing grievances/complaints. Please see the State Higher Education Executive Officers Association website: http://www.shceo.org/sheeo_surveys/.

Tuition and Fees

Students who enroll at Patten University's School of Management assume responsibility for the payment of all tuition and fees in accordance with the policies set forth below.

Degree and Certificate Tuition

For all certificate and degree programs, students are charged tuition on a per-term basis. Each term is 16 weeks in length. Standard tuition is \$330 per credit hour (\$990 per course).

Total estimated charges below are based on on-time completion of the program. Actual costs may vary due to transfer credit or repeated courses.

Tuition must be paid by the end of Week 1, or students may be withdrawn from their coursework.

Master of Business Administration Degree Program
(36 credits, 12 courses)

Tuition: \$330 per credit hour or \$990 per course

Total estimated charges for the program for domestic students completing on time: \$11,880

Master of Business Administration with
Concentration in Project Management Degree
Program (48 credits, 16 courses)

Tuition: \$330 per credit hour or \$990 per course

Total estimated charges for the program for domestic students completing on time: \$15,840

Master of Project Management
(36 credits, 12 courses)

Tuition: \$330 per credit hour or \$990 per course

Total estimated charges for the program for domestic students completing on time: \$11,880

Master's Certificate Programs
(18 credits, 6 courses)

- ◆ Project/Program Management
- ◆ Management

Tuition: \$330 per credit hour or \$990 per course

Total estimated charges for the program for domestic students completing on time: \$5,940

Active Duty Military Students

In the School of Management, Patten offers a reduced graduate tuition rate of \$200 per credit (\$600 per course) to active duty military graduate students and their dependents. To request the Active Duty tuition discount, students must contact the Registrar at registrar@patten.edu.

International Student Tuition

The tuition for international graduate students is \$370 per credit (\$1,110 per course).

Withdrawals and Refunds

After the add/drop period of 7 days from the first day of the term, during which the student may [cancel their enrollment agreement](#) or adjust the number of courses for which they are registered, the student may withdraw from the University and receive a pro rata refund if they have completed 60% or less of the term.

For purposes of determining a refund, a student shall be considered to have withdrawn from an educational program when he or she withdraws or is deemed withdrawn in accordance with the withdrawal policy stated in this institution's catalog. Students who withdraw or are administratively withdrawn will receive a refund of tuition according to the following table:

Week of Withdrawal	Tuition Refund	Week of Withdrawal	Tuition Refund
Week 1	100%	Week 9	50%
Week 2	100%	Week 10	43%
Week 3	88%	Week 11	0%
Week 4	81%	Week 12	0%
Week 5	75%	Week 13	0%
Week 6	69%	Week 14	0%
Week 7	62%	Week 15	0%
Week 8	56%	Week 16	0%

For example, if a student in the School of Management is registered for 6 units and paid \$1,980, withdraws from the university during their fifth week of the term, the student would receive a refund of \$1,485:

\$1,980.00	x	75% (Student withdraws during Week 5 of the term)	=	\$1,485.00
------------	---	---	---	------------

If the school cancels or discontinues a course or education program, the school will make a full refund of all charges.

All refunds will be paid within 30 days of cancellation or withdrawal.

If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid program funds. However, Patten does not participate in federal and state financial aid programs.

Veterans

Note: Patten University is not currently approved for the enrollment of new students who wish to apply their benefits under the provisions of Section 3672, Title 38, U.S. Code ("VA Benefits"). The information below is provided for currently enrolled students, who are permitted to use their VA Benefits through the duration of their program.

Students must first be accepted as a Patten degree or certificate candidate before the University can certify course enrollments. Students using Chapter 30, Montgomery GI benefits must pay tuition upon registration, after which the VA office reimburses the student directly by check or direct deposit. Students using Chapter 33, Post 9/11 benefits who have 100% benefits are not required to pay any tuition upon registration since the VA reimburses Patten directly for the tuition. However, if the student has less than 100% benefits, they are responsible for paying the remaining percentage upon registration.

Contact the Department of Veterans Affairs online at www.gibill.va.gov (or toll-free at 1-888-442-4551) for eligibility and to request any necessary forms.

The following table equates Patten graduate semester credits with VA benefit levels:

6 semester hours (2 courses)	Full-time
3 semester hours (1 course)	Half-time

Student's Right to Cancel

Students have the right to cancel and obtain a refund of charges paid through attendance at the first class session, or the seventh day after enrollment, whichever is later.

If a student cancels their enrollment agreement, they may obtain a refund of 100% of charges paid, if notice of cancellation is made prior to midnight of the seventh day of the term. Cancellation is effective on the date the written notice is sent to the institution.

A cancellation may be effectuated by the student's written notice or by the student's conduct, including, but not necessarily limited to, a student's lack of attendance. Students wishing to cancel their enrollment agreement must be made in writing through email, mail, or fax to: Patten University, Attn: Registrar, 548 Market St PMB 98598, San Francisco, CA 94104-5401; Phone: (626) 966-4576, ext. 1003; Fax: (626) 915-1709; E-mail: registrar@patten.edu.

After the seventh day of enrollment of the term, a student may withdraw for a partial refund. See [Withdrawals and Refunds](#). All refunds will be paid within 30 days of cancellation.

Student Loans

Patten University does not offer student loans and does not participate in federal or state student financial aid programs. If a student obtains a loan to pay for an education program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund.

If the student is eligible for a loan guaranteed by the federal or state government and the student defaults on the loan, both of the following may occur:

- ◆ The federal or state government or a loan guarantee agency may take action against the student, including apply any income tax refund to which the person is entitled to reduce the balance owed on the loan.
- ◆ The student may not be eligible for any other federal student aid at another institution or other government assistance until the loan is paid.

If the student has received federal student financial aid funds, the student is entitled to a refund of the monies not paid from federal student financial aid program funds. Patten University does not participate in federal or state student aid programs.

Student Tuition Recovery Fund

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school.

Questions regarding the STRF may be directed to:

The Bureau for Private Postsecondary Education
1747 North Market Blvd., Suite 225 Sacramento, CA 95834
(916) 574-8900 or (888) 370-7589

To be eligible for STRF, you must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

- ◆ The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
- ◆ You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
- ◆ You were enrolled at an institution or a location of an institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before the closure.
- ◆ The institution has been ordered to pay a refund by the Bureau but has failed to do so.
- ◆ The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
- ◆ You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
- ◆ You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number of a taxpayer identification number.

Course Descriptions

Courses designated with the (§) symbol are in teach-out and no longer available for new enrollment.

ACC 601 - Federal Government Contracting (§)

Semester Units: 3

Prerequisite: None

This course is the most complete, thoroughly documented course in Government contracts available to prime contractors, subcontractors, and Government agencies. It covers in one accelerated program all aspects of Government contracts and subcontracts and related management problems. The material is covered in-depth from both the seller's and buyer's viewpoint and is completely current. The course is based on the philosophy that everyone in responsible positions in the Government contract industry must have an appreciation of the entire process to properly perform their functions even though they may be responsible for only a part of the total. Since the course covers the marketing, financial, legal, administrative, and management aspects of Government contracting, any person connected with any area of Government contracts can benefit from this course. The course is in accord with all current regulations, directives and practices. In addition to the standard acquisition procedures applicable to prime contractors, subcontractors and Government agencies, it covers the unique practices of the Department of Defense and each of the Federal civil agencies.

BUS 602 - Essentials of Management

Semester Units: 3

Prerequisite: None. Required to be taken in the first term for all students in Master of Business Administration, Master of Project Management, and Master of Leadership and Management programs.

A demand for a new kind of manager has come to the forefront because business organizations are being challenged more than ever before to develop new resources and markets in a global economy. Whether a front line supervisor or the top executive of an enterprise, the functions of a manager are essentially the same. The manager must be able to make decisions and communicate these decisions to his organization. In order to do this, they must have the knowledge and ability to use today's most effective management techniques in a new and exciting era of technological change.

This course is designed to present the operational theory of management and furnish a framework of management organization. It is designed around the management functions of planning, organizing, staffing, directing and controlling. The objective of the course is to provide the student with a well-structured and varied knowledge of management disciplines.

The course covers: Management in a Global Environment – Managing Work and Organizations – Managing People in Organizations – Managing Production and Operations.

ACC 603 - Government Contract Law (§)

Semester Units: 3

Prerequisite: None

The course deals comprehensively with the purpose, interpretation, applicability and legal ramifications of the clauses, statutes, executive orders, and regulations applicable to Government prime contracts and subcontracts. The major decisions of the Boards of Contract Appeals, the Comptroller General, and the U.S. Court of Federal Claims are examined. The rights and responsibilities of the Government, prime contractor and subcontractor are explained. The specific problems of the prime and subcontractor relationship are covered. This course is specifically designed to provide information and reference material for contract managers, subcontract managers, in-house attorneys, and private counsel who are responsible for the negotiation, analysis and implementation of the terms and conditions of Government prime contracts and subcontracts. Its major emphasis is on how to keep out of legal problems, not what to do after they arise. Therefore, its primary emphasis is on

"preventive" contract law rather than the disputes and appeals process, and other legal remedies, although these are also adequately covered.

SCM 605 - Supply Management

Semester Units: 3

Prerequisite: None

Fifty percent or more of an organization's funds may be expended in purchases of material and services through purchase orders and subcontracts. The success of a firm depends greatly on the effective management of its purchasing and supply management function. In most leading firms today the purchasing or procurement function has expanded to become supply management.

This course provides a practical framework for how firms manage the enterprise-wide functions of purchasing and supply in today's business environment with an increased focus on supply chain issues. The course covers the conduct and management of the purchasing and supply management function – how that function interacts with the other principal business functions, including product development, marketing, operations and finance – the conduct of the acquisition process, including the determination of requirements, supplier qualification and selection – and the management of supplier relations and performance.

BUS 606 - Marketing

Semester Units: 3

Prerequisite/Corequisite: BUS 602

The marketing function is the keystone of a well managed company. Strategically, it is concerned with identifying the customer and the products and services which the customer requires. At the operation level, marketing management identifies specific customer needs and the types of products required to fill those needs. This course is designed to develop an understanding of how to build an integrated marketing effort in view of the forces affecting marketing activity, the customer, the trade, competition, and government regulations.

This course covers marketing strategy – marketing information – customer analysis and buyer behavior – market segmentation – market research – product development – marketing channels and logistics of distribution – pricing – direct selling – advertising and promotion – product policy and strategy – and global marketing. Continual emphasis is placed on shaping these elements into a complete, integrated, responsive marketing program. The course deals with the development and implementation of plans, strategies and tactics which will best serve the organization and the customer in a competitive environment.

BUS 607 - Communication and Ethics

Semester Units: 3

Prerequisite/Corequisite: BUS 602

This is a three-part course. The first part covers all aspects of business communication. The second and third parts concentrate on business ethics.

Communication in business consists of different skill sets. The ability to communicate is essential to success in today's business environment. This part of the course is organized around the traditional content of a business communications course, including written and oral communication, global and multicultural issues, legal and ethical situations, and technology in communication.

The ethics part of the course presents a comprehensive review of current ethical issues from a global perspective of ethics. The course highlights both the positive and negative consequences of ethical behavior. The primary focus is to prevent potential ethical dilemmas that decision-makers may face in a number of different business areas.

BUS 608 - Law and Contracts

Semester Units: 3
Prerequisite/Corequisite: BUS 602

Managers must have an understanding of the legal environment in which business enterprises must operate. This course stresses those aspects of the law that are essential to the decision making process and the operation of a business. The basis of constitutional law and the operation of the legal system are explained. The difference between civil and criminal law and the methods of resolving disputes are covered. A major emphasis is placed on contract law both in private transactions employing the Uniform Commercial Code, and in federal, state, and local contracts which are subject to the various statutes, regulations and procedures governing public agencies.

BUS 609 - International Business Operations (§)

Semester Units: 3
Prerequisite/Corequisite: BUS 602

This is a multi-disciplinary course whose objectives are to enable the student to study the development and operation of the multinational firm – to become familiar with the special business and legal problems associated with establishing and managing offshore operations and engaging in international trade – to explore the relationships between business and government and the regulations of business enterprises – to become familiar with contemporary international monetary affairs, and to analyze the cultural differences that create problems in international business operations. Special attention is given to the motivation of multinational firms in their investments abroad and the impact of international operations on marketing, finance, operations, supply, human relations, and general management. Emphasis is placed on the development of strategies, tactics, and organizational structures for the various types of cultural environments and their effective implementation for market penetration.

BUS 610 - Operations Management

Semester Units: 3
Prerequisite/Corequisite: BUS 602

Operations Management (OM) is the field of management which deals with the operational function of enterprises. Every organization, public or private, service or manufacturing, uses production systems to transform resource inputs into useful goods or services. The course develops a systematic approach for identifying and solving a wide variety of production and operation management problems. Operations Management involves both long term system planning and design and operating problems that occur within a short term planning and decision framework. Most of the controllable costs of a business are managed by the operating function. This course is designed to develop student skills in analysis, planning and decision making. Its goal is to develop the student's ability to plan and control production and operational systems and to solve a wide range of operating problems. Materials used in the course are taken from a wide variety of operating situations involving both production and service operations.

BUS 612 - Leadership - Principles and Practices

Semester Units: 3
Prerequisite/Corequisite: BUS 602

This course covers the concepts, principles and skills of leadership in a manner that is appropriate for both new and experienced leaders. A thorough assessment of advanced leadership skills, the role and function of leadership and the impact on individual organizations and society is presented. Various leadership models and their effectiveness are discussed.

Topics include leadership variables, ethics, leadership principles and approaches, team leadership and critical issues in leadership.

ACC 613 - Business Development and Proposal Preparation (§)

Semester Units: 3
Prerequisite/Corequisite: BUS 602

The function of a proposal is to sell the managerial and technical capabilities of the firm to carry out the work required at a reasonable cost. The importance of proposals in contracting cannot be over-emphasized. It is the point of sale. It is the primary vehicle for winning additional business. It is also one of the most difficult management tasks for many companies since every element of the company is involved in the development of the technical, management and cost proposal and in the negotiation and definitization of the resulting contract. The course is the most complete, thoroughly documented discussion of proposal preparation available to the Government prime contractors, subcontractors, commercial firms, and Government agencies from any source. It provides detailed step-by-step documented instruction on every aspect of the pre-proposal, proposal, source selection, and contract definitization process.

SCM 614 - Logistics Management in Government Acquisition (§)

Semester Units: 3
Prerequisite: None

Integrated Logistics Support (ILS) is an analysis methodology and management process, which is applied to virtually every major acquisition program in both the military and civilian sectors. ILS provides the balance between the performance and supportability characteristics of a system that must be formed with a reasonable investment in both the system design and the necessary support infrastructure. The logistician must be technically competent, knowledgeable of available design and analysis tools/models and their application, and must be able to effectively communicate with other internal project personnel, suppliers, and customer contract and operational personnel across the board. This course will provide the basis for acquiring those core competencies utilizing three fundamental objectives: (1) Defining a Supportable Design; (2) Developing a Support Solution; and (3) Defining the Logistic Management Process.

SCM 615 - Supply Chain Management

Semester Units: 3
Prerequisite: None

Supply chain management has been defined as the planning and management of all activities involved in sourcing, procurement, conversion, and logistics management activities. Importantly, it also includes coordination and collaboration with supply channel partners, which can be suppliers, intermediaries, third-party service providers, and customers. In essence, supply chain management integrates supply and demand management within and across companies.

This course provides an introduction to the many critical facets of supply chain management. The course coverage ranges from basic topics of inventory management, logistics network design, distribution systems, and customer value to more advanced topics of strategic alliances, the value of information in the supply chain, information technology, decision-support systems, and international issues in supply chain management. State-of-the-art models, concepts, and solution methods are provided for the design, control, operation and management of supply chain systems.

SCM 616 - Global Logistics Management (§)

Semester Units: 3
Prerequisite: None

Supply chain logistics management encompasses the development and fundamentals of the logistics discipline within a supply chain structure. It also presents a vision of the future of business logistics and supply chain management and their role in enterprise competitiveness. Logistics includes all the activities required to move product and information to, from, and

between members of a supply chain. The supply chain provides the framework for businesses and their suppliers to jointly deliver goods, services, and information efficiently, effectively, and relevantly to customers. This course presents the mission, business processes, and strategies needed to achieve integrated logistical management. The course has three fundamental objectives: (1) to present a comprehensive description of existing logistical practices in a global economy; (2) to describe ways and means to apply logistics principles to achieve competitive advantage; and (3) to provide a conceptual approach for integrating logistics as a core competency within enterprise supply chain strategy.

ACC 619 - Pricing and Financial Management of Government Contracts and Subcontracts (§)

Semester Units: 3

Prerequisite: None

The course is designed to provide an understanding and detailed working knowledge of the principles, tools and techniques for estimating, cost analysis, pricing and negotiation. Primary emphasis will be on the application of the tools and techniques in solving practical problems in the pricing of research, development, production and service contracts. It describes the specific problems and techniques applicable to the development, analysis, negotiation and justification of each major element of cost including: engineering and manufacturing labor, labor rates, material and subcontracts, other direct costs, forward pricing rates and profit or fee. It covers the projection and analysis of cost for both small contracts, and for large contracts extending over a number of contractor and Government fiscal years.

SCM 620 - Price and Cost Analysis (§)

Semester Units: 3

Prerequisite: None

This course is designed to provide an understanding of the most advanced concepts of price and cost analysis. It will sharpen and expand the skills of experienced practitioners and provide a solid base of knowledge and practical skills upon which less experienced personnel can build. Equal emphasis is placed on both price and cost analysis. The course demonstrates the distinction between price and cost analysis and when and how each should be used and in what combination. The importance of acquisition planning and market research in pricing will be stressed. The distinction between market pricing and cost based pricing will be emphasized. The relationship and use of price and cost analysis techniques in developing and maintaining partnering agreements will be covered.

SCM 621 - Application in Supply Chain Management (§)

Semester Units: 3

Prerequisite: None

It is only over the last few years that firms have started focusing on logistics and supply chain management as a source of competitive advantage. There is a realization that no company can do any better than its logistics system. This becomes even more important given that product life cycles are shrinking and competition is intense. Logistics and supply chain management today represents a great challenge as well as a tremendous opportunity for most firms. In this course you will study advanced topics of the supply chain from the point of view of a general manager. Logistics and supply chain management is all about managing the hand-offs in a supply chain – hand-offs of either information or product. The goal in this course is to understand how logistical decisions impact the performance of the firm as well as the entire supply chain. The key will be to understand the link between supply chain structures and logistical capabilities in a firm. Students will apply concepts learned in previous courses as well as real life case analysis throughout this course.

PMP 625 - Program Management

Semester Units: 3

Prerequisite/Corequisite: BUS 602

The course is designed to provide a comprehensive knowledge of program/project management. It is based on the program management procedures used by the United States Government and its prime and subcontractors. However, the procedures are applicable in whole or in part to the management of any type or size of research, development, production or construction project.

This course demonstrates how business and technical management systems are integrated into a total management system. It is designed to improve the performance of program/project managers in their present areas of responsibility and to prepare them for increased responsibilities in the future. The course is both concept and content oriented. It covers both the theory and practice of program/project management. It explains what to do, how to do it, and why you do it. It provides instruction in all aspects of program management, including training in the specific functions and tools of the program manager.

PMP 627 - Managing Projects

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Project management is the process whereby a single manager/ leader is responsible for planning, organizing, coordinating, directing, monitoring, motivating and controlling the efforts of all functional, staff and project groups in accomplishing the project's objectives. Project management is one of the most complex, demanding management concepts in existence.

The course described below is designed to provide a comprehensive knowledge of project management. It includes in-depth coverage on the various types of project management organization and all of the detailed business and technical management procedures necessary to plan, organize, staff, direct and control any size project in the areas of research, development, production, shipbuilding, services and construction. It is supported by extensive reference material from both Government and industry sources.

PMP 628 - Mastering IT Project Management

Semester Units: 3

Prerequisite/Corequisite: BUS 602

The success of many organizations depends on their ability to manage their information technology (IT) projects. Leading and managing IT projects requires disciplined approaches that utilize standard project management techniques combined with the unique procedures associated with IT projects.

This course covers all the important aspects of managing IT projects:

- ◆ project initiation
- ◆ requirements determination
- ◆ organizing, planning and controlling - risk management
- ◆ technical management
- ◆ leadership in an IT environment
- ◆ project closeout

It is based on over 30 years of developing and presenting courses in project management. The course incorporates the lessons learned from successful and not so successful projects. The course provides a roadmap for completing IT projects to meet performance specifications on time, within budget, and to the satisfaction of the customer.

Case studies and exercises facilitated by an experienced instructor provide a solid foundation in both the principles and practical applications of IT project management.

Participants learn techniques that can be immediately applied in improving their project management processes and outcomes. In addition, this course can help in the preparation for the Project Management Institute's Project Management Professional (PMP) examination and CompTIA's IT Project+ Certification.

PMP 629 - Technical Program Management

Semester Units: 3
Prerequisite/Corequisite: BUS 602

This course is designed to provide a comprehensive knowledge of technical project management. It is a fully integrated program concerning all aspects of technical program planning and control including: engineering management, system engineering, software management, production management, integrated logistics support, and project control. It is based on technical management procedures used by the United States Government and its prime and subcontractors. However, the procedures are applicable in whole, or in part, to the technical management of any type or size of research, development, production or engineered construction project.

Its purpose is to provide a flexible integrated technical project management system which can be scaled to each application, both Government and commercial, and at the same time comply with specific program requirements.

ACC 631 - Contract Management and Administration (§)

Semester Units: 3
Prerequisite: None

This course covers the organization, management techniques and areas of application of the contract management/ contract administration function. Contract management and administration requires an in-depth knowledge of contract regulations and the ability to use that knowledge and avoid problems during contract performance and to solve them if they occur. The purpose of this course is to provide: (1) a broad appreciation of all contract functions and a thorough understanding of the contract manager's authority and responsibilities; (2) familiarization with the management problems associated with various types of contracts; and (3) training in the various types of skills needed for the anticipation, identification and solution of contract problems, together with the use of effective communication and documentation techniques.

PMP 632 - Contracting and Procurement for Project Managers and Technical Personnel

Semester Units: 3
Prerequisite: None

This course is designed to explain the contracting process to project/program managers, engineering, technical and other functional personnel, and their roles and responsibilities in this process. It is intended to acquaint people who are carrying out the day-to-day contract work with proven methods for meeting quality, cost and schedule requirements in the complex world of contracting and subcontracting.

The course provides: (1) a broad appreciation of the contracting process; (2) familiarization with the management problems associated with various types of contracts; (3) an update on new and revised laws and regulations and management procedures; and (4) training in the various types of skills needed for the anticipation, identification and solution of contract problems, together with the use of effective communication and documentation techniques. The course curriculum is covered in-depth from both the customer's and contractor's viewpoint.

ACC 635 - Negotiation - Principles and Practices (§)

Semester Units: 3
Prerequisite/Corequisite: BUS 602

Negotiation takes place when two or more parties, each with their own objectives, seek to reach a mutually satisfying agreement. Negotiation is not the process of giving in or mutual sacrifice in order to secure an agreement. It is a process used to find a formula which will maximize the interest of all parties to the negotiation. Negotiation takes place in all phases of business. The contracting and purchasing process requires a knowledge of when and how to negotiate statements of work, costs, price, and terms and conditions. Negotiation is of major importance in project/program management since it is one of

the main tools of customers, project managers, team leaders and functional managers in planning and controlling the project. Negotiation is used in almost every day-to-day business activity and is vital to the successful completion of any business arrangement. This course offers a complete approach to the development of the knowledge, attitude and skill required for success in negotiation. The emphasis is on the entire negotiation process, not just on a series of unrelated negotiation tactics. It provides both experienced and inexperienced negotiators with a complete conceptual framework for negotiation so that new experiences are added to and complement previous ones. It also provides a basis for transferring acquired skills and experience to others. The course consists of two basic segments. The first part of the course is primarily a presentation of the principles and practices of negotiation. The second part of the course consists of negotiation practice based on realistic business situations.

PMP 636 - Negotiation and Conflict Resolution

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Project managers exercise their negotiation skills every day. They negotiate with functional and other project managers within their own organization over time, scope, budget, schedules and change orders. Outside the organization they negotiate with customers, vendors, suppliers and subcontractors. Project managers negotiate during every phase of a project from the start-up, during performance, and right through the close-out.

This course provides the project manager the skills required to: negotiate schedules, change orders, estimates and contracts; resolve conflict; negotiate multi-party agreements; and build better teams. Strategy in negotiation is explored and the key role that planning and preparation play in a negotiation is emphasized. The dynamics of communication in negotiation are examined with special attention to the role of power and ethics.

The dynamics of negotiation that involves teams and groups is highlighted. Factors central to all negotiations as well as factors and dimensions strongly shaped by national and cultural style are also presented. Quite often negotiation strategies and tactics do not work the way they are intended to. Conflict resolution tactics are discussed which negotiators can use to help put derailed negotiations on track and keep a conflict from becoming increasingly destructive. Finally, the use of third parties to resolve breakdowns in negotiations is explored.

PMP 647 - Earned Value Management Systems

Semester Units: 3

Prerequisite/Corequisite: BUS 602

The purpose of this course is to provide a step-by-step explanation of how to integrate cost, schedule, technical planning and control into a total management system for achieving program/project objectives. The course relates these planning and control procedures to the developing philosophy of concurrent engineering and integrated product development.

Management must have an effective system for comparing the actual work being accomplished with the planned increments of work, regardless of the time period in which the work is performed and regardless of whether there is a formal customer requirement. This information is necessary in any size project in order to appraise performance against plan and to seek to identify problem areas early enough to examine a number of alternatives other than simply finding additional funding, slipping the delivery schedule or reducing technical performance. This information is also necessary to appraise the impact of proposed changes.

ACC 651 - Source Selection and Contract Award (§)

Semester Units: 3

Prerequisite: None

Acquisition Reform and Streamlining is making far-reaching changes in the way the government and industry conduct business. There are many new factors to consider in contracting by negotiation, source selection and contract pricing and

definitization. These include: (1) performance-based contracting; (2) the use of statements of objectives and contractor-developed statements of work; (3) the use of oral proposals; (4) more flexible source selection approaches for the government; (5) past performance evaluation; and (6) far more emphasis on risk identification and mitigation. The source selection and contract award process, from the development of a requirement to the issuance of a contract to the best source to fulfill that requirement, is both complex and demanding. Successful contract performance is predicated upon sound procedures. However, these procedures are often not well understood by the participants, both buyers and sellers. This is a completely integrated, well documented course covering the rationale, methods and techniques involved from the development of requirements to final source selection, negotiation and contract award. This course includes exercises and case examples on statements of objectives, performance requirements and specifications, statements of work, evaluation factors and weights, past performance, risk analysis, cost realism and the use of best value discriminators in making a selection decision.

BUS 653 - Business Research Methods

Semester Units: 3

Prerequisite/Corequisite: None

This course is designed to provide a working knowledge of research methods and analytical techniques as they are used in business and government as tools for implementing a systematic approach to planning policies, programs and projects. It combines in one course the study of research methodology, the planning and design of research, and the management science tools that are used and the nature of decisions to which the research and analysis contribute. Modern decision theory which treats managerial problem solving as the selection of the best solution from a set of alternatives is emphasized. The course is not concerned with abstract statistical concepts but, rather, with the applicable techniques and their use in solving practical business problems.

In addition to providing a working knowledge of research methods and design, the course includes a brief, but thorough description of forty (40) tools of analysis with a description of the technique and its application. None of the techniques require sophisticated mathematical or computer implementation. Emphasis is placed on how the techniques are used and how to implement the results.

BUS 657 - Management Accounting and Controls

Semester Units: 3

Prerequisite/Corequisite: BUS 602

This course is designed as a broad based course to provide managers with a conceptual framework in accounting and an understanding of the reporting, control, and analytical environment in which the accountant functions, and the interrelationship between accounting, financial management and general management.

The course deals with accounting concepts – development of financial statements – cash flow analyses – cost accounting, capital budgeting – management control systems – financial accounting practices – tax accounting – accounting for inflation and foreign operations.

The objective is to provide students with an understanding of the specific issues and the accounting concepts which underlie corporate financial planning. It will provide the student with an understanding of the role of accounting in controlling current operations and in planning future operations.

BUS 659 - Organizational Behavior and Human Resources

Semester Units: 3

Prerequisite/Corequisite: BUS 602

This course is based on the modern philosophies, research and practice concerning individual, interpersonal and organizational behavior. The course focuses on leadership techniques and on understanding and managing the behavior of individuals and groups, the human resources through which the manager gets things done; and on the organization design tools the manager can use to solve the series of major and recurring problems that occur in complex organizational life.

The course objectives are to provide the student with the skills to manage individual, interpersonal and group behavior, to develop the ability to diagram the causes of human problems in the work environment, and to develop judgmental skill in taking action to improve the motivation, effectiveness and satisfaction of working groups and individuals. The course considers a wide array of tools such as structural change, measurement systems, reward systems and educational methods for solving organizational problems.

BUS 661 - Financial Management

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Virtually all the activities of business firms and other organizations are reflected in, and affected by, the availability of funds. Finance provides one of the major tools for managerial planning and control. This course provides a wide exposure to the financial issues useful to general management. It offers the student an in-depth study of business finance, investment, and money and capital markets. Specific skills designed to aid in these decisions are developed and utilized in analysis of actual business problems. Students will master the principles of money and credit, acquire a knowledge of financial institutions, instruments and policies, attain skills in recognizing and solving financial problems, and develop their skills in analyzing the risk and financial returns in specific situations.

BUS 663 - Management Economics

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Management economics concerns itself with the application of micro and macroeconomic principles to the organization and conduct of a business enterprise. It provides an understanding of the economic concepts, institutions, and methods for analysis of the firm, the nation and the world. Its principal purpose is to indicate how economic analysis can be utilized to illuminate the process of management decision making and to help improve the quality of those decisions.

The course is designed to provide techniques for analyzing the firm's immediate economic environment including the nature of industry demand and supply, the interrelationship between the firm's production and cost functions and the pricing decision, the effect of market structure on the behavior of competitors, and an understanding of the characteristics, limitations, and uses of economic information available to the firm from public and private sources. It is designed to illustrate the major tools, concepts, and institutions of economic thought and their application to the making of business decisions and the formulation of policies.

BUS 665 - Strategy and Business Policy

Semester Units: 3

Prerequisite/Corequisite: BUS 602

The course in Strategy and Business Policy emphasizes the acquisition of a senior management perspective. It deals with the skills, attributes and attitudes required for the effective performance of the general manager function. It is a major integrating course designed to pull together skills gained in the basic business disciplines and functional fields. It focuses on the enterprise as an entity and the general manager working within a corporate environment.

The course covers the manager's function – strategy formulation and implementation – corporate planning and control – organizational analysis – comparative management – entrepreneurship and venture initiation – small business management –

and the impact of competitive forces and government regulations.

MBA Students are required to complete this course last, as it supports the creation of students' Final Project.

PMP 671 - Building and Managing Project Teams

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Project management takes place in a dynamic, complex and changing environment. Successful project management depends on the people and process skills of a project manager, the project team, and the performing organization managers who support the project. These skills must be integrated with the business and technical skills necessary to lead any successful project and achieve the cost, schedule and technical objectives with maximum customer satisfaction.

PMP 679 - Risk Analysis and Management

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Risk management is a concept that can be implemented in a number of ways. All good risk management approaches have the following characteristics: (1) There is a planned and documented risk management process for the project or program; (2) The process is based on a prospective assessment – the project management team looks ahead to find and manage possible problems; (3) The initial assessment is periodically redone to validate the initial findings and to uncover new problem areas; (4) The program has a defined set of evaluation criteria that covers all facets of the program; and (5) The on-going results of the risk management process are formally documented.

This course covers all aspects of risk management – risk identification – risk assessment – risk handling – and risk communication. A series of qualitative and quantitative tools are explained and illustrated with examples and workshop exercises. The emphasis is on developing usable processes and tools that can be immediately put to work by all members of a project management team.

PMP 687 - Project Quality Management

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Quality is defined from many viewpoints. One definition is the totality of features and characteristics of a product or service that bears on its ability to satisfy given needs. Another definition of quality is meeting or exceeding customer expectations. Quality management is the integration of technical and management quality principles, practices, processes and procedures to enable each person in an organization to provide quality products and services, deliver value and contribute to the organization's success.

In a project or program, the responsibility and leadership for creating an effective quality design and delivery belongs to the project or program manager. The PM must demonstrate to the project team a commitment to quality by communicating goals, making process effectiveness a clear project/program management issue and by the commitment of resources, so that the project team views quality as a priority.

This course provides project management professionals with a comprehensive approach to the tools, techniques, and leadership and management activities that affect, both directly and indirectly, quality throughout a project or program's life cycle.

BUS 695 - Management Information Systems

Semester Units: 3

Prerequisite/Corequisite: BUS 602

This course is based on the premise that professional managers in both the private and public sectors cannot afford to ignore information systems. Professional managers must learn how to use information technology to create competitive firms, manage global corporations, and provide useful products and services to customers.

School of Ministry

Dr. Darla Cuadra, Director

School of Ministry

School of Ministry Degree Program

Christian Ministry Leadership in today's world is ever evolving. Pastors and church lay leaders must not only have a solid biblical and theological foundation, but must also be able to manage budgets and finances, facilities, and human capital.

Ministry leaders of today must be able to efficiently and effectively plant churches and run the business of ministry, as well as understand the implications of living in a more global society to adequately serve the needs of diverse congregations.

Patten's School of Ministry undergraduate degree program has been designed to incorporate best practices of leadership with opportunities for application of these practices into their own personal ministry setting, while exposing them to strategies for communicating across cultures.

Patten's approach to education and ministry includes the cognitive, affective, and experiential dimensions of learning. Through their coursework, students prepare for co-vocational ministry, local and global church planting, missionary service, cross-cultural vocation and ministry, benevolence and humanitarian ministry, non-profit leadership, and global community development.

Instructional Modality

The University's School of Ministry programs are structured to be delivered online via eight-week terms. Each week's modules have specific learning outcomes, delivered via instructor-led synchronous class sessions, asynchronous learning modules, discussion posts, written assignments, and/or quizzes and exams. This interactive learning modality allows students to develop rich connections with faculty and each other, providing them the opportunity to achieve a sense of community. The institution's technology allows for responsive student-faculty interaction. Student work is typically graded within 72 hours of submission, and results are available immediately within the Learning Management System.

Associate of Arts in Christian Ministry Leadership

Purpose of the Program

The Associate of Arts in Christian Ministry Leadership is recommended for students who plan to further their education in ministerial studies or serve in various leadership areas of pastoral and church lay ministry. The courses are designed to serve adult learners and bi-vocational ministers who may have a family, job, and/or community responsibilities. The curriculum is composed of courses in general education, biblical and theological studies, and church leadership, and includes both theoretical concepts as well as opportunities for practical application. Program and course learning outcomes

include an emphasis on critical thinking, ethical decision-making, and the need to remain current within the evolving ministry leadership environment.

Program Learning Outcomes

The learning outcomes of the program are for each student to be able to:

- Demonstrate a knowledge of the Bible, interpret Scripture's original meaning, and apply Scripture to contemporary situations.
- Explain and model church systems that emphasize best practices for ministry.
- Apply their knowledge of best practices in developing a fiscally sound ministry.
- Integrate knowledge of missiology, culture, and ethics in developing a personal model of Christian Leadership, while recognizing and understanding intercultural and global perspectives.
- Think critically and ethically, demonstrating basic written, oral, and technology-based communication skills.

Program Length

The Associate of Arts in Christian Ministry Leadership requires the completion of 60 credits. The associate degree program is typically completed in three (3) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the associate degree program is six (6) years.

Degree Requirements

The Associate of Arts in Christian Ministry Leadership is comprised of three content areas: General Education courses (27 semester credits); Bible and Theology core courses (12 semester credits); and Christian Ministry leadership concentration courses (21 semester credits).

These courses are designed to serve adult learners and provide a strong foundation for leadership in ministry. The leadership concentration courses expose students to the basic concepts required to successfully serve or develop a fiscally sound ministry, based on best practices from leading practitioners in ministry.

Students must successfully complete all required courses with a passing grade.

Please see the [Tuition and Fees](#) section for course fees or visit Patten's website at www.patten.edu.

Associate of Arts in Christian Ministry Leadership

General Education Courses

- ◆ ANT 220 - Cultural Anthropology
- ◆ COM 146 - Communications
- ◆ PHL 263 - Judeo-Christian Social Ethics
- ◆ PHL 270 - Comparative Worldviews
- ◆ WR-I - Writing I*
- ◆ WR-II - Writing II*
- ◆ QR-I - Quantitative Reasoning*
- ◆ SC-I - Natural Science*
- ◆ SS-I - History/Government Structures*

Bible and Theology Core

- ◆ NTS 225 - New Testament Biblical Literature Survey
- ◆ OTS 225 - Old Testament Biblical Literature Survey
- ◆ THE 160 - Gospel of the Kingdom
- ◆ THE 240 - Theology of Mission

Christian Ministry Leadership Courses

- ◆ BUS 290 - Church Financial, Fiduciary and Legal Management
- ◆ BUS 299 - Essentials of Business
- ◆ CHP 101 - Cross-Cultural Evangelism
- ◆ CHP 200 - Planting and Developing Healthy Churches
- ◆ CMN 120 - Next Gen: Missiology
- ◆ CMN 201 - Introduction to Preaching and Teaching
- ◆ LDR 201 - Introduction to Leadership

** These requirements may be taken through [Sofia Learning](#) or fulfilled via transfer from an accredited institution.*
– Each course is 3 semester credits.
– Program requires completion of 60 semester units.

School of Ministry Certificate Program

For students who do not wish to enroll in a School of Ministry degree program, the option of an Undergraduate Certificate Program is available.

Instructional Modality

The University's School of Ministry undergraduate programs are structured to be delivered online via eight-week terms. Each week's modules have specific learning outcomes, delivered via instructor-led synchronous class sessions, asynchronous learning modules, discussion posts, written assignments, and/or quizzes and exams. This interactive learning modality allows students to develop rich connections with faculty and each other, providing them the opportunity to achieve a sense of community. The institution's technology allows for responsive student-faculty interaction. Student work is typically graded within 72 hours of submission, and results are available immediately within the Learning Management System.

Certificate in Christian Ministry Leadership

The 24-unit Christian Ministry certificate program includes topics that will enhance students' ability to minister effectively in Church and parachurch settings. The courses in the certificate program provide a strong foundation for the application of biblical principles to contemporary situations, and also introduce students to the business principles needed to develop and serve in a ministry setting.

This certificate is fully transferable to the School of Ministry's Associate of Arts in Christian Ministry Leadership.

Program Learning Outcomes

The program learning outcomes for the Certificate in Christian Ministry are as follows:

- Demonstrate a knowledge of the Bible, interpret Scripture's original meaning, and apply Scripture to contemporary situations.
- Explain and model church systems that emphasize best practices for ministry
- Apply their knowledge of best practices in developing a fiscally sound ministry.

Program Length

The Certificate in Christian Ministry Leadership requires the completion of 24 credits. The certificate program is typically completed in two (2) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the certificate program is four (4) years.

Academic Calendar

Patten University's academic calendar for the School of Ministry consists of six terms per academic year. Terms are eight weeks in length, and students may enroll at the beginning of any term throughout the year. By offering courses year-round, students can complete their program in the amount of time appropriate for their life schedule.

Term	Term Start Date	Add/Drop Deadline	Last Date to withdraw with a W	Term End Date
Spring I 2025	01/05/2025	01/11/2025	02/15/2025	03/01/2025
Spring II 2025	03/02/2025	03/08/2025	04/12/2025	04/26/2025
Summer I 2025	05/04/2025	05/10/2025	06/14/2025	06/28/2025
Summer II 2025	06/29/2025	07/05/2025	08/09/2025	08/23/2025
Fall I 2025	09/02/2025	09/08/2025	10/13/2025	10/26/2025
Fall II 2025	10/27/2025	11/02/2025	12/07/2025	12/21/2025
Spring I 2026	01/05/2026	01/11/2026	02/15/2026	03/01/2026
Spring II 2026	03/02/2026	03/08/2026	04/12/2026	04/26/2026
Summer I 2026	05/04/2026	05/10/2026	06/14/2026	06/28/2026
Summer II 2026	06/29/2026	07/05/2026	08/09/2026	08/23/2026

Official Holidays

All University offices are closed on:

- Martin Luther King Jr. Day
- President's Day
- Memorial Day
- Juneteenth
- Independence Day
- Labor Day
- Thanksgiving Day and the Friday following Thanksgiving
- Christmas Eve through the first business day after New Year's Day.

Students still have access to the University Learning Management System (LMS) and their coursework during holidays.

Admissions

Statement of Non-Discrimination

Patten University admits students of any race, color, religion, sex, age, national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to the students of the University. It does not discriminate on the basis of race, color, religion, sex, age, handicap, disability, marital status, national and ethnic origin, nor any other characteristic protected under applicable federal, state, or local law in administration of its educational policies, admission policies, and other school administered programs.

Admission Requirements

All certificate or degree applicants to the School of Ministry must complete an application at www.patten.edu. Patten University admits students to the School of Ministry on a rolling basis, and eligible students may start classes at the beginning of any of the terms offered throughout the year.

High School Graduation Requirements

To be admitted into an undergraduate certificate or degree program, students must hold a high school diploma or its equivalent (such as a GED). The institution understands that obtaining proof of having earned a high school diploma can be difficult, particularly in the international context. Accordingly, undergraduate program applicants may self-certify, confirming they have earned a high school diploma or its recognized equivalent.

Technology Requirements

To fulfill the requirements of the Patten course curriculum, all students are required to have access to an internet-enabled device with a web browser, an email account, a word-processing program, and a spreadsheet program. Microsoft Office or Google Suite is sufficient.

Official Transcripts

Official transcripts must be sent directly from colleges or universities. Electronically-issued transcripts and other documentation can be sent to admissions@patten.edu.

Paper-based transcripts and records should be sent to:

Patten University - Transcript Office
548 Market St PMB 98598
San Francisco, CA 94104-5401

Foreign Educational Credentials

An applicant who has completed university-level courses in a foreign country must have their educational credentials evaluated and sent to Patten University. The evaluation must also include the

original transcript. If the transcript is not in English, a translation must be provided. Three reputable foreign credential evaluation service providers are suggested below.

World Education Services (WES – <http://www.wes.org/>)

Educational Credentials Evaluators, Inc. (ECE – <http://www.ece.org/>)

International Education Research Foundation (IERF – <http://www.ierf.org/>)

Note that while Patten University accepts students from foreign countries, it does not currently provide visa services. It provides enrollment verification services upon request at no charge.

Proof of English Proficiency

Patten University courses are offered in English. Proof of English proficiency from students for whom English is not their native language is required. Students who have earned at least 30 credits from an internationally recognized college or university in which English was the language of instruction may have this requirement waived. In this instance, an average grade of C or higher is required for undergraduate admissions, while an average grade of B or higher is required for graduate admissions.

Admissions Policies

Application Instructions for Admission

The application may be found on the Patten University website at www.patten.edu.

Accommodations for Students with Disabilities

Applicants and prospective or current students with disabilities who require adjustments and/or auxiliary aids throughout the admissions process, and/or throughout their studies, should contact the Admissions Department (admissions@patten.edu) for assistance. It is the student's responsibility to request accommodations and to provide current and supporting documentation from a medical doctor or clinician explaining the nature and limitations of their disability. The institution will work with the person to make reasonable accommodations and adjustments to enable him/her to fully participate in the admissions process and educational programs.

Transfer Credit

Students may receive transfer credit for courses completed at other accredited educational institutions. Approval for specific courses will be determined individually, based on the breadth, scope, organization, and quality of the coursework in relation to the courses required by Patten University. Applicants seeking such evaluations must provide official transcripts from the transferring institution. The transfer credit is solely at the discretion of Patten University, as course content and instructional quality can vary between institutions.

Patten will consider transfer credit earned at institutions of higher education outside of the United States that are recognized by the Ministry of Education or equivalent authorizing agency, provided that such credits have been earned through university-level coursework and are presented with equivalent grades of "A," "B," or "C." Such credit must be evaluated by an international transcript evaluation service unless they are earned at an institution that is accredited by a U.S. Department of Education or CHEA-recognized accreditor. The Office of Admissions and/or the Office of the Registrar will make the final determination of the award and applicability of any international credit. A certified course-by-course evaluation from an organization recognized by Patten is required for all post-secondary level studies completed outside of the United States at institutions that are not accredited, or if the transcript is not in English. GPA and degree equivalencies must be included with your course-by-course evaluation. All fees charged by translators or external evaluators must be paid by the student. Recognized transcript evaluation organizations include:

- [Educational Credential Evaluators](#) (ECE)
- [World Education Services](#) (WES)

- [SpanTran: The Evaluation Company](#)
- [International Education Evaluations, LLC](#) (IEE)
- Or any company recognized by the [National Association of Credential Evaluation Services](#) (NACES)

Only grades of C or higher will be considered for undergraduate transfer credit. Transfer credits that are recognized and accepted by Patten University are not factored into the calculation of the student's grade point average.

No more than 75% of the credits required for an undergraduate degree or certificate program may be fulfilled via transfer credit.

If an applicant's request for undergraduate-level transfer credit is denied, they may appeal the decision to the Director of the School of Ministry (dcuadra@patten.edu). The appeal should include the name of the Patten course, the name of the institution, the previous course taken, and a detailed explanation, with supporting material, of why the applicant believes the course taken at another institution is similar in content to the Patten course.

Experiential Credit/Credit for Prior Learning

Patten's School of Ministry does not accept credit for prior learning or experiential credit. Credit must come from a recognized, accredited institution or from a provider with whom Patten University has an articulation agreement.

Transfer Articulation and Partnership Agreements

A transfer articulation agreement is a formal agreement between two educational institutions that outlines how credits earned at one institution will transfer to the other. The Patten University School of Ministry currently participates in an articulation agreement with the Church of God School of Ministry (TN). Students planning to transfer from the Church of God School of Ministry (TN) to Patten University may contact the Registrar for information regarding course equivalencies.

The School of Ministry has established a partnership agreement with [Sophia Learning](#), whereby students may satisfy designated course requirements by completing pre-approved courses offered through Sophia Learning. These courses are evaluated and accepted as academically equivalent to the corresponding courses offered by the School of Ministry.

First Term Registration

A newly accepted student at Patten must enroll in their first term within 90 days of acceptance. A student is subject to unenrollment from the University if they do not meet this requirement.

Provisional Admission and Term Registration Policy

Applicants who are unable to provide final official documents during the application process may be granted provisional admission. Under this status, applicants are permitted to register for one term of coursework while completing their application requirements. Enrollment in subsequent terms will not be allowed until all missing documentation has been submitted and verified.

Student Verification

Students are required to submit a government-issued photo ID as part of their application. The photo ID will only be used to verify identity throughout the program. All students are issued a student ID number.

Notice Regarding Transferability of Credits Earned at Patten University

The transferability of credits you earn at Patten University is at the complete discretion of an institution to which you may seek to transfer. Acceptance or recognition of the certificate or degree you earn is also at the complete discretion of the institution to which you may seek to transfer. If the credits, certificate or degree that you earn at Patten are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at Patten will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Patten University to determine if your credits, certificate or degree will transfer or be recognized.

Academic Policies

Academic Load

Undergraduate students in the School of Ministry may take either one or two courses per term (3 or 6 semester credits). A full-time course load is considered two courses (6 semester credits) per term; a part-time course load is considered one course (3 semester credits) per term.

Each term is 8 weeks in length.

Credit Hour Definition

Patten University utilizes the commonly accepted definition of semester credits (also referred to as “units”) to measure its academic courses and programs. One semester credit is the equivalent of 15 hours of academic engagement and 30 hours of preparation. Accordingly, each 3-unit course offered by Patten University is normally achieved via 45 hours of academic engagement and 90 hours of preparation.

Grading Policy

The course grade is the weighted average of the individual course module assignments, quizzes, midterm examinations, projects, final papers, and/or final examinations as determined by the course syllabus. Patten calculates grades numerically, which are then converted to final letter grades. The minimum passing grade for each course is 65% (D).

Grades	Quality Points
A (90-100%)	A = 4.0
B (80-89%)	B = 3.0
C (70-79%)	C = 2.0
D (65-69%)	D = 1.0
F (Below 64%)	F = 0.0

Students may view their grades at any time by logging into the Learning Management System.

Grade of “W” (Withdraw)

Students may be issued a grade of W (Withdraw) if they withdraw prior to midnight of the last day of Week 6 of the term (see [Academic Calendar](#)). The grade of W does not factor into the calculation of a student’s GPA.

Grade of “F/I” (Fail/Incomplete)

Students who withdraw after the Week 6 deadline will receive the grade of F/I (Fail/Incomplete). The grade of F/I is worth zero quality points and does factor into a student’s GPA.

Grade of "I" (Incomplete)

A grade of I (Incomplete) may be granted, under rare circumstances, only if a student has attempted at least 60% of points for graded coursework, can provide a serious and compelling reason for an extension of the regular term length, can mathematically pass the course with a satisfactory grade on any outstanding assignment(s), and is not on academic probation.

Students must request the "Incomplete" from the course instructor and the Director of the School of Ministry prior to attempting the final summative assignment of the course, who will jointly determine if an incomplete grade is warranted. Students may be allowed up to 14 days from the end of the term to resolve an incomplete, after which time the grade will be calculated based on the total points earned. A student is allowed only one attempt on a final project or final exam within the incomplete period.

Repeating Courses

A student may choose to repeat a course if they have received a non-passing grade or if it is necessary to raise their GPA to meet the University's Satisfactory Academic Progress policy. When a student repeats a course and receives a higher grade, the higher of the grades will be used for calculating the GPA. Repeated courses are subject to tuition as calculated at the per-credit rate for the student's program, as detailed in the Enrollment Agreement.

Registration and Adding/Dropping of Courses

Students in the School of Ministry may self-register in Patten's Learning Management System or may be registered by the institution's Registrar. Students are free to add and drop classes prior to the seventh day of the term (see [Academic Calendar](#)).

To drop a class after this deadline, or to withdraw from the University, undergraduate students must contact the Director of the School of Ministry at dcuadra@patten.edu or the University Registrar.

Administrative Withdrawal and Attendance Policies

The institution may administratively withdraw a student from a course from the beginning of week two through the end of week six if the student shows no academic activity in the course for 14 consecutive calendar days. Academic activity for students in the School of Ministry includes submitting any assignment, including discussion posts. Attendance at a synchronous session does not, on its own, constitute academic activity for purposes of undergraduate administrative withdrawals. Students who are administratively withdrawn may appeal within 7 days of their withdrawal. Appeals should be directed to appeals@patten.edu. Upon approval, students will be reinstated in the course and must demonstrate continued progress. Students who are administratively withdrawn shall be subject to the School of Ministry [Tuition Refund Policy](#).

Program Transfer

Currently enrolled students who wish to transfer into another program may contact the Registrar for assistance. Transferring into another program may require the submission of additional information or completion of additional requirements. It may result in the inability to apply credits that have already been earned to the new program. Transfer credit that has already been awarded may be affected by a program transfer.

Requirements for Graduation

Degree Program

To receive the degree, the student must complete the following:

- ◆ Successfully complete the courses required for the degree program within a maximum time frame of six (6) years with a GPA of 2.0 or higher.
- ◆ Clear any past-due balances.

Certificate Program

To receive the certificate, the student must successfully complete the courses required for the certificate program within a maximum time frame of four (4) years with a GPA of 2.0 or higher.

Satisfactory Academic Progress Policy

For students to meet satisfactory academic progress (SAP), they must maintain a minimum cumulative grade point average of 2.0. Students who fail to meet satisfactory academic progress will be placed on academic probation.

Academic Probation

Undergraduate students whose cumulative grade point average falls below 2.0 will be placed on academic probation. While on Academic Probation, students must satisfactorily complete all courses with a grade of D or higher, or else they will be subject to dismissal from Patten.

Students must raise their cumulative GPA to a 2.0 or higher to be removed from Academic Probation. This may be achieved by retaking any failed courses offered during their period of Academic Probation, or, if such courses are not offered during the period of Academic Probation, by taking and satisfactorily completing other courses required by the program. Courses that are retaken are subject to the Course Repeat policy (see [Repeating Courses](#)).

For purposes of clarity, a 2.0 cumulative GPA is required for graduation (see [Requirements for Graduation](#)).

Academic Progress and Maximum Timeframe

Undergraduate students must show regular progress toward the completion of their degree or certificate program. Regular progress is achieved by satisfactorily completing at least three courses per 12 months of enrollment. However, students enrolled in an associate degree program must complete the requirements for their program within six (6) years. Students enrolled in a certificate program must complete the requirements for their program within four (4) years. Students not showing any academic progress for a period of 12 months are subject to dismissal from the University.

Dismissal

Students are subject to dismissal from the University if they violate their Academic Probation, do not complete at least three courses per 12 months of enrollment, or do not complete their program within the designated maximum timeframe. An academically dismissed student will not be allowed to re-enroll for a period of two terms before a consideration of reinstatement may be made.

Leave of Absence

Students may receive a leave of absence by contacting the Director of the School of Ministry or the Registrar's Office, stating the reason for their request and the expected date of return. All leaves of absence must be approved by the University in advance. Students are exempt from the institution's Unsatisfactory Progress policy while on Leave of Absence.

Appeals of Dismissal

Patten understands that its students are working adults with competing priorities and responsibilities. Patten wants its students to succeed and to graduate, and will work to make reasonable accommodations for each student's situation.

If a student in the School of Ministry has been dismissed from Patten University based on a violation of its Satisfactory Academic Progress policies, the student may petition the University for readmission. Any decision to dismiss a student may be appealed to the Director of the School of Ministry, Patten University, 2433 Coolidge Ave, Oakland, CA 94601, or by email to dcuadra@patten.edu.

Proctoring

Patten University requires proctored quizzes and examinations at regular intervals throughout its programs. Proctors may not be a past or present family member, a work subordinate, a current/previous student of Patten University, or related to a current/previous student of Patten University.

Before taking a proctored quiz or examination, both students and proctors electronically attest that they do not have a relationship that would call into question the proctor's impartiality. The proctor must additionally electronically submit a Proctor Attestation Form, including a copy of both their and the student's government-issued photo identification.

Statement on Academic Integrity

Patten expects its students to act with honesty and integrity in completing their course and program work. Distance learning requires a high level of self-discipline with regard to academic integrity. All work submitted by a student must represent the original work of that student. Students found to have cheated or committed plagiarism may be suspended or dismissed from the University.

Student Code of Conduct and Academic Integrity Policy

Students at Patten are expected to adhere to high standards of ethics in the pursuit of their education. As a condition of enrollment, students agree to:

- ◆ Conduct themselves with professionalism, courtesy, and respect for others in all dealings with the Patten staff, faculty, and other students.
- ◆ Observe the institutional policies and rules on submitting work, taking examinations, and conducting research.
- ◆ Never turn in work that is not their own, or present another person's ideas as their own.
- ◆ Never ask for, receive, or give unauthorized help on graded assignments and examinations.
- ◆ Never use short excerpts or quotations from books, articles, or other publications without citing the publication and author.
- ◆ Never divulge the content of or answers to examinations to fellow students.
- ◆ Adhere to all required proctoring requirements.
- ◆ Never improperly use, destroy, forge, or alter Patten's documents, transcripts, or other records.
- ◆ Never divulge their online username or password.
- ◆ Always report any violations of this Code of Conduct to the Chief Academic Officer (nbreitling@patten.edu), and report any evidence of cheating, plagiarism, or improper conduct on the part of any student of Patten when they have direct knowledge of these activities.

Student Records and Privacy

In compliance with California Education Code Sec. 94900 and 5, California Code of Regulations Sec. 71920, Patten maintains permanent records, including transcripts, for each student. Students who wish for an official transcript may contact the Registrar at registrar@patten.edu or submit a request through the Learning Management System. Official transcripts require a processing fee.

Patten University protects the privacy rights of its students. Student education records are held confidential in accordance with the Family Educational Rights and Privacy Act (FERPA) and university best practices. Written student consent is required for access and release of student records information. Students may inspect and review their educational records upon written request to the Registrar at registrar@patten.edu. Should a student find, upon review, records that are inaccurate or misleading, the student may request that errors be corrected. If a difference of opinion exists regarding the existence of errors, a student may ask that a meeting be held to resolve the matter. Each student's file will contain the student's records, including a transcript of grades earned. Transcripts will only be released to the student upon receipt of a written request bearing the student's signature or

digital equivalent. Per CA Civil Code §1788.93, the University will not refuse to provide a transcript because the student owes a debt.

Student Complaints and Grievances

If any student has a complaint, grievance, or dispute with the University's procedures, policies, or decisions, the student has the right to seek a satisfactory resolution.

First, the student should discuss the matter directly with the instructor or a Patten staff member. The instructor or staff member will attempt to resolve the matter professionally and in good faith. If the matter cannot be settled at this level, the second step is for the student to file a written complaint to Patten Student Services, 2433 Coolidge Ave, Oakland, CA 94601, or at studentservices@patten.edu. The complaint should include a description of the specific allegations and the desired remedy, accompanied by any necessary documentation. Student Services can, if necessary, submit the complaint to the University President for final resolution. Student Services or the President will issue a formal reply to the student within ten working days.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form, which can be obtained on the Bureau's website (www.bppe.ca.gov).

Additionally, a complaint can be filed with Patten's accrediting agency, the Distance Education Accrediting Commission (DEAC), through the DEAC website (<http://www.deac.org/Student-Center/Complaint-Process.aspx>) or 1101 17th Street NW, Suite 808, Washington, DC 20036.

Students who are residents of Georgia may file a complaint with the GNPEC Office, 2082 East Exchange Place, Suite 220, Tucker, GA 30084-5305. Ph: (707) 414-3300
<https://gnpec.georgia.gov/student-resources/complaints-against-institution>

For students residing outside of California and Georgia, there may be additional resources for filing grievances/complaints. Please see the State Higher Education Executive Officers Association website: http://www.shceo.org/sheeo_surveys/.

Tuition and Fees

Students who enroll at Patten University's School of Ministry assume responsibility for the payment of all tuition and fees in accordance with the policies set forth below.

Degree and Certificate Tuition

Students are charged tuition on a per-term basis. Each term is 8 weeks in length. Tuition is \$110 per credit hour (\$330 per course).

Total estimated charges below are based on on-time completion of the program. Actual costs may vary due to transfer credit, repeated courses, or third-party costs.

Tuition must be paid by the end of Week 1, or students may be withdrawn from their coursework.

Associate Degree Program in Christian Ministry Leadership (60 credits, 20 courses)

Tuition: \$110 per credit hour or \$330 per course

Total Patten University charges for the program for students completing on time (45 credits, 15 courses): \$4,950

Additional estimated charges for third-party General Education requirements (15 credits, 5 courses): \$495²

Additional estimated charges for Textbooks: \$750

Total estimated charges (60 credits, 20 courses): \$6,195

Undergraduate Certificate Program in Christian Ministry Leadership (24 credits, 8 courses)

Tuition: \$110 per credit hour or \$330 per course

Total Patten University charges for the program for students completing on time (24 credits, 8 courses): \$2,640

Additional estimated charges for Textbooks: \$400

Total estimated charges (24 credits, 8 courses): \$3,040

² Actual charges may vary due to third-party costs, which Patten does not control. Charges are estimated based on fulfillment of five courses via [Sophia.org](https://sophia.org), with whom Patten University has established a partnership. Students may fulfill these requirements elsewhere, including via transfer credit, which may raise or lower their costs. For more information, contact registrar@patten.edu.

Withdrawals and Refunds

After the add/drop period of 7 days from the first day of the term, during which the student may [cancel their enrollment agreement](#) or adjust the number of courses for which they are registered, the student may withdraw from the University and receive a pro rata refund depending on the week of their withdrawal.

For purposes of determining a refund, a student shall be considered to have withdrawn from an educational program when he or she withdraws or is deemed withdrawn in accordance with the withdrawal policy stated in this institution's catalog. Undergraduate students who withdraw or are administratively withdrawn will receive a refund of tuition according to the following table:

Week of Withdrawal	Tuition Refund
Week 1	100%
Week 2	86%
Week 3	74%
Week 4	61%
Week 5	49%
Week 6	0%
Week 7	0%
Week 8	0%

For example, if a student in the School of Ministry is registered for 6 units and paid \$660, withdraws from the university during the fourth week of the term, the student would receive a refund of \$402.60:

$ \begin{array}{rcl} \$660.00 & \times & \begin{array}{c} 61\% \\ \text{(Student withdraws during Week 4} \\ \text{of the term)} \end{array} & = & \$402.60 \end{array} $

If the school cancels or discontinues a course or education program, the school will make a full refund of all charges.

All refunds will be paid within 30 days of cancellation or withdrawal.

If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid program funds. However, Patten does not participate in federal and state financial aid programs.

Student's Right to Cancel

Students have the right to cancel and obtain a refund of charges paid through attendance at the first class session, or the seventh day after enrollment, whichever is later.

If a student cancels their enrollment agreement, they may obtain a refund of 100% of charges paid, if notice of cancellation is made prior to midnight of the seventh day of the term. Cancellation is effective on the date the written notice is sent to the institution.

A cancellation may be effectuated by the student's written notice or by the student's conduct, including, but not necessarily limited to, a student's lack of attendance. Students wishing to cancel their enrollment agreement must be made in writing through email, mail, or fax to: Patten University, Attn: Registrar, 548 Market St PMB 98598, San Francisco, CA 94104-5401; Phone: (626) 966-4576, ext. 1003; Fax: (626) 915-1709; E-mail: registrar@patten.edu.

After the seventh day of enrollment of the term, a student may withdraw for a partial refund. See [Withdrawals and Refunds](#). All refunds will be paid within 30 days of cancellation.

Payment Plan

Domestic, undergraduate students enrolled in the School of Ministry are eligible for a payment plan that divides the tuition for each course into two equal installments. The first payment is due at the end of Week 1 of the academic term, and the second payment is due at the end of Week 5. This payment plan is available to eligible students upon request.

Graduate students, international students, and students enrolled in the School of Entrepreneurship & Technology are not eligible for this payment plan.

Student Loans

Patten University does not offer student loans and does not participate in federal or state student financial aid programs. If a student obtains a loan to pay for an education program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund.

If the student is eligible for a loan guaranteed by the federal or state government and the student defaults on the loan, both of the following may occur:

- ◆ The federal or state government or a loan guarantee agency may take action against the student, including apply any income tax refund to which the person is entitled to reduce the balance owed on the loan.
- ◆ The student may not be eligible for any other federal student aid at another institution or other government assistance until the loan is paid.

If the student has received federal student financial aid funds, the student is entitled to a refund of the monies not paid from federal student financial aid program funds. Patten University does not participate in federal or state student aid programs.

Student Tuition Recovery Fund

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school.

Questions regarding the STRF may be directed to:

The Bureau for Private Postsecondary Education
1747 North Market Blvd., Suite 225 Sacramento, CA 95834
(916) 574-8900 or (888) 370-7589

To be eligible for STRF, you must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

- ◆ The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
- ◆ You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
- ◆ You were enrolled at an institution or a location of an institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before the closure.
- ◆ The institution has been ordered to pay a refund by the Bureau but has failed to do so.

- ◆ The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
- ◆ You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
- ◆ You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Course Descriptions

ANT 220 - Cultural Anthropology

Semester Units: 3

Prerequisite: None

This course is an introduction to the study which aims to demonstrate how the basic concepts and techniques developed by cultural anthropologists help us to understand societies of various degrees of complexity, including our own. The course will consider topics such as language and symbols, kinship, gender, ethnicity, economics, politics, religion, and social change in a broad comparative framework. Major goals are an increased awareness of the social and cultural dimensions of human experience: the diversity and flexibility of human cultures; and processes of intercultural communication and conflict.

BUS 290 - Church Financial, Fiduciary and Legal Management

Semester Units: 3

Prerequisite: None

Church Financial, Fiduciary and Legal Management is designed to provide students with an understanding of basic and common legal topics that a church and non-profit organization encounter in the normal course of business, fiduciary responsibilities of church administration to parishioners, trustees, and organizational oversight, as well as, pastoral and congregational financial management and planning.

BUS 299 - Essentials of Business

Semester Units: 3

Prerequisite: None

This course is an introduction to the goals, processes, and operations of business processes. The main focus is on the functions that a company - including non-profit organizations - must manage effectively to be successful. These include accounting, finance, human resource management, marketing, operations management, and strategic planning.

CHP 101 - Cross-Cultural Evangelism

Semester Units: 3

Prerequisite: None

Cross-Cultural Evangelism examines personal soul winning evangelism theories, approaches, principles and best practices including theology of gospel evangelism. This foundational examination will inform the development of cross-cultural evangelism, principles and strategies for effective gospel communication and soul winning across cultures.

CHP 200 - Planting and Developing Healthy Churches

Semester Units: 3

Prerequisite: None

Utilizing Multiplication Network Ministries training curriculum, the Planting Healthy Churches course equips church planting practitioners and future church planters to train local leaders who already understand their culture, language and social networks, enabling them to share the Gospel more effectively than someone from another country and culture. This "training-the-trainers" approach allows many more people to multiply the gospel message strategically. The course will focus on two primary tools including church planting methodology in which leaders are challenged to plant new churches through practical skills, biblical training, mentoring and follow-up. The course also includes evaluative tools to help assess a church's health and vitality, leading to strategic planning to enter a preferred future.

CMN 120 - Next Gen: Missiology

Semester Units: 3

Prerequisite: None

This course engages academic learning and practical application regarding retention and the stopping of attrition in the local church. Academic material will cover eight main foundational elements of effective missiology within the NextGen: (1) Generation Z, (2) Effective Discipleship and Spiritual Formation (3) Adolescent Communal Life: The Power of Social Networks and Human Capital, (4) The Impact of a lethal faith: The importance of generational apologetics, (5) Effective Adolescent Communication, (6) Strategic Parent and Family Faith Qualities, (7) The Potent Role of Religious Experience, (8) The crucial moment: Adolescent conversion theories.

CMN 201 - Introduction to Preaching and Teaching

Semester Units: 3

Prerequisite: None

This course provides a focused and practical approach introducing students to the science of Homiletics and the implementation of the development and delivery of a sermon. It will integrate best practices for sermon research, research tools, sermon preparation, utilization of technology, contextualization, and sermon delivery for effective intercultural Gospel communication.

COM 146 - Communications

Semester Units: 3

Prerequisite: None

This course explores the interrelationship between speech and thought in the context of public speaking skill development. It provides students with resources and opportunities that will enhance their abilities to think through and craft well-structured speeches. Through weekly self-evaluation, and peer and instructor critique, students improve their public speaking skills and become more effective in ministry.

LDR 201 - Introduction to Leadership

Semester Units: 3

Prerequisite: None

This course introduces students to the field of leadership, providing an overview of leadership, leadership systems, and leadership ethics. Specific emphasis is given to servant leadership, application of current leadership practices in Christian Ministry contexts and integration of Christian Leadership principles within secular contexts.

NTS 225 - New Testament Biblical Literature Survey

Semester Units: 3

Prerequisite: None

A study of the New Testament Church (this includes the writing of all the New Testament books as well as the destruction of Jerusalem). The literary and historical aspects of the writing of the New Testament will be examined as well as discussion of how the New Testament church developed in the greater context of the Roman Empire (including persecution and martyrdom of the Apostles and early church believers).

OTS 225 - Old Testament Biblical Literature Survey

Semester Units: 3

Prerequisite: None

A study of the history of Israel from the Conquest of Canaan to the Second Temple period. This course combines literary and historical methodologies and sets Old Testament texts within their ancient world context. Emphasis is placed on the relationship of Israel and Yahweh, represented by prophets and other leaders of faith and its continuing relevance to believers today. Discussion of the Davidic Covenant and its messianic significance is included.

PHL 263 - Judeo-Christian Social Ethics

Semester Units: 3

Prerequisite: None

Traditional inquiries into ethics assume that there are certain principles which provide the foundation for determining the rightness, or morality, of human actions. Students study these principles and qualities embodied in the term ethics in the context of the Judeo-Christian worldview. This course seeks to establish basic principles that determine ethical behavior in society through course activities encouraging the student to become reflective upon real community needs in a way that should impact the style and content of their life, business philosophy, leadership and ministry.

PHL 270 - Comparative Worldviews

Semester Units: 3

Prerequisite: None

This course is a comparative study of the underlying assumptions behind the major worldviews across the globe. Students will explore how the concept of "worldview" relates to the search for truth and will gain a deeper understanding of how worldview intersects with global culture.

THE 160 - Gospel of the Kingdom

Semester Units: 3

Prerequisite: None

This course seeks to provide an understanding of Jesus' preaching and teaching ministry especially as it relates to the Kingdom of God by investigating the biblical principles of Christianity including the concept that the Kingdom of God has been inaugurated by Jesus Christ but is not yet consummated. Students will analyze theological issues in order to formulate their own theological framework. Additionally, students examine major biblical doctrines, including the doctrines of God, the Trinity, the Holy Spirit, Sin, Salvation and the Church.

THE 240 - Theology of Mission

Semester Units: 3

Prerequisite: THE 160

This course is designed to give students a foundational understanding of the Mission of God and how it shapes their own calling. The course examines and interprets a range of common theological issues as they relate to Christian mission, integrating them into the idea of the Mission of God in order to impart to the student a Biblical perspective on the matter of global and local mission.

WR-I - Writing Requirement I

Semester Units: 3

Prerequisite: None

Students are required to complete a college-level writing course that strengthens their writing and reading comprehension skills. These skills include college-level grammar and punctuation, identifying the characteristics, techniques, and examples of comparison/contrast and informative writing, and the application techniques for revising, editing and proof-reading. Additional skills include the basic characteristics of argumentative writing and practices for identifying reliable research.

Students may fulfill this requirement by completion of English Composition I or Workplace Writing I via Sophia at patten.sophia.org; or by completion of a comparable course at an accredited college, or by transfer credit. For guidance on completing this requirement, contact registrar@patten.edu.

WR-II - Writing Requirement II

Semester Units: 3

Prerequisite: WR-I Writing Requirement I

Students are required to complete a college-level writing course that strengthens their knowledge of research techniques for academic writing. Skills covered include the application of the basics of research writing, meaningful analysis in research, integrating research according to citation conventions, and improving revising, editing and proofreading skills.

Students may fulfill this requirement by completion of English Composition II or Workplace Writing II via Sophia at patten.sophia.org; or by completion of a comparable course at an accredited college, or by transfer credit. For guidance on completing this requirement, contact registrar@patten.edu.

QR-I - Quantitative Reasoning

Semester Units: 3

Prerequisite: None

Students are required to complete a college level Quantitative Reasoning course such as College Algebra or Statistics. Skills covered in College Algebra are the ability to perform mathematical functions using real numbers, the application of mathematical concepts to linear equations, inequalities, and series/sequences, the application of mathematical concepts to algebraic expressions and quadratic equations. Skills covered in Statistics include the identification of key principles of statistical reasoning and methods, and the application of concepts of data and data representation in a real world context.

Students may fulfill this requirement by completion of College Algebra or Introduction to Statistics via Sophia at patten.sophia.org; or by completion of a comparable course at an accredited college, or by transfer credit. For guidance on completing this requirement, contact registrar@patten.edu.

SC-I - Natural Science Requirement

Semester Units: 3

Prerequisite: None

Students are required to complete a college-level Natural Science course such as Physics, Chemistry, Geology or Biology. Skills to be covered include the ability to use and interpret graphs and charts, the application of principles of earth science, ecology, and conservation and an analysis of environmental issues, policies and solutions; or, the ability to describe basic human biology concepts, and skeletal and muscular systems, and the various systems related to human health; or, the ability to understand structures and properties of matter, the history and context of chemical investigation, measurement, and problem-solving, and the ability to distinguish and characterize the properties of different states of matter, solutions, acids and bases.

Students may fulfill this requirement by completion of Environmental Science, Human Biology, or Introduction to Chemistry via Sophia at patten.sophia.org; or by completion of a comparable course at an accredited college, or by transfer credit. For guidance on completing this requirement, contact registrar@patten.edu.

SS-I - History/Social Science Requirement

Semester Units: 3

Prerequisite: None

Students are required to complete a college-level History or Social Sciences course such as Government, Economics, or Sociology. Skills to be covered in Sociology include: the ability to describe various methods and benefits used to research and study society, the impact of bias, status, roles and social structures on interaction with others, the effects of social constructs such as race, ethnicity and gender, and the ability to compare/contrast different types of economies. Skills covered in US History include: the impact of economic downturns, the impact of technology, problem solving and agility on a changing workplace, medical innovations and communication technologies; and issues related to immigration, freedom, civil rights, social justice and equality for women.

Students may fulfill this requirement by completion of Introduction to Psychology, Introduction to Sociology, Macroeconomics, Microeconomics, Topics in US History, US History I or US History II via Sophia at patten.sophia.org; or by completion of a comparable course at an accredited college, or by transfer credit. For guidance on completing this requirement, contact registrar@patten.edu.

APPENDIX I

Standard Occupational Classification Codes

While the University does not guarantee job placement, advancement, continued employment or level of income or wage rate upon program/course completion or graduation, in compliance with 5 CCR §74112 (d)(3), the University has identified the job classifications that each degree or certificate program may prepare its graduates for using the United States Department of Labor's Standard Occupational Classification codes (SOC).

School of Entrepreneurship & Technology

Bachelor of Science in Data Science	
<u>Occupation</u>	<u>SOC Code</u>
Business Intelligence Analyst	15-2051.01
Database Analyst	15-1242.00
Data Warehouse Analyst	15-1243.01
Data Management Manager	15-2051.02
Systems Analyst	15-1211.00
Analyst Programmer	15-1251.00
Technical Support Specialist	15-1232.00
Systems Administrator	15-1244.00
Web Architect	15-1255.00

Bachelor of Science in Software Engineering	
<u>Occupation</u>	<u>SOC Code</u>
Data Engineer	15-1243.00
Data Warehouse Solution Architect	15-1243.01
Software Developer	15-1252.00

Mission

The mission of Elmwood Institute is to develop, inspire, and empower leaders to effect global and community transformation by delivering accessible, rigorous, and practical distance education in the areas of leadership, management, entrepreneurship, and technology.

About Elmwood Institute

Elmwood Institute is a division of Patten University, which was founded in 1976 and is a private, non-profit institution owned by Patten Educational Foundation ("PEF"). Patten University is accredited by the Distance Education Accrediting Commission.

Elmwood Institute seeks to expand students' ability to think critically and independently, acquire leadership skills and management skills, and develop technological competencies. The institution is committed to preparing students to pursue their academic and career goals while helping them integrate social responsibility, ethical behavior, and leadership into all areas of their lives. The institution strives to serve students from a broad range of ethnic, geographic, and socioeconomic backgrounds.

The institution is dedicated to recruiting and retaining faculty and staff who are committed to mentoring and coaching, who demonstrate integrity through scholarship, institutional improvement, and service to the larger community, and employ innovative technologies and teaching methods that meet the needs of 21st-century learners. In its recruitment and retention of students, faculty, and staff, Elmwood Institute maintains openness to all qualified persons and encourages academic freedom and diversity within the context of its core values of learning and community.

Elmwood Institute is a division of Patten University, which was previously named American Graduate University, and is separate from the other institution named "Patten University" founded by PEF that operated until 2020.

Since 1944, Patten Educational Foundation founded, operated, and supported several educational institutions, including Oakland Bible College, Patten Academy (a K-12 school), Prison University Project, Patten University, and Elmwood Institute (a division of Patten University).

Elmwood Institute Goals

- ◆ Meet the increasing demand for ethical leadership through relevant and rigorous education.
- ◆ Provide educational delivery methods that are flexible, student-centric, and cost-effective.
- ◆ Provide exemplary service to students, demonstrating a commitment to diversity and inclusion in a global environment.
- ◆ Foster an environment that encourages faculty and student engagement and uses feedback from its community to continuously improve the quality of its instruction, technology, and services.

Elmwood Institute Objectives

The general objectives of Elmwood Institute are to provide for each student:

1. A foundation in ethical leadership and management principles applicable to the operation of any venture, business, or non-profit organization.
2. The opportunity for students to actively apply ethical leadership principles to their relevant field of study or chosen career.
3. A deeper comprehension of his or her own worldview in relation to leadership, business or leadership or management.
4. An increased awareness of the economic, political, technological, and social environment of business and leadership within a global context.
5. An increased ability to think critically and ethically, demonstrating improved levels of written, oral, quantitative, and technology based communication skills.
6. An enhanced capacity for research through increased breadth of knowledge, critical analysis and synthesization skills.

Location

The institution is headquartered at 2433 Coolidge Ave, Oakland, California 94601.

Hours of Operation

The institution is open Monday through Thursday, 9:00AM to 5:00PM and Friday 9:00AM to 2:00PM (Pacific Time).

Accreditation and Approvals

Distance Education Accrediting Commission

Elmwood Institute, a division of Patten University, is accredited by the Distance Education Accrediting Commission (DEAC).

The Distance Education Accrediting Commission is listed by the U.S. Department of Education as a recognized accrediting agency. The Distance Education Accrediting Commission is recognized by the Council for Higher Education Accreditation (CHEA).

Required statement per CEC § 94909 (a)(3)(D)

"The Office of Student Assistance and Relief is available to support prospective students, current students, or past students of private postsecondary educational institutions in making informed decisions, understanding their rights, and navigating available services and relief options. The office may be reached by calling (888-370-7589) or by visiting (www.bppe.ca.gov)."

Required statement per CEC §94909(a)(12):

Elmwood Institute does not have a pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, and has not had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C. Sec. 1101 et seq.).

Leadership

Board of Trustees

Elmwood Institute is a wholly owned subsidiary of Patten Educational Foundation, a California nonprofit corporation with a rich history of operating accredited educational institutions. The members of the Board of Trustees of Patten Educational Foundation govern the institution and have backgrounds in industry and higher education appropriate for the institution.

The responsibility of the Board of Trustees is to appoint all members of the Elmwood Board of Managers, review and approve all decisions of the Elmwood Board of Managers, and review and approve the annual budget, strategic plan, and institutional policies of Patten University, of which Elmwood Institute is a Division. The current members are:

Pastor Tobey Montgomery, Chairman

Dr. Gary Moncher, President

Dr. Sharon Anderson, Trustee

Larry Walker, Trustee

Board of Managers

The responsibility of the Board of Managers is to serve at the pleasure of the PEF Board of Trustees, appoint the Executive Director of Elmwood Institute, and review and approve the annual budget, strategic plan, and institutional policies of Elmwood Institute.

J. Eric Wright, MBA

Andrew Powell, MBA

William R. Cockayne, Ph.D.

Eugene V. Wade, MBA, J.D.

Jennifer Henry, MBA

Administration

Jennifer Henry, Executive Director

Dr. Keith Wade, Director of Education

Dr. Nathan Breitling, Chief Compliance Officer

Ilona Kreynis, VP of Finance

Laurie Tarlos, Director of Admissions and Student Achievement

Cathy Diaz, Registrar and VP of Operations

Board of Advisors

Elmwood Institute values the input and oversight of independent leaders and practitioners. To ensure consistent input and review of the curriculum and outcomes of its programs, Elmwood Institute maintains a Board of Advisors. The Board of Advisors represent all industries related to the institution's graduate curricula. This Board meets annually to review program outcomes and provide recommendations for curricula and course materials.

The current members are Byron Chung, MBA, Anthony Duran, and Vishal Shah, Ph.D.

Faculty

Faculty at Elmwood Institute are selected for their subject matter expertise, their innovative teaching techniques, and their ability to integrate theory and practice. The faculty of the institution have deep research and extensive practical experience in their respective areas, and have diverse personal, professional, and academic backgrounds.

Benjamin Perez, B.A., National University, M.S., National University, D.B.A., California Southern University – Professor, Devry Inc. & University of Phoenix.

◆ Area of Focus: Project Management program, Business, IT

Rob Shah, CPA, B.S., Arizona State University, M.B.A., Keller Graduate School of Management, PH.D., Northcentral University.

◆ Area of Focus: Business, General Management

Geoffrey VanderPal, B.S., Columbia College, M.B.A., Webster University, D.B.A., Nova Southeastern University, CFP®, CTP®, PMP®, SHRM-CP, CHRM-SCP – Professor, Author, and Entrepreneur.

◆ Area of Focus: Business, Contract Management, Project Management

Keith Wade, B.A., Oakland University, M.B.A., University of Detroit-Mercy, Ph.D., Argosy University – Consultant.

◆ Area of Focus: Supply Chain Management, General Management

Student Services

Elmwood Institute offers academic advising, including course requirement reviews, course scheduling, registration assistance, course sequencing advising, and other related requests for student assistance. Placement assistance is not offered.

Housing

Elmwood Institute does not provide housing, dormitory facilities, or assistance in locating housing for its students. However, in compliance with Cal. Code Regs. Tit. 5, § 71810(b)(13)(b), private housing is available on the open market. Median monthly rent in Oakland ranges from approximately \$1,490/month (for a studio apartment) to \$2,500/month (for a 3-bedroom apartment).

Online Library Services

Elmwood Institute is a member of the Library and Information Resources Network (LIRN). LIRN provides a core library collection with access to:

- ◆ **Gale Cengage:** Over 40 databases including Academic OneFile, Business Collection, Business Economics and Theory Collection, Business Insights: Global, Computer Database, Gale Ready Reference Shelf, Gale Virtual Reference Library, Global Issues in Context, Information Science and Library Issues Collection, InfoTrac Newsstand, LegalTrac, Military and Intelligence Database, and the Student Resources in Context.
- ◆ **ProQuest Central:** Access to several databases with 13,000+ full-text scholarly journals; 6,500+ full-text magazines and trade journals; 2,300+ full-text newspapers; 385,000+ market and industry reports.
- ◆ **EBook Central:** Provides students with an instant, multidisciplinary library of eBooks from authoritative publishers.
- ◆ **Additional Internet Resources:**
 - **ProQuest Dissertation and Theses:** Contains over 5 million citations and 3 million full-text works from thousands of universities.
 - **ABI/Inform:** Access to thousands of full-text journals, dissertations, working papers, and key business and economics periodicals.
 - **IBISWorld:** Provides market research on thousands of industries worldwide to research involving case studies or business sector analysis.
 - **Directory of Open Access Journals:** Access to full text, quality controlled scientific and scholarly journals, covering all subjects and many languages.
 - **ERIC:** A comprehensive, easy-to-use full-text database of education research and information.

Access to the online library services is 24 hours per day, 7 days a week. A qualified librarian is available for any research needs.

Career Services

Elmwood Institute does not offer career services. It does not guarantee job placement, advancement, continued employment, or level of income or wage rate upon program/course completion or graduation. Nonetheless, in compliance with 5 CCR §74112 (d)(3), Elmwood has identified the job classifications that each degree program may prepare its graduates for using the United States Department of Labor's Standard Occupational Classification codes (SOC).

The corresponding roles and SOC codes can be found in [Appendix I](#).

Degree Program

Master of Leadership and Management

Today's management environment is exceptionally turbulent. Resources are scarce, technology advances rapidly, requirements and perceived needs change quickly, the global marketplace is very competitive, and the laws and regulations are becoming more numerous and more complex.

Today's managers, both in industry and government, must have two essential elements to respond effectively to the changing environment. The first is a personal value system appropriate to the problems and human expectations of the times. The second is the ability to understand and interpret basic leadership and management disciplines and technological, environmental, and political trends to achieve organizational and societal goals.

Elmwood Institute serves as an institution of higher learning for persons engaged in the areas of leadership, management, and business. The function of the institution is to define and provide the education for successful participation in those fields. Students may take individual courses as their needs dictate, or they may participate in the institution's degree programs.

Elmwood Institute offers a rigorous and intellectually demanding program leading to a Master of Leadership and Management (MLM) degree. The institution's programs are completely structured, extensively researched and documented educational programs, organized and conducted by a professional faculty with an extensive practical and theoretical background. These rigorous programs produce a management education of substance, quality, and considerable market value.

The programs of the institution provide a choice of plans for the educational development of managers based on the needs and obvious career channels of the individual firm or agency and the industry. This approach is designed to reduce the waste of scarce educational time and dollars in attendance at random courses and seminars. The program is organized so that individual managers can be the principal determinants as to what happens to them educationally, within the parameters of the needs of their organization and industry, so that their education will have meaning to all three.

Instructional Modality

The MLM program features an online, self-paced modality, providing a high-quality and convenient method of pursuing a graduate degree. This distance education program is designed for the adult who has family, job, and community responsibilities.

Courses can start each month, and are offered in 16-week terms. Students engage with the material and interact with faculty via the institution's learning management system. Student work is typically

graded within 72 hours of submission, and results are available immediately within the Learning Management System.

Course material is structured progressively, such that learning moves from the simple to the more complex, with review exercises and low-stakes assessments offered frequently to ensure that students can easily absorb the material. Additionally, several case studies and exercises are assigned in each course, illustrating actual, real-world problems. The major objectives of the cases and exercises are to encourage the student to engage in independent thinking, apply their learning to real-world situations, and assist in developing skills in using the knowledge imparted in the course.

Purpose of the Program

It has been said that a person can be a leader or a manager. The modern world requires that, for success in any field, people have the knowledge and skills of both. This program provides a broad-based education in leadership and management principles and practices that will enable working professionals to navigate the ever-changing world of complex organizations. The program combines the traditional approaches of leadership and management with the emerging ideas necessary for leading organizations in the 21st century.

The program provides a holistic perspective to the fields of leadership and management. Certain courses explore more specialized areas such as organizational development, behavior and change management, cross-cultural management, leading innovation, negotiation and conflict management, and team building. Other courses provide a detailed knowledge of the quantitative and qualitative tools for research, critical thinking, and decision-making.

The MLM program is designed to produce superior leaders with a management background and increased skills for today's marketplace.

Program Learning Outcomes

The overall objectives of this program are for the student to be able to:

- Analyze and interpret key concepts, theories, and practices in management and leadership, integrating knowledge from diverse disciplines.
- Evaluate and apply ethical principles in communication, decision-making, and leadership, fostering integrity and authenticity in organizational settings.
- Synthesize strategies that promote creativity, adaptability, and change, while effectively navigating conflict and negotiation in diverse organizational environments.
- Design and conduct rigorous business research and critically assess organizational behaviors and human resource strategies to enhance team dynamics and performance.
- Integrate cross-cultural management practices and critical thinking in leadership roles, promoting inclusivity and informed decision-making.

Program Length

The Master of Leadership and Management requires the completion of 36 credits. The degree program is typically completed in three (3) years. This duration may vary depending on individual course load and any prior credits transferred. The time limit for completing the degree program is seven (7) years.

Degree Requirements

The Master of Leadership and Management program is organized into a curriculum of leadership and management courses that stress the core principles and practices as well as new approaches to leading and managing any organization.

The student must complete a total of twelve (12) courses totaling a minimum of 36 semester credits and then complete a program Comprehensive Examination or complete an approved Final Project within seven years of enrollment in the program.

The courses may all be taken through distance education. Please see the [Tuition and Fees](#) section for course fees or visit Elmwood Institute's website at www.elmwoodinstitute.org.

Master of Leadership and Management	
◆ BUS 602 - Essentials of Management ◆ BUS 607 - Communications and Ethics ◆ LDR 611 - Leading Creativity and Innovation ◆ BUS 612 - Leadership Principles and Practices ◆ PMP 636 - Negotiation and Conflict Resolution ◆ BUS 653 - Business Research Methods ◆ BUS 659 - Organizational Behavior and Human Resources ◆ LDR 668 - Cross-Cultural Management	◆ LDR 669 - Critical Thinking and Decision Analysis ◆ LDR 670 - Organizational Theory, Design and Change ◆ PMP 671 - Building and Managing Project Teams ◆ LDR 676 - Advanced Approaches in Leadership
– Comprehensive Examination or institution-approved Final Project is required. – Each course is 3 semester units. – Program requires completion of 36 semester units.	

Comprehensive Exams and Final Projects

In partial fulfillment of their degree requirements, Elmwood Institute Master of Leadership and Management degree candidates must complete a Final Project or Comprehensive Exam.

The Comprehensive Examination requires students to rigorously review their entire course of study, while the final project requires students to combine their academic experience with their life and business experience and successfully develop and implement a new effort in a real business situation. Both the Comprehensive Examination and the project provide students with outstanding learning experiences from which to expand and apply their professional skills. The project, however, can be a more rigorous and demanding undertaking.

The Comprehensive Examination takes an average of 60 hours to complete. Elmwood Institute requires that the exam be completed within 50 days of the student's receipt of the examination package. In comparison, acceptable final projects tend to take comparatively more time and commitment to complete due to the necessary planning, research, development, writing, and review process. Students have 120 days to complete the project, not including final review.

Comprehensive Exams

Students who approach their date of graduation will be contacted in advance to prepare for and schedule their Comprehensive Exam. Comprehensive Exams may consist of multiple-choice questions, essays, and multiple case studies unique to the student's program of study.

Comprehensive Exam Learning Outcomes

By completing a Comprehensive Exam in fulfillment of an Elmwood Institute Master's Degree, students will be able to:

1. Demonstrate their structured knowledge of leadership, management, and/or program management principles and practices.
2. Analyze real-world scenarios, applying knowledge in skill to solve real problems commonly encountered in leadership, management, or project management.
3. Evaluate the organizational impact of multiple techniques used in leadership, management, or project management.

Final Projects

The final project, as defined by Elmwood Institute, is the development, implementation, documentation, and analysis of a new business undertaking. Examples might be the development of a business plan for a new business unit, the development and implementation of a contract analysis and negotiating position, the development of a program or project plan, or the development and implementation of a new business process. Projects are limited only by the innovation and resources of individual students.

All project proposals must pass Elmwood Institute's review process.

Final Project Learning Outcomes

By completing a Final Project in fulfillment of an Elmwood Institute Master's Degree, students will be able to:

1. Apply their structured knowledge of leadership, management, and/or program management principles and practices to a real-world business problem;
2. Demonstrate the role that research, critical analysis, and quantitative business skills play in the evolving business environment; and
3. Create a cogent, well-supported business proposal that reflects a deep understanding and awareness of today's competitive marketplace.

Project Proposal

The first step in the project approval process is the project proposal. Degree candidates must petition Laurie Tarlos, Director of Admissions and Student Achievement (laurie@elmwoodinstitute.org) for project approval in writing. This communication should contain a short description of the project.

The Director of Admissions/Student Achievement will forward the student's request to the Director of Education, who will appoint a Faculty Advisor for the project. The faculty advisor will review the request and recommend to the CAO approval of the topic, or request additional information on the topic.

Within 21 days of being notified, candidates must submit a detailed project proposal outlining the project to the Faculty Advisor. Project proposals must include a detailed explanation of the project to include:

Purpose of the Project

This element is the basis for the project and outlines what the project intends to accomplish and its business purpose.

Background of the Project

This element covers why the project is important in the short-term or long-term success of the business or government organization. What goals can be expected to be reached?

Research

What needs to be known? How will the information be obtained? What methods will be used?

Schedule

What milestones must be reached? At what milestone will the project be implemented or completed?

Results and Benefits

What specific results and benefits are anticipated? How will they be measured?

If the project is assigned as part of the student's regular business activities or will become part of a business at which the student is employed, a letter from the candidate's immediate supervisor approving the effort is required.

Projects that do not directly affect a current business activity may require a defense by the student as to the importance of the project as related to the education of the student or to the body of knowledge of the project's subject area.

Project Guidelines

Although all projects are unique, they will include some required elements. Each project will be designed in conjunction with the faculty advisor and must meet the approval of the evaluation committee.

A sample outline for the project report is furnished below. Also, the student is referred to the "Presenting Insights and Findings: Written and Oral Reports" in the BUS 653 Business Research Methods. An additional source is the "Research Project Guide" on the Oxford University website at: https://fdslive.oup.com/www.oup.com/orc/resources/xedition/brymanbrm4exe/student/project_guide/index.htm

Project Report (Sample Outline)

The body of the project report should be between 30 and 50 pages in length. A sample outline is presented below:

- Title Page
- Executive Summary
- Table of Contents
- List of Figures
- List of Tables
- Introduction
 - Purpose of project
 - Describe the problem
 - Why is this analysis appropriate?
 - Importance of the problem
 - The scope of the review
 - How the results of the review will be applied
 - Identify the research questions you hope to answer
- Methodology
 - Identify the method used to identify and locate sources
 - Explain the rationale used for selecting the sources to analyze
 - Explain the procedures to be used for analyzing the sources
 - Identify the criteria for evaluating the information found
- Analysis and Discussion (general points to consider)
 - Present evidence and ideas from sources
 - Concepts are organized by subtopics
 - Sources are grouped by concepts instead of individual entities
 - Grouping may be related to research questions
 - Validity of sources is stated to support your ultimate answers to your questions
 - Cite each of your statements by placing the number(s) identifying the reference(s) that support your statement
- Conclusions and Recommendations
 - Identify and synthesize findings

- Systematically answer your research questions
- Provide recommendations for:
 - Future research
 - Applications
 - Policies and procedures
 - Program revisions
 - Other warranted situations
- References
 - List each of your references using APA format (<https://apastyle.apa.org/>)
 - Number each of your references so you can cite your evidence in the Analysis and Discussion section.

Project Schedule

Like all business endeavors, the project must have a realistic schedule that also dovetails with the 120-day project schedule. Projects needing greater time periods may be too extensive for the educational goals of the student and Elmwood.

The schedule, with major milestones, must be submitted to the faculty advisor within 21 days of the project's approval. Each part of the project – each milestone, each project chapter, or each section – must be submitted to the faculty advisor for approval as they are completed. Students may, of course, continue project work while the advisor is reviewing the project submissions. Each project section will not be considered finished until the section has been approved by the faculty advisor.

It may be that there will be faculty changes or suggestions that will be returned to students for evaluation and revision. Where appropriate, these changes must be instituted before the section is considered complete. All project sections must be completed before the project can be considered completed and credit earned. Following successful completion of the project, the student may petition for the awarding of the degree.

The difficulty of a project often leads to students underestimating the amount of time needed to complete it. In certain instances, students may petition for additional time to complete the project. Such requests are not granted automatically, and students must prove that the additional time is needed due to business situations, rather than a lack of planning or underestimation of resources by the student.

The goal of Elmwood Institute is not to force students to conform to a specific schedule for completion, but rather to avoid projects stretching out to unmanageable lengths. That is why Elmwood forces a realistic evaluation of projects prior to approval.

Submission of Copies

Following completion of the project, the student is required to submit the project in a professional format. The final document will be archived in Elmwood Institute's records. Elmwood reserves the right to cite and quote from the final document.

Faculty Advisor

Since all projects are unique, much project design and structure will be developed with the faculty advisor. Students will be able to communicate with their advisor by email, telephone, or video call.

Questions

Any questions concerning the final project should be addressed to the Director of Education at keith@elmwoodinstitute.org or (877) 351-9060 Ext. 1100.

Academic Calendar

Elmwood Institute utilizes a flexible, overlapping term-based structure. Students may enroll in a term at the beginning of each month. Each term is 16 weeks in length, although students have access to course materials and faculty during the week after the course ends. Students may enroll in one to four courses per term (3 to 12 semester credits). Students have access to all course materials and faculty during the week after the term ends.

Term	Term Start Date	Add/Drop Deadline	Last Date to withdraw with a W	Term End Date
January 2025	1/1/2025	1/8/2025	3/24/2025	4/22/2025
February 2025	2/1/2025	2/8/2025	4/25/2025	5/23/2025
March 2025	3/1/2025	3/8/2025	5/23/2025	6/20/2025
April 2025	4/1/2025	4/8/2025	6/23/2025	7/21/2025
May 2025	5/1/2025	5/8/2025	7/23/2025	8/20/2025
June 2025	6/1/2025	6/8/2025	8/23/2025	9/20/2025
July 2025	7/1/2025	7/8/2025	9/22/2025	10/20/2025
August 2025	8/1/2025	8/8/2025	10/23/2025	11/20/2025
September 2025	9/1/2025	9/8/2025	11/23/2025	12/21/2025
October 2025	10/1/2025	10/8/2025	12/23/2025	1/20/2026
November 2025	11/1/2025	11/8/2025	1/23/2026	2/20/2026
December 2025	12/1/2025	12/8/2025	2/22/2026	3/22/2026

Official Holidays

All offices are closed on:

- Martin Luther King Jr. Day
- President's Day
- Memorial Day
- Juneteenth
- Independence Day
- Labor Day
- Thanksgiving Day and the Friday following Thanksgiving
- Christmas Eve through the first business day after New Year's Day.

Students still have access to the Learning Management System and their coursework during holidays.

Admissions

Statement of Non-Discrimination

Elmwood Institute admits students of any race, color, religion, sex, age, national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to the students of the institution. It does not discriminate on the basis of race, color, religion, sex, age, handicap, disability, marital status, national and ethnic origin, nor any other characteristic protected under applicable federal, state, or local law in administration of its educational policies, admission policies, and other school administered programs.

Admission Requirements

Degree Requirements

To be admitted into a Master's degree program, students must hold a Bachelor's degree from an institution accredited by an institutional accrediting agency recognized by the United States Department of Education, or its international equivalent. Three years of work experience is recommended, but not required.

Elmwood Institute is dedicated to providing an exceptional educational experience through a selective enrollment process. The institution carefully reviews each application to ensure a match between its program and the needs of its students. This process aims to cultivate a community of learners who are committed to academic excellence and personal growth. As a result, Elmwood does not accept every applicant, but rather strives to build a diverse and motivated student body that will thrive within the school environment.

Official Transcripts

Official transcripts must be sent directly from colleges or universities. Electronically-issued transcripts and other documentation can be sent to admissions@elmwoodinstitute.org.

Paper-based transcripts and records should be sent to:

Elmwood Institute - Transcript Office
548 Market St PMB 98598
San Francisco, CA 94104-5401

Foreign Educational Credentials

An applicant who has completed university-level courses in a foreign country must have their educational credentials evaluated and sent to Elmwood Institute. The evaluation must also include the

original transcript. If the transcript is not in English, a translation must be provided. Three reputable foreign credential evaluation service providers are suggested below.

World Education Services (WES – <http://www.wes.org/>)
 Educational Credentials Evaluators, Inc. (ECE – <http://www.ece.org/>)
 International Education Research Foundation (IERF – <http://www.ierf.org/>)

Note that while Elmwood Institute accepts students from foreign countries, it does not currently provide visa services. It provides enrollment verification services upon request at no charge.

Proof of English Proficiency

Elmwood Institute courses are offered in English. Proof of English proficiency from students for whom English is not their native language is required. Students who have earned at least 30 credits from an internationally recognized college or university in which English was the language of instruction may have this requirement waived. In this instance, an average grade of C or higher is required for undergraduate admissions, while an average grade of B or higher is required for graduate admissions.

English Language Proficiency Test	Minimum Scores	
TOEFL iBT - https://www.ets.org/toefl.html	Master's:	71
<u>How to Submit:</u> Select Elmwood Institute or Designated Institution Code D845		
IELTS - https://www.ielts.org	Master's:	6.5
<u>How to Submit:</u> Account Name: Elmwood Institute Address: Admissions and Registrar 548 Market St PMB 98598 San Francisco, CA 94104 Score Delivery: E-Delivery		
Duolingo - https://englishtest.duolingo.com/applicants	Master's:	100
<u>How to Submit:</u> See: https://englishtest.duolingo.com/applicants		
Pearson Test of English (PTE) - https://www.pearsonpte.com/	Master's:	50
<u>How to Submit:</u> 1. Select Elmwood Institute as an official test score recipient from PTE's database of institutions. OR 2. Send your Score Report Code to admissions@elmwoodinstitute.edu		

Technology Requirements

To fulfill the requirements of the Elmwood Institute course curriculum, all students are required to have access to an internet-enabled device with a web browser, an email account, a word-processing program, and a spreadsheet program. Microsoft Office or Google Suite is sufficient.

Admissions Policies

Application Instructions for Admission

The application may be found on the Elmwood Institute website at www.elmwoodinstitute.org.

Elmwood Institute is not an open-enrollment institution. After submitting an application, applicants are assessed on their motivation, goals, and research interests via a questionnaire or interview.

Accommodations for Students with Disabilities

Applicants and prospective or current students with disabilities who require adjustments and/or auxiliary aids throughout the admissions process, and/or throughout their studies, should contact the Admissions Department (admissions@elmwoodinstitute.org) for assistance. It is the student's responsibility to request accommodations and to provide current and supporting documentation from a medical doctor or clinician explaining the nature and limitations of their disability. Elmwood Institute will work with the person to make reasonable accommodations and adjustments to enable him/her to fully participate in the admissions process and educational programs.

Transfer Credit

Students may receive transfer credits for courses completed at other accredited educational institutions. Approval for specific courses will be determined individually, based on the breadth, scope, organization, and quality of the coursework in relation to the courses required by Elmwood Institute. Applicants seeking such evaluations must provide official transcripts from the transferring institution. The transfer credit is solely at the discretion of Elmwood Institute, as course content and instructional quality can vary between institutions.

Elmwood will consider transfer credit earned at institutions of higher education outside of the United States that are recognized by the Ministry of Education or equivalent authorizing agency, provided that such credits have been earned through university-level coursework and are presented with equivalent grades of "A," "B," or "C." Such credit must be evaluated by an international transcript evaluation service unless they are earned at an institution that is accredited by a U.S. Department of Education or CHEA-recognized accreditor. The Office of Admissions and/or the Office of the Registrar will make the final determination of the award and applicability of any international credit. A certified course-by-course evaluation from an organization recognized by Elmwood is required for all post-secondary level studies completed outside of the United States at institutions that are not accredited, or if the transcript is not in English. GPA and degree equivalencies must be included with

your course-by-course evaluation. All fees charged by translators or external evaluators must be paid by the student. Recognized transcript evaluation organizations include:

- [Educational Credential Evaluators](#) (ECE)
- [World Education Services](#) (WES)
- [SpanTran: The Evaluation Company](#)
- [International Education Evaluations, LLC](#) (IEE)
- Or any company recognized by the [National Association of Credential Evaluation Services](#) (NACES)

Only grades of B or higher will be considered for graduate credit. Transfer credits that are recognized and accepted by Elmwood Institute are not factored into the calculation of the student's grade point average.

No more than 50% of the credits required for a Master's degree may be fulfilled via transfer credit.

If an applicant's request for graduate-level transfer credit is denied, they may appeal the decision to the Elmwood Institute Director of Education (keith@elmwoodinstitute.org). The appeal should include the name of the Elmwood Institute course, the name of the institution, the previous course taken, and a detailed explanation, with supporting material, of why the applicant believes the course taken at another institution is similar in content to the Elmwood Institute course.

Experiential Credit/Credit for Prior Learning

Elmwood Institute does not accept credit for prior learning or experiential credit. Credit must come from a recognized, accredited institution or from a provider with whom Elmwood Institute has an articulation agreement.

First Term Registration

A newly accepted student at Elmwood Institute must enroll in their first term within 90 days of acceptance. A student is subject to unenrollment from the institution if they do not meet this requirement.

Provisional Admission and Term Registration Policy

Applicants who are unable to provide final official documents during the application process may be granted provisional admission. Under this status, applicants are permitted to register for one term of coursework while completing their application requirements. Enrollment in subsequent terms will not be allowed until all missing documentation has been submitted and verified.

Student Verification

Students are required to submit a government-issued photo ID as part of their application. The photo ID will only be used to verify identity throughout the program. All students are issued a student ID number.

Notice Regarding Transferability of Credits Earned at Elmwood Institute

The transferability of credits you earn at Elmwood Institute is at the complete discretion of an institution to which you may seek to transfer. Acceptance or recognition of the degree you earn is also at the complete discretion of the institution to which you may seek to transfer. If the credits or degree that you earn at Elmwood Institute are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at Elmwood Institute will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Elmwood Institute to determine if your credits or degree will transfer or be recognized.

Academic Policies

Academic Load

Students may take between one and four courses per term (3 to 12 semester credits). A full-time course load is considered three or more courses (9+ semester credits) per term; a part-time course load is considered two or fewer courses (6 or fewer semester credits) per term. Because of the significant workload associated with graduate-level courses, students should consult with the Director of Admissions and Student Achievement *before* registering for more than three (3) courses in a term.

Each term is 16 weeks in length. Students have access to all course materials and faculty during the week after the term ends.

Credit Hour Definition

Elmwood Institute utilizes the commonly accepted definition of semester credits (also referred to as “units”) to measure its academic courses and programs. One semester credit is the equivalent of 15 hours of academic engagement and 30 hours of preparation. Accordingly, each 3-unit course offered by Elmwood Institute is normally achieved via 45 hours of academic engagement and 90 hours of preparation.

Grading Policy

The course grade is the weighted average of the individual course module assignments, quizzes, midterm examinations, projects, final papers, and/or final examinations as determined by the course syllabus. In most courses, the lesson examinations (which may include a project) are worth approximately 80%, while the final examination is worth approximately 20%. Elmwood Institute calculates grades numerically, which are then converted to final letter grades. Students must receive a minimum grade of 80% for each course.

Grades	Quality Points
A (90-100%)	A = 4.0
B (80-89%)	B = 3.0
F (Below 80%)	F = 0.0

Students may view their grades at any time by logging into the Learning Management System.

Grade of “W” (Withdraw)

Graduate students may be issued a grade of W (Withdraw) if they withdraw by midnight of the last day of Week 12 of the term (see [Academic Calendar](#)). The grade of W does not factor into the calculation of a student’s GPA.

Grade of "F/I" (Fail/Incomplete)

Students who withdraw after the Week 12 deadline will receive the grade of F/I (Fail/Incomplete). The grade of F/I is worth zero quality points and does factor into a student's GPA.

Grade of "I" (Incomplete)

A grade of I (Incomplete) may be granted, under rare circumstances, only if a student has attempted at least 60% of points for graded coursework, can provide a serious and compelling reason for an extension of the regular term length, can mathematically pass the course with a satisfactory grade on any outstanding assignment(s), and is not on academic probation.

Students must request the "Incomplete" from the course instructor and Director of Admissions and Student Achievement prior to attempting the final summative assignment of the course, who will jointly determine if an incomplete grade is warranted. Students may be allowed up to 21 days from the end of the term to resolve an incomplete, after which time the grade will be calculated based on the total points earned. A student is allowed only one attempt on a final project or final exam within the incomplete period.

Repeating Courses

A student may choose to repeat a course if they have received a non-passing grade or if it is necessary to raise their GPA to meet the Elmwood Institute's Scholastic Standing policy. When a student repeats a course and receives a higher grade, the higher of the grades will be used for calculating the GPA. Repeated courses are subject to tuition as calculated at the per-credit rate for the student's program, as detailed in the Enrollment Agreement.

Registration and Adding/Dropping of Courses

Students may self-register in Elmwood Institute's Learning Management System, or may be registered by the institution's Registrar. Students are free to add and drop classes prior to the seventh day of the term (see [Academic Calendar](#)).

To drop a class after this deadline, or to withdraw from Elmwood Institute, students must contact the Registrar at registrar@elmwoodinstitute.org.

Proctoring

Elmwood Institute requires proctored quizzes and examinations at regular intervals throughout its programs. Proctors may not be a past or present family member, a work subordinate, a current/previous student of Elmwood Institute, or related to a current/previous student of Elmwood Institute.

Before taking a proctored quiz or examination, both students and proctors electronically attest that they do not have a relationship that would call into question the proctor's impartiality. The proctor must additionally electronically submit a Proctor Attestation Form, including a copy of both their and the student's government-issued photo identification.

Administrative Withdrawal and Attendance Policies

Elmwood Institute may administratively withdraw a student from a course from the beginning of week two through the end of week twelve if the student shows no submitted assignments in the course for 30 consecutive calendar days. Students who are administratively withdrawn may appeal within 14 days of their withdrawal. Appeals should be directed to appeals@elmwoodinstitute.org. Upon approval, students will be reinstated in the course and must demonstrate continued progress. Students who are administratively withdrawn shall be subject to the [Tuition Refund Policy](#).

Requirements for Graduation

To receive the degree, the student must meet the following requirements:

- ◆ Successfully complete the courses required for the degree program within seven (7) years with a GPA of 3.0 or higher for 36 credit programs..
- ◆ Successfully complete either a [Comprehensive Examination or an institution-approved Final Project](#).
- ◆ Clear any past-due balances.

Scholastic Standing Policy

To ensure academic success and uphold the standards of academic integrity, this policy outlines the levels of scholastic standing, triggers for intervention (including academic integrity violations), and the appeal process available to students. See also [Academic Integrity Policy](#).

Scholastic Standing Levels

Good Academic Standing

Graduate students with a cumulative GPA of 3.0 or higher and no violations of academic integrity are in good academic standing.

Scholastic Warning (SW)

Issued when a graduate student's term GPA is below a 3.0 and their cumulative GPA is above a 3.0, or when there is a minor academic integrity violation. Students may register for courses, but are advised to seek academic support.

Academic Probation (AP)

Graduate students are placed on probation if their GPA remains below 3.0 for a second consecutive term or if a significant or additional minor academic integrity violation occurs. A student must raise their cumulative GPA to 3.0 within two terms and/or comply with all academic integrity sanctions. Students on AP are subject to registration holds and must follow an academic recovery plan.

Academic Dismissal (AD)

Students may be dismissed if they fail to meet GPA requirements during their period of Academic Probation, violate [Maximum Timeframe](#), or in the case of severe or repeated academic integrity violations. Dismissal recommendations are reviewed by the Scholastic Standing Committee (SSC) and submitted for final approval by the Executive Director (ED).

Academic Integrity & Scholastic Standing

Violations of the Academic Integrity Policy—including plagiarism, cheating, or submitting work that is not one's own—are considered serious offenses and will be reviewed under the Scholastic Standing Policy. The consequences vary depending on the severity and frequency of the violation. A first-time or minor offense may lead to a Scholastic Warning, while major or repeated violations can result in Academic Probation or Dismissal.

Maximum Timeframe

Students must show regular progress toward completion of their degree program. Regular progress is achieved by successfully completing at least two courses per 12 months of enrollment. Students enrolled in a 36-credit degree program must complete their program within seven (7) years. Students not showing any academic progress for a period of 12 months are subject to Academic Dismissal from Elmwood.

Leave of Absence

Students may receive a leave of absence by contacting the Director of Admissions and Student Achievement and stating the reason for their request and the expected date of return. All leaves of absence must be approved by the institution in advance. Students are exempt from the institution's Scholastic Standing policy while on Leave of Absence.

Appeal Process

Students have the right to appeal decisions related to Scholastic Warnings, Academic Probations, and Academic Dismissals.

To initiate an appeal, the student must submit a written appeal letter to the Registrar within 10 business days of receiving the notification. This letter should clearly outline the basis for the appeal and include any relevant supporting documentation. The Director of Education will then review the

appeal and may consult with faculty members or the [Scholastic Standing Committee](#) (SSC) as necessary. If the appeal is not resolved by the SSC or if it involves Academic Dismissal, the case will be forwarded to the Executive Director for final review. The decision of the Executive Director is final.

All appeal decisions will be communicated to the student in writing within 15 business days of submission.

Scholastic Standing Committee

The Scholastic Standing Committee (SSC) is responsible for reviewing and making determinations regarding students' academic progress, probation, and dismissal status in accordance with the university's academic policies.

Chaired by the Registrar, the committee includes the Director of Education and designated Faculty/Staff Representatives from academic divisions/schools. The committee convenes at specific points throughout the academic year to review students whose academic standing warrants formal evaluation due to low GPA, unsatisfactory academic progress, or violations of academic integrity.

The committee reviews documentation, academic history, and student appeals, and recommends actions such as Scholastic Warning, Academic Probation, Academic Dismissal, or Reinstatement. Its work ensures a fair, consistent, and academically sound process for addressing student performance concerns.

All students have the right to appeal decisions related to their academic standing. The Executive Director (ED) serves as the final decision-maker in all appeal cases, ensuring institutional oversight and a comprehensive review of each student's circumstances. The ED reviews appeal materials submitted after the committee's decision and issues a final determination that is not subject to further review.

The Registrar maintains official records of all decisions and communicates outcomes to the appropriate stakeholders.

Academic Integrity Policy

Elmwood Institute is committed to fostering a culture of academic honesty, integrity, and responsibility. Academic integrity is a cornerstone of meaningful learning and scholarly achievement. All students, regardless of residency or learning modality, are expected to uphold the highest standards of ethical academic behavior.

Definition of Academic Integrity

Academic integrity refers to the commitment to honest, responsible scholarship. This includes completing one's own academic work, appropriately acknowledging the contributions of others, and adhering to course-specific expectations and institutional standards.

Expectations

All students are expected to:

- Complete and submit their own original work;
- Cite all sources accurately and appropriately;
- Follow the guidelines and expectations outlined by faculty and the institution;
- Use only authorized resources when completing assessments or assignments;
- Refrain from engaging in or facilitating dishonest academic practices.

Violations of Academic Integrity

Academic integrity violations are serious offenses and include, but are not limited to:

- **Cheating and Academic Misconduct:** Using unauthorized materials, information, or assistance to gain an unfair advantage.

Examples include:

- Copying from another student or using unauthorized notes or devices during an exam;
- Submitting another person's work as one's own;
- Tampering with grades, exams, or academic records;
- Offering or accepting bribes or favors related to academic work.

- **Plagiarism & Self-Plagiarism:** Presenting another individual's ideas, words, or work as one's own without appropriate credit, or submitting one's own previous work for multiple assignments or courses without explicit permission from the instructor(s).

Examples include:

- Copying and pasting from sources without citation;
- Submitting purchased or borrowed work;
- Paraphrasing without acknowledging the original source.

- **Fabrication or Falsification:** Inventing, altering, or misrepresenting data, results, or academic documentation.

Examples include:

- Falsifying research data or lab results;
- Misrepresenting attendance or participation
- Changing or modifying grades or academic records

- **Misuse of Artificial Intelligence (AI):** Using AI tools to complete assignments or exams without the instructor's permission.

Examples include:

- Submitting AI-generated content as original work;
- Failing to disclose AI-assisted work when required.

- **Facilitation of Academic Dishonesty:** Assisting or attempting to assist others in violating academic integrity standards.

Examples include:

- Sharing test content or answers;
 - Completing assignments or assessments on behalf of another student.
- **Other Violations**
 - Purchasing or selling academic work (“contract cheating”);
 - Impersonating another student;
 - Disrupting or sabotaging another student’s work;
 - Making false reports of academic misconduct.

Consequences

Violations of this policy will result in disciplinary action. Depending on the severity and nature of the offense, consequences may include:

- A failing grade on the assignment or in the course;
- Academic probation;
- Suspension or dismissal from the institution.

All reported cases will be reviewed in accordance with Elmwood Institute’s academic integrity and student code of conduct procedures. Repeated or egregious violations may result in permanent separation from the institution.

Student Responsibility

It is the student’s responsibility to understand and comply with this policy. Students who are unsure whether an action constitutes a violation should consult their instructor or academic advisor before submitting their work.

Student Code of Conduct

Students at Elmwood Institute are expected to adhere to high standards of ethics in the pursuit of their education. As a condition of enrollment, students agree to:

- ◆ Conduct themselves with professionalism, courtesy, and respect for others in all dealings with the Elmwood Institute staff, faculty, and other students.
- ◆ Observe the institutional policies and rules on submitting work, taking examinations, and conducting research.
- ◆ Adhere to Elmwood’s [Academic Integrity Policy](#).
- ◆ Adhere to all required proctoring requirements.
- ◆ Never improperly use, destroy, forge, or alter Elmwood Institute’s documents, transcripts, or other records.
- ◆ Never divulge their online username or password.

- ◆ Always report any violations of this Code of Conduct to the Director of Education and report any evidence of cheating, plagiarism, or improper conduct on the part of any student of Elmwood Institute when they have direct knowledge of these activities.

Statement - Use of Artificial Intelligence in Academic Programs

Elmwood Institute recognizes the growing role of artificial intelligence (AI) in education, industry, and society. As part of our commitment to preparing students for success in an evolving global environment, the appropriate and ethical use of AI tools and technologies is integrated across academic programs and courses.

AI may be used to support instruction, enhance learning experiences, and develop relevant workforce competencies. Students may encounter AI in various forms, including learning platforms, writing assistants, coding tools, and data analysis systems. Faculty are encouraged to incorporate AI thoughtfully to promote innovation, critical thinking, and digital literacy.

Ethical Use of AI and Academic Integrity

While AI is a powerful tool, it must be used responsibly. Students are expected to follow academic integrity guidelines, which include disclosing the use of AI where required and using AI tools only in ways permitted by the instructor or course policies.

Unauthorized or undisclosed use of AI may be considered a violation of the Academic Integrity Policy and subject to disciplinary action. For details, please refer to the Academic Integrity Policy outlined in this catalog and the Student Handbook.

Elmwood Institute is committed to helping students and faculty navigate the ethical implications of AI through guidance, training, and ongoing dialogue.

Student Records and Privacy

In compliance with California Education Code Sec. 94900 and 5, California Code of Regulations Sec. 71920, Elmwood Institute maintains permanent records, including transcripts, for each student. To request an official transcript, students may contact the Registrar at registrar@elmwoodinstitute.org. Official transcripts require a processing fee.

Elmwood Institute protects the privacy rights of its students. Student education records are held confidential in accordance with the Family Educational Rights and Privacy Act (FERPA) and Elmwood's best practices. Written student consent is required for access and release of student records information. Students may inspect and review their educational records upon written request to the Registrar at registrar@elmwoodinstitute.org. Should a student find, upon review, records that are inaccurate or misleading, the student may request that errors be corrected. If a difference of opinion

exists regarding the existence of errors, a student may ask that a meeting be held to resolve the matter. Each student's file will contain the student's records, including a transcript of grades earned. Transcripts will only be released to the student upon receipt of a written request bearing the student's signature or digital equivalent. Per CA Civil Code §1788.93, Elmwood Institute will not refuse to provide a transcript because the student owes a debt.

Student Complaints and Grievances

If any student has a complaint, grievance, or dispute with the Elmwood Institute's procedures, policies, or decisions, the student has the right to seek a satisfactory resolution.

First, the student should discuss the matter directly with the instructor or an Elmwood Institute staff member. The instructor or staff member will attempt to resolve the matter professionally and in good faith. If the matter cannot be settled at this level, the second step is for the student to file a written complaint to Elmwood Institute Student Services, 2433 Coolidge Ave, Oakland, CA 94601, or at studentservices@elmwoodinstitute.org. The complaint should include a description of the specific allegations and the desired remedy, accompanied by any necessary documentation. Student Services can, if necessary, submit the complaint to Elmwood's Executive Director for final resolution. Student Services or the Executive Director will issue a formal reply to the student within ten working days.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form, which can be obtained on the Bureau's website (www.bppe.ca.gov).

Additionally, a complaint can be filed with Elmwood Institute's accrediting agency, the Distance Education Accrediting Commission (DEAC), through the DEAC website (<http://www.deac.org/Student-Center/Complaint-Process.aspx>) or 1101 17th Street NW, Suite 808, Washington, DC 20036.

Students who are residents of Georgia may file a complaint with the GNPEC Office, 2082 East Exchange Place, Suite 220, Tucker, GA 30084-5305. Ph: (707) 414-3300
<https://gnpec.georgia.gov/student-resources/complaints-against-institution>

For students residing outside of California and Georgia, there may be additional resources for filing grievances/complaints. Please see the State Higher Education Executive Officers Association website: http://www.shceo.org/shceo_surveys/.

Tuition and Fees

Students who enroll at Elmwood Institute assume responsibility for the payment of all tuition and fees in accordance with the policies set forth below.

Degree Tuition

Students are charged tuition on a per-term basis. Each term is 16 weeks in length. Standard tuition is \$25 per credit hour (\$75 per course).

Total estimated charges below are based on on-time completion of the program. Actual costs may vary due to transfer credit or repeated courses.

Master of Leadership and Management
(36 credits, 12 courses)

Tuition: \$25 per credit hour or \$75 per course

Total estimated charges for the program for domestic students
completing on time: **\$900**

International Student Tuition

The tuition for international graduate students is \$25 per credit hour (\$75 per course).

Withdrawals and Refunds

After the add/drop period of 7 days from the first day of the term, during which the student may [cancel their enrollment agreement](#) or adjust the number of courses for which they are registered, the student may withdraw from Elmwood Institute and receive a pro rata refund if they have completed 60% or less of the term.

For purposes of determining a refund, a student shall be considered to have withdrawn from an educational program when he or she withdraws or is deemed withdrawn in accordance with the withdrawal policy stated in this institution's catalog. Students who withdraw or are administratively withdrawn will receive a refund of tuition according to the following table:

Week of Withdrawal	Tuition Refund	Week of Withdrawal	Tuition Refund
Week 1	100%	Week 9	50%
Week 2	100%	Week 10	43%
Week 3	88%	Week 11	0%
Week 4	81%	Week 12	0%
Week 5	75%	Week 13	0%
Week 6	69%	Week 14	0%
Week 7	62%	Week 15	0%
Week 8	56%	Week 16	0%

For example, if a student who is registered for 6 units and paid \$150 withdraws from the institution during their fifth week of the term, the student would receive a refund of \$112.50:

$$\begin{array}{ccccccc}
 & & & 75\% & & & \\
 \$150.00 & \times & \text{(Student withdraws during Week 5} & = & \$112.50 \\
 & & \text{of the term)} & &
 \end{array}$$

If the institution cancels or discontinues a course or education program, the school will make a full refund of all charges.

All refunds will be paid within 30 days of cancellation or withdrawal.

If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid program funds. However, Elmwood Institute does not participate in federal and state financial aid programs.

Student's Right to Cancel

Students have the right to cancel and obtain a refund of charges paid through attendance at the first class session, or the seventh day after enrollment, whichever is later.

If a student cancels their enrollment agreement, they may obtain a refund of 100% of charges paid, if notice of cancellation is made prior to midnight of the seventh day of the term. Cancellation is effective on the date the written notice is sent to the institution.

A cancellation may be effectuated by the student's written notice or by the student's conduct, including, but not necessarily limited to, a student's lack of attendance. Students wishing to cancel their enrollment agreement must be made in writing through email, mail, or fax to: Elmwood Institute, Attn: Registrar, 548 Market St PMB 98598, San Francisco, CA 94104-5401; Phone: (626) 966-4576, ext. 1003; Fax: (626) 915-1709; E-mail: registrar@elmwoodinstitute.org.

After the seventh day of enrollment of the term, a student may withdraw for a partial refund. See [Withdrawals and Refunds](#). All refunds will be paid within 30 days of cancellation.

Student Loans

Elmwood Institute does not offer student loans and does not participate in federal or state student financial aid programs. If a student obtains a loan to pay for an education program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund.

If the student is eligible for a loan guaranteed by the federal or state government and the student defaults on the loan, both of the following may occur:

- ◆ The federal or state government or a loan guarantee agency may take action against the student, including apply any income tax refund to which the person is entitled to reduce the balance owed on the loan.
- ◆ The student may not be eligible for any other federal student aid at another institution or other government assistance until the loan is paid.

If the student has received federal student financial aid funds, the student is entitled to a refund of the moneys not paid from federal student financial aid program funds. Elmwood Institute does not participate in federal or state student aid programs.

Student Tuition Recovery Fund

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in

the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school.

Questions regarding the STRF may be directed to:

The Bureau for Private Postsecondary Education
1747 North Market Blvd., Suite 225 Sacramento, CA 95834
(916) 574-8900 or (888) 370-7589

To be eligible for STRF, you must be a California resident or enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

- ◆ The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
- ◆ You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
- ◆ You were enrolled at an institution or a location of an institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before the closure.
- ◆ The institution has been ordered to pay a refund by the Bureau but has failed to do so.
- ◆ The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
- ◆ You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
- ◆ You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number.

Course Descriptions

BUS 602 - Essentials of Management

Semester Units: 3

Prerequisite: None. Required to be taken in the first term for all students.

A demand for a new kind of manager has come to the forefront because business organizations are being challenged more than ever before to develop new resources and markets in a global economy. Whether a front line supervisor or the top executive of an enterprise, the functions of a manager are essentially the same. The manager must be able to make decisions and communicate these decisions to his organization. In order to do this, they must have the knowledge and ability to use today's most effective management techniques in a new and exciting era of technological change.

This course is designed to present the operational theory of management and furnish a framework of management organization. It is designed around the management functions of planning, organizing, staffing, directing and controlling. The objective of the course is to provide the student with a well-structured and varied knowledge of management disciplines.

The course covers: Management in a Global Environment – Managing Work and Organizations – Managing People in Organizations – Managing Production and Operations.

BUS 607 - Communication and Ethics

Semester Units: 3

Prerequisite/Corequisite: BUS 602

This is a three-part course. The first part covers all aspects of business communication. The second and third parts concentrate on business ethics.

Communication in business consists of different skill sets. The ability to communicate is essential to success in today's business environment. This part of the course is organized around the traditional content of a business communications course, including written and oral communication, global and multicultural issues, legal and ethical situations, and technology in communication.

The ethics part of the course presents a comprehensive review of current ethical issues from a global perspective of ethics. The course highlights both the positive and negative consequences of ethical behavior. The primary focus is to prevent potential ethical dilemmas that decision-makers may face in a number of different business areas.

LDR 611 - Leading Creativity and Innovation

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Effective leaders embody the spirit of Creativity and Innovation. As a result, they use flexible and adaptive thinking to introduce change and innovation, instilling a vision and sense of purpose to a sometimes chaotic environment. The goal of this course is to provide leaders with the knowledge and tools which will enable them to add Creativity and Innovation as core competencies to their already developed skill sets. This course will influence leaders by deliberately facilitating creative change and enforcing a productive sense of focus in their role of developing science and technologies for organizational growth.

BUS 612 - Leadership - Principles and Practices

Semester Units: 3

Prerequisite/Corequisite: BUS 602

This course covers the concepts, principles and skills of leadership in a manner that is appropriate for both new and experienced leaders. A thorough assessment of advanced leadership skills, the role and function of leadership and the impact on individual organizations and society is presented. Various leadership models and their effectiveness are discussed. Topics include leadership variables, ethics, leadership principles and approaches, team leadership and critical issues in leadership.

PMP 636 - Negotiation and Conflict Resolution

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Project managers exercise their negotiation skills every day. They negotiate with functional and other project managers within their own organization over time, scope, budget, schedules and change orders. Outside the organization they negotiate with customers, vendors, suppliers and subcontractors. Project managers negotiate during every phase of a project from the start-up, during performance, and right through the close-out.

This course provides the project manager the skills required to: negotiate schedules, change orders, estimates and contracts; resolve conflict; negotiate multi-party agreements; and build better teams. Strategy in negotiation is explored and the key role that planning and preparation play in a negotiation is emphasized. The dynamics of communication in negotiation are examined with special attention to the role of power and ethics.

The dynamics of negotiation that involves teams and groups is highlighted. Factors central to all negotiations as well as factors and dimensions strongly shaped by national and cultural style are also presented. Quite often negotiation strategies and tactics do not work the way they are intended to. Conflict resolution tactics are discussed which negotiators can use to help put derailed negotiations on track and keep a conflict from becoming increasingly destructive. Finally, the use of third parties to resolve breakdowns in negotiations is explored.

BUS 653 - Business Research Methods

Semester Units: 3

Prerequisite/Corequisite: None

This course is designed to provide a working knowledge of research methods and analytical techniques as they are used in business and government as tools for implementing a systematic approach to planning policies, programs and projects. It combines in one course the study of research methodology, the planning and design of research, and the management science tools that are used and the nature of decisions to which the research and analysis contribute. Modern decision theory which treats managerial problem solving as the selection of the best solution from a set of alternatives is emphasized. The course is not concerned with abstract statistical concepts but, rather, with the applicable techniques and their use in solving practical business problems.

In addition to providing a working knowledge of research methods and design, the course includes a brief, but thorough description of forty (40) tools of analysis with a description of the technique and its application. None of the techniques require sophisticated mathematical or computer implementation. Emphasis is placed on how the techniques are used and how to implement the results.

BUS 659 - Organizational Behavior and Human Resources

Semester Units: 3
Prerequisite/Corequisite: BUS 602

This course is based on the modern philosophies, research and practice concerning individual, interpersonal and organizational behavior. The course focuses on leadership techniques and on understanding and managing the behavior of individuals and groups, the human resources through which the manager gets things done; and on the organization design tools the manager can use to solve the series of major and recurring problems that occur in complex organizational life.

The course objectives are to provide the student with the skills to manage individual, interpersonal and group behavior, to develop the ability to diagram the causes of human problems in the work environment, and to develop judgmental skill in taking action to improve the motivation, effectiveness and satisfaction of working groups and individuals. The course considers a wide array of tools such as structural change, measurement systems, reward systems and educational methods for solving organizational problems.

LDR 668 - Cross-Cultural Management

Semester Units: 3
Prerequisite/Corequisite: BUS 602

This course focuses on the challenges and opportunities associated with organizational management and business strategy in the global environment. The course is intended to be a challenging advanced management course for the graduate business student. Students will gain a general overview of the process and effect of internationalization in contemporary business, along with an introduction to theories, concepts and skills relevant to managing effectively in today's global environment. Students will be challenged to integrate knowledge they have gained from other business core courses and apply their accumulated knowledge to business case studies. Students will engage in active research and analytical problem solving related to managing in the international environment and will be called upon to apply this theory in their work.

LDR 669 - Critical Thinking and Decision Analysis

Semester Units: 3
Prerequisite/Corequisite: BUS 602

The overall objective of this course is to improve the student's abilities in both critical thinking and decision-making. Critical thinking is the art of analyzing and evaluating thinking and argument with the purpose of improving it. Decision-making can be defined as the process of identifying alternatives, evaluating the alternatives, and choosing between the alternatives. Critical thinking and decision-making processes are intertwined. The critical thinking segment of this course provides a guide to the analysis, reconstruction, and evaluation of arguments designed to help students distinguish good reasoning from bad. The decision-making segment shows how decision analysis can be applied so that decisions are more effective by providing numerous usable decision analysis approaches.

LDR 670 - Organizational Theory, Design and Change

Semester Units: 3
Prerequisite/Corequisite: BUS 602

This course explores how organizations understand and integrate with their environments. Theories are valuable and important because they help us explain and control our surroundings. Thus, organizational theory is important and valuable because it can explain how organizations view themselves and help us bring control to how they interact with their environment. When we design organizations, theory can bring a logical foundation to our design efforts. It can help us put in place mechanisms to control those organizations to meet their goals. Finally, this course will examine the constant need to understand and approach vital changes that must be made if organizations are to remain dynamic and vital. Change in

organizations is the way they respond to, and shape, their environment. How will organizations take control of how and when they change? Students will be able to identify relevant organizational theories that will allow them to design effective organizations, and construct change strategies that can keep organizations viable in changing environments.

PMP 671 - Building and Managing Project Teams

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Building and Managing Project Teams provides a comprehensive overview of project management with a focus on leadership, team building, and effective communication. The course explores organizational theory, the distinctions between management and leadership, and strategies for planning, risk management, and conflict resolution. Students will examine cultural diversity's impact on project teams and the integration of emerging technologies, such as AI, in modern project management. By combining theoretical frameworks with practical applications, students will develop the skills needed to lead and manage diverse teams in dynamic environments.

LDR 676 - Advanced Approaches in Leadership

Semester Units: 3

Prerequisite/Corequisite: BUS 602

Using empirical studies, interesting anecdotes, stories, and findings, this course will expand your knowledge of leadership, building upon the foundations you have already developed through experience and academic coursework. This course will enhance your understanding of leadership at the Personal, Interpersonal, Team and Organizational (PITO) levels, and the complex array of leader-follower-situation (LFS) variables that influence the process of leadership at each of these levels. It will guide you in critically evaluating the strengths and limitations of your own leadership style, as it applies to both personal and interpersonal leadership; while applying your understanding of the tools and techniques used for developing your leadership skills, to include the Action-Observation- Reflection (A-O-R) model, and its utilization in journaling, mentoring, and evaluating case studies and personal experiences.

APPENDIX I

Standard Occupational Classification Codes

While Elmwood Institute does not guarantee job placement, advancement, continued employment or level of income or wage rate upon program/course completion or upon graduation, in compliance with 5 CCR §74112 (d)(3), the institution has identified the job classifications that each degree may prepare its graduates for using the United States Department of Labor's Standard Occupational Classification codes (SOC).

Master of Leadership and Management	
<u>Occupation</u>	<u>SOC Code</u>
Program Manager	11-1021.00
Regional Manager	11-9199.00
Division Chief	11-1011.00
Management and Program Analyst	13-1111.00
Department Manager	11-2021.00
Operations General Manager	11-2021.00
Business Manager	11-1021.00
Business Operations Specialist	13-1199.00
HR Administration Director	11-3121.00
HR Generalist/Specialist	13-1071.00
Business Development Director	11-2021.00
